

INDUSTRIAL PRODUCTION INDEX June 2026, y-o-y increase of 1.1%

The Hellenic Statistical Authority announces the Industrial Production Index (IPI) with base year 2021=100.0 for June 2026, the evolution of which, on the basis of provisional and working day adjusted data, is as follows:

The Overall Industrial Production Index in June 2026 recorded an increase of 1.1% compared with June 2025. The Overall IPI in June 2025 increased by 2.8% compared with the corresponding index in June 2024 (Table 1).

The average Overall Industrial Production Index for the period from January to June 2026 recorded an increase of 3.3% compared with the average IPI of the period from January to June 2025 (Table 2).

The seasonally adjusted Overall Industrial Production Index in June 2026 recorded a decrease of 0.4% compared with the corresponding index of May 2026 (Table 3).

The index of leather and related products division showed the greatest percentage decrease, whereas the index of computers, electronic and optical products recorded the greatest percentage increase in June 2026 compared with May 2026. Comparing the indices of June 2026 with the corresponding indices of June 2025, the greatest percentage increase was recorded in mining of coal and lignite – extraction of crude petroleum and natural gas – mining support service activities division, while the highest percentage decrease was recorded in leather and related products division (Tables 1 and 3).

Evolution of the Industrial Production Index in June 2026

I. Annual changes: June 2026 / June 2025 (Table 1)

The 1.1% increase of the working day adjusted Overall IPI in June 2026, compared with the corresponding index in June 2025, is due to the annual changes of the sub-indices in the following industrial sections:

Increase of:

- 2.4% in the Manufacturing Index. The increase was mainly the result of the annual changes of the sub-indices in the following 2-digit divisions: computers, electronic and optical products, repair and installation of machinery and equipment, other transport equipment, coke and refined petroleum products, other manufacturing.

Decrease of:

- 2.6% in the Water Supply Index.
- 3.0% in the Mining and Quarrying Index. The decrease was the result of the annual changes of the sub-indices in the following 2-digit divisions: mining of metal ores, other mining and quarrying.
- 3.8 in the Electricity Supply Index.

II. Rates of change of the average index of the period January - June 2026 compared with the corresponding index of the period January - June 2025 (Table 2)

The 3.3% increase of the working day adjusted average Overall IPI in the 6-month period January - June 2026, compared with the corresponding index in January - June 2025, is due to the corresponding rates of change of the sub-indices in the following industrial sections:

Increase of:

- 9.1% in the Electricity Supply Index.
- 2.4% in the Manufacturing Index.

Decrease of:

- 1.7% in the Water Supply Index.
- 9.7% in the Mining and Quarrying Index.

III. Monthly changes: June 2026 / May 2026 (Table 3)

The 0.4% decrease of the seasonally adjusted Overall IPI in June 2026, compared with the corresponding index in May 2026, is due to the monthly changes of the sub-indices in the following industrial sections:

Decrease of:

- 4.3% in the Electricity Supply Index.

Increase of:

- 0.1% in the Water Supply Index.
- 0.8% in the Manufacturing Index.
- 1.9% in the Mining and Quarrying Index.

Table 1. Annual rates of change of the Industrial Production Index

(Working day adjusted data, according to the real number of working days)

Base year: 2021=100.0

35	Electricity supply	101.89	106.44	-4.3
E	WATER SUPPLY	98.90	98.84	0.1
36	Water collection, treatment and supply	98.90	98.84	0.1
MAIN INDUSTRIAL GROUPINGS				
1	Energy	102.38	106.48	-3.9
2	Intermediate goods	110.21	108.60	1.5
3	Capital goods	133.14	131.32	1.4
4	Consumer Durables	162.54	158.49	2.6
5	Consumer Non-Durables	122.23	121.89	0.3

Notes:

1. The indices are rounded up to two decimal digits when published and percentage changes up to one decimal digit when published.
2. The whole time-series with seasonally adjusted indices is recalculated every time a new observation is added in the time-series.
3. The composed index of divisions 05-06-09 is not seasonally adjusted.

METHODOLOGICAL NOTES

Generally	The Industrial Production Index (IPI) in Greece has been compiled by the Hellenic Statistical Authority (ELSTAT) from 1959 onwards.
Purpose of the index	The objective of the index is to compare the magnitude (volume) of the output in the current month in the mining and quarrying, manufacturing, electricity and water supply divisions with the corresponding output of a given fixed period, which is considered as base period. The Industrial Production Index shows the evolution of the value added of the production factors cost, at constant prices.
Legal framework	The compilation of the IPI, is governed by Council Regulation (EU) No 2019/2152 of the European Parliament and of the Council on European business statistics (EBS-Regulation), as well as the Commission Implementing Regulation (EU) No 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) No 2019/2152. Furthermore, the IPI is governed by Regulation (EC) No 1893/2006 of the European Parliament and of the Council.
Reference period	Month.
Base year	2021=100.0.
Revision	Pursuant to the provisions of Council Regulation No 2019/2152 concerning the Industrial Production Index, it is updated, every five (5) years, in years ending in 0 or 5, while, in the current revision 2021=100.0 due to the impact of the pandemic, it is revised with base year the year 2021.
Statistical classifications	At the level of branches of economic activities, the statistical classification of economic activities NACE Rev.2 of EU was used (Regulation No 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with Council Regulation No 656/2007. At product level, the statistical classification CPA 2008 of EU was used, according to Council Regulation No 451/2008.
Geographical coverage	The index covers the whole Country.
Coverage of economic activities	The index covers all the sections of industry, the main industrial groups, as well as all levels of economic activity.
Statistical survey	The data are collected from a sample of 1,152 enterprises. The survey covers 313 products and the measurement of the surveyed products is made in terms of output quantities or in terms of production value or turnover, according to the specific features in each branch of economic activity.
Seasonal adjustment	Seasonal adjustment is the procedure followed to remove the impact of seasonality on the time-series (i.e. the impact of monthly effects, e.g. holidays, tourist period etc.), in order to improve comparability over time. The method applied is TRAMO-SEATS with the use of JDemetra+ 2.0.0. For the seasonal adjustment of the Industrial Production Index at 2-digit level of NACE Rev.2, at section level (B – Mining and Quarrying, C – Manufacturing, D – Electricity and E – Water Supply) and for the Main Industrial Groupings (MIGs), the direct approach is applied, namely each time-series is seasonally adjusted independently. For the overall Industrial Production Index, the indirect approach is applied, with the seasonally adjusted IPI being computed by aggregating the seasonally adjusted MIGs using appropriate weights.
Publication of data	The revised IPI with the new base year 2021 (2021=100.0) is released since February 2026, with December 2025 as the first reference month. Data with base year 2021=100.0 are available from January 2000 onwards.
References	More information about the methodology concerning the compilation and calculation of the index and the time series shall be available on the website of the Hellenic Statistical Authority (ELSTAT) (http://www.statistics.gr/en/statistics/-/publication/DKT21/-). All data that were presented in the previous version of the Announcement are published at the same link.
