At European level, the survey is governed by Commission Regulation (EU) No 88/2011 of 2 February 2011 implementing Regulation (EC) No 452/2008 of the European Parliament and of the Council concerning the production and development of statistics on education and lifelong learning, as regards statistics on education and training systems.

7.2 Data sharing

Not applicable.

8. Confidentiality

[Top](#)

8.1 Confidentiality policy

The issues concerning the observance of statistical confidentiality by the Hellenic Statistical Authority (ELSTAT) are arranged by Articles 7, 8 and 9 of the Law 3832/2010 as in force, by Articles 8, 10 and 11(2) of the Regulation on Statistical Obligations of the agencies of the Hellenic Statistical System and by Articles 10 and 15 of the Regulation on the Operation and Administration of ELSTAT.

More precisely:

ELSTAT disseminates the statistics in compliance with the statistical principles of the European Statistics Code of Practice and in particular with the principle of statistical confidentiality.

8.2 Confidentiality – data treatment

- ELSTAT protects and does not disseminate data it has obtained or it has access to, which enable the direct or indirect identification of the statistical units that have provided them by the disclosure of individual

information directly received for statistical purposes or indirectly supplied from administrative or other sources. ELSTAT takes all appropriate preventive measures so as to render impossible the identification of individual statistical units by technical or other means that might reasonably be used by a third party. Statistical data that could potentially enable the identification of the statistical unit are disseminated by ELSTAT if and only if:

- a) these data have been treated, as it is specifically set out in the Regulation on Statistical Obligations of the agencies of the Hellenic Statistical System (ELSS), in such a way that their dissemination does not prejudice statistical confidentiality or
- b) the statistical unit has given its consent, without any reservations, for the disclosure of data.

➤ The confidential data that are transmitted by ELSS agencies to ELSTAT are used exclusively for statistical purposes and the only persons who have the right to have access to these data are the personnel engaged in this task and appointed by an act of the President of ELSTAT.

➤ ELSTAT may grant researchers conducting statistical analyses for scientific purposes access to data that enable the indirect identification of the statistical units concerned. The access is granted provided the following conditions are satisfied:

- a) an appropriate request together with a detailed research proposal in conformity with current scientific standards have been submitted;
- b) the research proposal indicates in sufficient detail the set of data to be accessed, the methods of analyzing them, and the time needed for the research;
- c) a contract specifying the conditions for access, the obligations of the researchers, the measures for respecting the confidentiality of statistical data and the sanctions in case of breach of these obligations has been signed by the individual researcher, by his/her institution, or by the organization commissioning the research, as the case may be, and by ELSTAT.

➤ Issues referring to the observance of statistical confidentiality are examined by the Statistical Confidentiality Committee (SCC) operating in ELSTAT. The responsibilities of this Committee are to make recommendations to the President of ELSTAT on:

- the level of detail at which statistical data can be disseminated, so as the identification, either directly or indirectly, of the surveyed statistical unit is not possible;
- the anonymization criteria for the microdata provided to users;
- the granting to researchers access to confidential data for scientific purposes.

➤ The staff of ELSTAT, under any employment status, as well as the temporary survey workers who are employed for the collection of statistical data in statistical surveys conducted by ELSTAT, who acquire access by any means to confidential data, are bound by the principle of confidentiality and must use these data exclusively for the statistical purposes of ELSTAT. After the termination of their term of office, they are not allowed to use these data for any purpose.

➤ Violation of data confidentiality and/or statistical confidentiality by any civil servant or employee of ELSTAT constitutes the disciplinary offence of violation of duty and may be punished with the penalty of final dismissal.

➤ ELSTAT, by its decision, may impose a penalty amounting from ten thousand (10,000) up to two hundred thousand (200,000) euros to anyone who violates the confidentiality of data and/or statistical confidentiality. The penalty is always imposed after the hearing of the defense of the person liable for the breach, depending on the gravity and the repercussions of the violation. Any relapse constitutes an aggravating factor for the assessment of the administrative sanction.

12.1 Documentation on methodology

Short methodological notes are available on the portal of ELSTAT, <http://www.statistics.gr>, at the link:

"Statistical Themes > Education > Secondary Education > Lower Secondary Schools - Repatriated and Foreign Pupils (Beginning of school year)" or "Statistical Themes > Education > Secondary Education > General Upper Secondary Schools - Repatriated and Foreign Pupils (Beginning of school year)" or "Statistical Themes > Education > Secondary Education > Vocational and Ecclesiastical Education - Repatriated and Foreign Pupils (Beginning of school year)" and by the Division of Statistical Information and Publications / Section of Library and Section of Statistical Information

12.1.1 Metadata completeness - rate

The meta-data completeness rate is 100% (number of available meta-data to the number of meta-data that are applied).

