HELLENIC REPUBLIC
HELLENIC STATISTICAL AUTHORITY

Piraeus, 20 November 2026

TURNOVER INDEX IN INDUSTRY September 2026, y-o-y increase of 16.9%

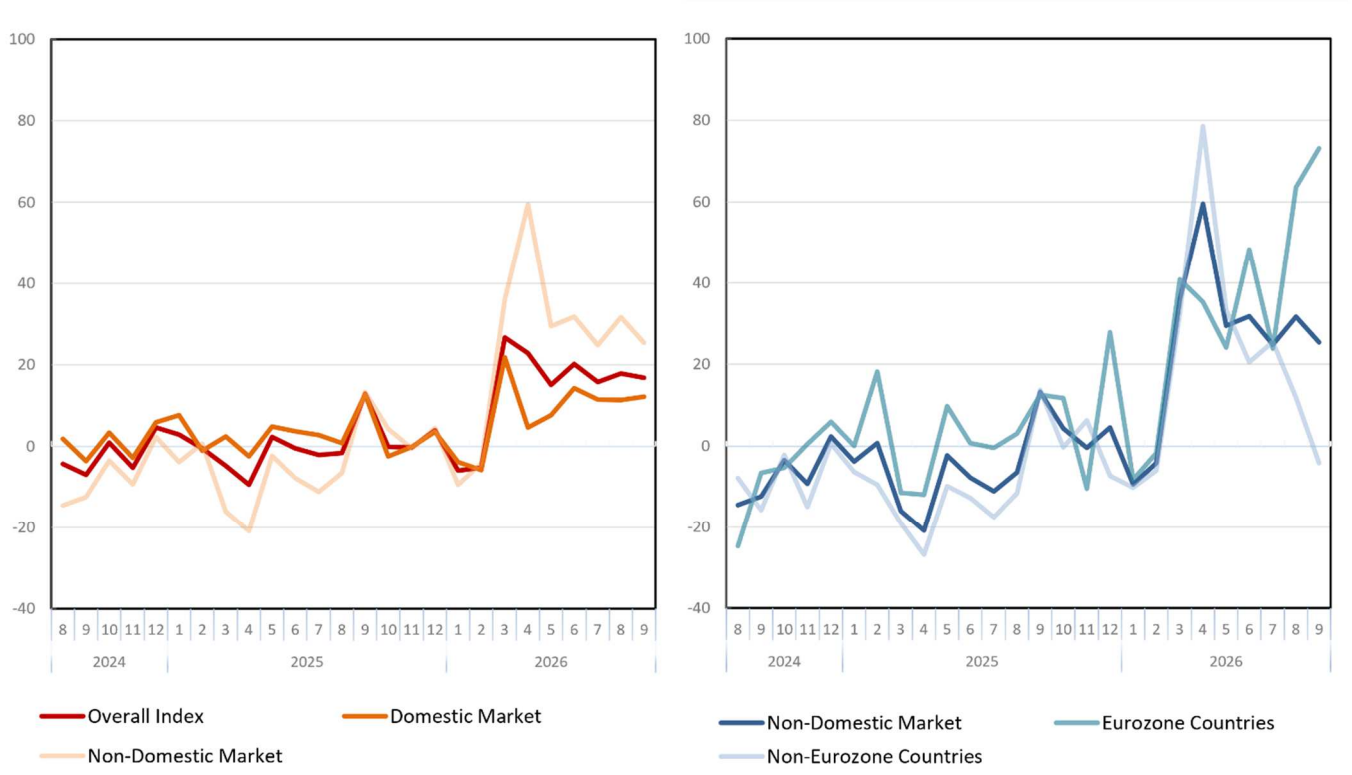

The Hellenic Statistical Authority announces the Turnover Index in Industry with base year 2021=100.0 for September 2026, the evolution of which on the basis of provisional data, is as follows:

The Overall Turnover Index in Industry (both Domestic and Non-Domestic Market) in September 2026 recorded an increase of 16.9% compared with the corresponding index of September 2025. The Overall Turnover Index in Industry in September 2025 increased by 12.9% compared with the corresponding index in September 2024 (Table 1).

The Overall Turnover Index in Industry in September 2026, compared with August 2026, recorded an increase of 22.7% (Table 7).

The average Overall Turnover Index in Industry for the 12-month period from October 2025 to September 2026 increased by 10.8% in comparison with the corresponding index for the period from October 2024 to September 2025, while the decrease recorded between the previous 12-month periods amounted to 0.2% (Table 8).

