

TURNOVER INDEX IN INDUSTRY May 2026, y-o-y increase of 14.1%

The Hellenic Statistical Authority announces the Turnover Index in Industry with base year 2021=100.0 for May 2026, the evolution of which on the basis of provisional data, is as follows:

The Overall Turnover Index in Industry (both Domestic and Non-Domestic Market) in May 2026 recorded an increase of 14.1% compared with the corresponding index of May 2025. The Overall Turnover Index in Industry in May 2025 increased by 2.3% compared with the corresponding index in May 2024 (Table 1).

The Overall Turnover Index in Industry in May 2026, compared with April 2026, recorded a decrease of 2.0% (Table 7).

The average Overall Turnover Index in Industry for the 12-month period from June 2025 to May 2026 increased by 5.5%, compared with the corresponding index of the 12-month period from June 2024 to May 2025. The average Overall Turnover Index in Industry for the 12-month period from June 2024 to May 2025 decreased by 0.4% compared with the corresponding index of the 12-month period from June 2023 to May 2024 (Table 8).

Evolution of annual (y-o-y) rates of change of the Overall Turnover Index in Industry, Domestic Market, Non-Domestic Market, Eurozone and Non-Eurozone Countries (%)

Evolution of the Turnover Index in Industry in May 2026

I. Annual changes of the Overall Turnover Index in Industry: May 2026 / May 2025

The 14.1% increase of the Overall Turnover Index in Industry in May 2026, compared with the corresponding index in May 2025, was due to the following:

1. Changes in the sub-indices of the industrial sections (Table 1):

- The Turnover Index in Manufacturing increased by 14.5%.
- The Turnover Index in Mining and quarrying decreased by 15.0%.

2. Changes in the sub-indices in Domestic and Non-Domestic Markets:

- The Turnover Index in Industry in Non-Domestic Market increased by 26.3% (Table 3).
- The Turnover Index in Industry in Domestic Market increased by 7.7% (Table 2).

3. Changes mainly in the sub-indices in the following 2-digit divisions (Table 6):

Coke and refined petroleum products, computers, electronic and optical products, other non-metallic mineral products, fabricated metal products, except machinery and equipment, rubber and plastic products.

II. Annual changes of the Turnover Index in Industry in Domestic Market: May 2026 / May 2025

The 7.7% increase of the Turnover Index in Industry in Domestic Market in May 2026, compared with May 2025, is due to the annual changes in the sub-indices of the following industrial sections (Table 2):

- The Turnover Index in Manufacturing increased by 7.9%.
- The Turnover Index in Mining and quarrying decreased by 7.4%.

III. Annual changes of the Turnover Index in Industry in Non-Domestic Market: May 2026 / May 2025

The 26.3% increase of the Turnover Index in Industry in Non-Domestic Market in May 2026, compared with May 2025, was due to the following:

1. Changes in the sub-indices of the industrial sections (Table 3):

- The Turnover Index in Manufacturing increased by 27.4%.
- The Turnover Index in Mining and quarrying decreased by 22.7%.

2. Changes in the sub-indices in Eurozone and Non-Eurozone countries:

- The Turnover Index in Industry in Non-Eurozone countries increased by 28.5% (Table 5).
- The Turnover Index in Industry in Eurozone countries increased by 23.4% (Table 4).

IV. Monthly changes of the Overall Turnover Index in Industry: May 2026 / April 2026

The 2.0% decrease of the Overall Turnover Index in Industry in May 2026, compared with the corresponding index in April 2026, was due to the following changes in the sub-indices of industrial sections (Table 7):

- The Turnover Index in Mining and quarrying decreased by 2.7%.
- The Turnover Index in Manufacturing decreased by 1.9%.

Table 1. Annual rates of change of the Turnover Index in Industry: Total Market

Base year: 2021=100.0

CodeSections and main groupings		May			Rate of change (%)

METHODOLOGICAL NOTES

Generally	The Industrial Turnover Index is an indicator of an enterprise's business cycle showing the monthly evolution of the market of goods and services in industry. The first compilation of the Turnover Index was completed by the Hellenic Statistical Authority in 2006, with base year 2000=100.0 and is compiled from 2000 onwards.
Purpose of the index	The purpose of this index is to measure the monthly activity of the industrial sector in terms of value. Turnover comprises the totals invoiced by the observation units during the reference period and corresponds to the market sales of goods or services supplied to third parties. The purposes and the characteristics of the Turnover Index apply, as well, to the indices for the distinction between domestic and non-domestic turnover.
Legal Framework	The compilation and publication of the Turnover Index is based on the Regulation (EU) No 2019/2152 of the European Parliament and of the Council on European business statistics, as well as Commission Implementing Regulation (EU) No 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) No 2019/2152. Furthermore, the indices are governed by Regulation (EC) No 1893/2006 of the European Parliament and of the Council.
Reference period	Month.
Base year	2021=100.0.
Revision	Pursuant to the provisions of Council Regulation No 2019/2152 concerning the indices, they are updated, every five (5) years in years ending in 0 or 5, while, in the current revision 2021=100.0 due to the impact of the pandemic, they were revised with base year the year 2021.
Statistical classifications	At the level of classes of economic activities, the statistical classification of economic activities NACE Rev. 2 of EU was used (Regulation No 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with Commission Regulation No 656/2007.
Geographical coverage	The index covers the whole Country.
Coverage of economic activities	The Turnover Index in Industry is compiled for all activities listed in Sections B (mining and quarrying) and C (manufacturing) of the NACE Rev. 2 statistical classification.
Computation of the Index	The Turnover Index in Industry is a fixed base index. This index is calculated at a first stage at the four-digit level of economic activity and subsequently, with the implementation of appropriate weighting coefficients, the index is calculated at higher levels (three-level and two-level of economic activity) as well as at the level of Main Industrial Groupings (MIGs).
Publication of data	The Turnover Index in Industry (2021=100.0) is released since April 2024 with October 2024 as first reference month. Data with base year 2021=100.0 are available from May 2000 onwards.
References	More information about the methodology concerning the compilation and calculation of the index and for the time series is available on the website of the Hellenic Statistical Authority (ELSTAT) (http://www.statistics.gr/en/statistics/-/publication/DKT24/-). All tables that were presented in the previous version of the Announcement are published at the same link.
