Graph 2. Evolution of the Turnover Indices in Services Sections (2021=100.0)

Graph 3. Evolution of the Production Indices in Services Sections (2021=100.0)

General	The Turnover Indices in Services Sections as quarterly indices were first released in 2005, with base year (b.y.) 2005=100.0. From January 2024 the Turnover and Production (volume) indices are compiled monthly with b.y. 2021=100.0
Purpose of the Indices - Definitions	The purpose of these indices is to measure in value terms the activity of services in the market. As business cycle indices, they illustrate the monthly activity of the services sector. The turnover excludes VAT and comprises the totals invoiced by the enterprise per Kind of Activity Unit (KAU), during the reference period (month/quarter), which corresponds to sales of goods and services supplied to third parties. Turnover also includes all the other charges (transport, packaging etc.) passed on to the customer, even if these charges are listed separately on the invoice. Turnover excludes VAT and other similar deductible taxes directly linked to turnover, as well as all duties and taxes on the goods or services invoiced by the enterprises.
Legal framework	The compilation and publication of the indices are based on the Regulation (EU) No 2019/2152 of the European Parliament and of the Council on European business statistics. as well as Commission Implementing Regulation (EU) No 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) No 2019/2152. Furthermore, the indices are governed by Regulation (EC) No 1893/2006 of the European Parliament and of the Council.
Reference period	Month.
Base year	2021=100.0.
Revision	Pursuant to the provisions of Council Regulation No 2019/2152 concerning the indices, they are updated, every five (5) years in years ending in 0 or 5, while, in the current revision 2021=100.0 due to the impact of the pandemic, they were revised with base year the year 2021. The purpose of the revision is to adapt the index to recent developments as regards the structure of services sector.
Statistical classification	The statistical classification of economic activities NACE Rev.2 is applied, in accordance with Regulation (EC) No 1893/2006 of the European Parliament and of the Council.
Geographical coverage	Turnover Indices in Services Sector cover the whole of the country.
Coverage of economic activities	• Land transport and transport via pipelines (Section H division 49) • Water transport (Section H division 50) • Air transport (Section H division 51) • Warehousing and support activities for transportation (Section H division 52) • Postal and courier activities (Section H division 53) • Accommodation activities (Section I division 55) • Food Service activities (Section I division 56) • Publishing activities (Section J division 58) • Motion picture, video and television program production, sound recording and music publishing activities (Section J division 59) • Programming and broadcasting activities (Section J division 60) • Telecommunications (Section J division 61) • Computer programming, consultancy and related activities (Section J division 62) • Information service activities (Section J division 63) • Real estate activities (Section L division 68) • Legal and accounting activities (Section M division 69) • Management consultancy activities (Section M division 70) • Architectural and engineering activities, technical testing and analysis (Section M division 71) • Advertising and market research (Section M division 73) • Other professional, scientific and technical activities (Section M division 74) • Rental and Leasing activities (Section N division 77) • Employment activities (Section N division 78) • Travel agency, tour operator reservation service and related activities (Section N division 79) • Security and investigation activities (Section N division 80) • Services to buildings and landscape activities (Section N division 81) • Office administrative, office support and other business support activities (Section N division 82)
Statistical survey	The sampling unit used is the enterprise per Kind of Activity Unit (KAU). The population for the above-mentioned divisions of the NACE Rev. 2 statistical classification, is 46,284 enterprises in the reference base year 2021, from which a random representative sample of 6,235 enterprises was therefore selected and surveyed.
Compilation of indices	The indices are compiled by applying the chain-linking method, while the indices are adjusted to a typical month by multiplying the estimated turnover values with an adjustment factor in accordance with the working days of each month. The typical quarter refers to the real number of working days.

The production (volume) indices for each division of services sections, result by the deflation of the turnover

indices, using as deflators the Harmonized Index of Consumer Prices with Constant Taxes (HICP-ST) and the Producer Price Index in Services (SPPI) for the corresponding divisions.

Seasonal adjustment	Seasonal adjustment is the procedure followed to remove the impact of seasonality on the time series (after eliminating the seasonal effects. e.g.: the beginning of the school year, holidays, tourist period, etc.), in order to improve comparability over time. The method applied is the TRAMO-SEATS with the use of JDemetra+ 2.0.0. The whole series with seasonally adjusted indices is recalculated every time a new observation is added into the timeseries.
Compiled index series	Turnover Indices in Services Sections timeseries are compiled retrospectively from 2000 (due to the previous quarterly compilation of the indices), while from 2021, with b.y. 2021=100.0, the new production indices in services, as well as the indices at sections level and the overall index are compiled.
Publication of data	The monthly Turnover and Production Indices in Services Sections with b.y. 2021=100.0, are released in May 2024 (for the reference period January-March 2024) with retrospective data since January 2021.