Evolution of annual (y-o-y) rates of change of the Overall Turnover Index in Industry, Domestic Market, Non-Domestic Market, Eurozone and Non-Eurozone Countries (%)

Evolution of the Turnover Index in Industry in September 2026

I. Annual changes of the Overall Turnover Index in Industry: September 2026 / September 2025

The 16.9% increase of the Overall Turnover Index in Industry in September 2026, compared with the corresponding index in September 2025, was due to the following:

1. **Changes in the sub-indices of the industrial sections (Table 1):**
   - The Turnover Index in Mining and Quarrying increased by 35.5%.
   - The Turnover Index in Manufacturing increased by 16.6%.
2. **Changes in the sub-indices in Domestic and Non-Domestic Markets:**
   - The Turnover Index in Industry in Non-Domestic Market increased by 25.4% (Table 3).
   - The Turnover Index in Industry in Domestic Market increased by 12.1% (Table 2).
3. **Changes mainly in the sub-indices in the following 2-digit divisions (Table 6):**
   Mining of coal and lignite - extraction of crude petroleum and natural gas - mining support service activities, mining of metal ores, coke and refined petroleum products, basic metals, other mining and quarrying products.

II. Annual changes of the Turnover Index in Industry in Domestic Market: September 2026 / September 2025

The 12.1% increase of the Turnover Index in Industry in Domestic Market in September 2026, compared with September 2025, is due to the annual changes in the sub-indices of the following industrial sections (Table 2):

- The Turnover Index in Mining and Quarrying increased by 16.4%.
- The Turnover Index in Manufacturing increased by 12.1%.

III. Annual changes of the Turnover Index in Industry in Non-Domestic Market: September 2026 / September 2025

The 25.4% increase of the Turnover Index in Industry in Non-Domestic Market in September 2026, compared with September 2025, was due to the following:

1. **Changes in the sub-indices of the industrial sections (Table 3):**
   - The Turnover Index in Mining and Quarrying increased by 57.5%.
   - The Turnover Index in Manufacturing increased by 24.9%.
2. **Changes in the sub-indices in Eurozone and Non-Eurozone countries:**
   - The Turnover Index in Industry in Eurozone countries increased by 73.1% (Table 4).
   - The Turnover Index in Industry in Non-Eurozone countries decreased by 4.2% (Table 5).

IV. Monthly changes of the Overall Turnover Index in Industry: September 2026 / August 2026

The 22.7% increase of the Overall Turnover Index in Industry in September 2026, compared with the corresponding index in August 2026, was due to the following changes in the sub-indices of industrial sections (Table 7):

- The Turnover Index in Mining and Quarrying increased by 70.9%.
- The Turnover Index in Manufacturing increased by 22.1%.

Table 1. Annual rates of change of the Turnover Index in Industry: Total Market

Base year: 2021=100.0

METHODOLOGICAL NOTES

Generally

The Industrial Turnover Index is an indicator of an enterprise's business cycle showing the monthly evolution of the market of goods and services in industry. The first compilation of the Turnover Index was completed by the Hellenic Statistical Authority in 2006, with base year 2000=100.0 and is compiled from 2000 onwards.

Purpose of the index

The purpose of this index is to measure the monthly activity of the industrial sector in terms of value. Turnover comprises the totals invoiced by the observation units during the reference period and corresponds to the market sales of goods or services supplied to third parties. The purposes and the characteristics of the Turnover Index apply, as well, to the indices for the distinction between domestic and non-domestic turnover.

Legal Framework

The compilation and publication of the Turnover Index is based on the Regulation (EU) No 2019/2152 of the European Parliament and of the Council on European business statistics, as well as Commission Implementing Regulation (EU) No 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) No 2019/2152. Furthermore, the indices are governed by Regulation (EC) No 1893/2006 of the European Parliament and of the Council.

Reference period

Month.

Base year

2021=100.0.

Revision

Pursuant to the provisions of Council Regulation No 2019/2152 concerning the indices, they are updated, every five (5) years in years ending in 0 or 5, while, in the current revision 2021=100.0 due to the impact of the pandemic, they were revised with base year the year 2021.

Statistical classifications

At the level of classes of economic activities, the statistical classification of economic activities NACE Rev. 2 of EU was used (Regulation No 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with Commission Regulation No 656/2007.

Geographical coverage

The index covers the whole Country.

Coverage of economic activities

The Turnover Index in Industry is compiled for all activities listed in Sections B (mining and quarrying) and C (manufacturing) of the NACE Rev. 2 statistical classification.

Computation of the Index

The Turnover Index in Industry is a fixed base index. This index is calculated at a first stage at the four-digit level of economic activity and subsequently, with the implementation of appropriate weighting coefficients, the index is calculated at higher levels (three-level and two-level of economic activity) as well as at the level of Main Industrial Groupings (MIGs).

Publication of data

The Turnover Index in Industry (2021=100.0) is released since August 2024 with October 2024 as first reference month. Data with base year 2021=100.0 are available from September 2000 onwards.

References

More information about the methodology concerning the compilation and calculation of the index and for the time series is available on the website of the Hellenic Statistical Authority (ELSTAT) (http://www.statistics.gr/en/statistics/-/publication/DKT24/-).
