

GREECE-RUSSIA AND GREECE-UKRAINE BILATERAL TRADE DATA MAY 2023 (Provisional data)

The Hellenic Statistical Authority (ELSTAT), responding to the need for the provision of specialized statistical information due to the ongoing developments linked to the war in Ukraine, announces bilateral trade data between Greece and Russian Federation (henceforth Russia) and between Greece and Ukraine.

The current Publication is issued on a monthly basis at preannounced dates during the whole period in which the publication of bilateral trade data is warranted and relevant in order to reflect the impact on the external trade transactions of the Greek enterprises with enterprises in Russia and in Ukraine.

EXPLANATORY NOTES

| | |
|-----------------------------|--|
| General | The Commercial Transactions are recorded on a monthly basis aiming at monitoring the total value of imports and exports as well as their changes. This recording does not include the imports and exports of services. |
| Legal framework | The survey is conducted for trade with third countries (Extrastat) in accordance with Regulation (EU) 2152/2019 and (EU) 1197/2020. |
| Reference period | May 2023 |
| Provision of results | 38 days after the end of the reference month (provisional data). The provisional data are revised and disseminated on a monthly basis for all the previous months until the finalization of the yearly data, which takes place ten months after the end of the reference year. |
| Definitions | EXTRASTAT is the system for collecting external trade data with third countries (countries outside the EU). Import is considered every import of goods from a third country (outside the EU). Export is considered every export of goods to a third country (outside the EU). |
| Methodology | EXTRASTAT: It is a statistical survey where data are collected by administrative sources, The Customs Authorities collect the relevant statistical data on trade by filling in the Single Administrative Document (SAD). All the transactions with third countries above the amount of 1,000 euros are registered. In the beginning of each month Customs Authorities transmit to the Hellenic Statistical Authority an electronic file with the customs data of statistical relevance of the previous month. The statistical data of imports and exports of goods with the Third Countries are derived from the data transmitted by the Customs Authorities. Henceforth, the provisional data from the "incomplete customs declarations" - which concern mainly petroleum products - are incorporated in the monthly data on trade with third countries; the "incomplete customs declarations" data after having been completed will be replaced by the final data. Classification of goods: The goods are classified in compliance with the 8-digit Combined Nomenclature Code (CN/8) and the Standard International Trade Classification (SITC). |