12.2 Quality documentation

After data collection through the survey questionnaires, logical checks are carried out in order to check correctness and completeness of data by contacting the involved agencies. Furthermore, electronic and quality checks are conducted on the tabulated data. The survey metadata in the form of SDMX metadata (June 2014) are posted on the website of ELSTAT.

13. Quality management

[Top](#)

13.1 Quality assurance

During data processing, the data are also compared, mainly, with data from the previous school year, in order to detect any deviations. In case such deviations are identified, further clarifications are asked from the School Units of Secondary Education, the Divisions of Secondary Education and the Ministry of Education and Religious Affairs and any errors are fully corrected. The quality of the surveys is also ensured by adhering to the provisions of the European Statistics Code of Practice.

13.2 Quality assessment

The questionnaires are filled in by the School Units of Secondary Education and then the Divisions of Secondary Education transmit the completed questionnaires to the Education Statistics Section where they are checked for completeness and correctness and are then compared with the corresponding questionnaires of the previous school year. After the checks and comparisons possible errors are corrected resulting in the production of high quality data. Errors or lack of data that are noticed, are taken under consideration for the implementation of further checks on the surveys of the next school year.

14. Relevance

[Top](#)

14.1 User needs

The main national users are government agencies, such as the Ministry of Education and Religious Affairs, the Ministry of Interior, Local Government, as well as university teachers, students, researchers, the press, etc. At international level, the main user is Eurostat, as well as other international organisations (Unesco, OECD, etc.).

Users' needs are recorded in the publication "Information Bulletin" which is published by the Division of Statistical Information and Publications/Library Section every semester.

14.2 User satisfaction

A Users Satisfaction Survey is conducted by the Section of Statistical Dissemination of the Division of Statistical Information and Publications. The survey results are available at the following link:
<http://www.statistics.gr/portal/page/portal/ESYE/PAGE-conferences>

14.3 Completeness

The variables are collected in compliance with European Regulations and national legislation and also on the basis of users' needs. Completeness is considered satisfactory.

15. Accuracy and reliability

[Top](#)

15.1 Overall accuracy

Overall accuracy is considered satisfactory, since the surveys are census surveys and there is full coverage. Any non-sampling errors are identified by means of appropriate checking and are duly corrected, in cooperation with the Divisions of Secondary Education supervising the corresponding school units.

15.2 Sampling error

No sampling errors because surveys are census surveys. The registers are updated before the beginning of the school year, taking into consideration any changes in secondary education, as these are reflected in the relevant legislation. The registers is compared with the registers of the Ministry of Education and Religious Affairs for the school year when the surveys are conducted, therefore there is full coverage.

15.3 Non-sampling error

Any non-sampling errors are identified by means of appropriate checking and are duly corrected, in cooperation with the Informatics Division of ELSTAT and the Divisions of Secondary Education of the Ministry of Education and Religious Affairs which supervise the corresponding school units.

15.3.1 Coverage error

The coverage errors are minimized because the register of the surveys is updated on a yearly basis in cooperation with the Ministry of Education and Religious Affairs and the Divisions of Secondary Education which supervise the corresponding school units, though which the survey is conducted.

15.3.1.1 Over-coverage – rate

No coverage of school units that not belong to the surveys.

15.3.1.2 Common units – proportion

Not applicable.

15.3.2 Measurement error

The questionnaires, which are filled in by the teachers, include checks between questions - tables. They are then checked by the Divisions of Secondary Education and the Regional Statistical Offices of ELSTAT, and finally, once collected they are checked and codified by the Section of Education Statistics of ELSTAT. At this stage, the data are compared with the corresponding data of the surveys of the previous year. The above procedure minimizes any measurement errors.

15.3.3 Non response error

The surveyed school units respond to the survey and fill in the questionnaires. In case there are missing values for some variables, ELSTAT staff contacts with the school unit or the supervising Division of Secondary Education.

15.3.4 Processing error

Once collected, the questionnaires are subject to quality, logical and computational checks. Then, the Informatics Division proceeds with data entry and afterwards the Education Statistics Section carries out further checks in order to compile the tables of the survey. The above procedure minimizes processing errors.

15.3.5 Model assumption error

Not applicable.

16. Timeliness and punctuality

[Top](#)

16.1 Timeliness

The results of the surveys, as regards the data for the beginning of the school year are made available and are released twelve (12) months after the end of the reference period.

16.2 Punctuality
No delays.

17. Comparability	Top
17.1 Comparability - geographical	
European Regulations (Regulation 452/2008 of the European Parliament and of the Council and implementing Regulation 88/2-2-2011), as well as the relevant methodological principles ensure a satisfactory level of comparability with the European Statistics on Education.	
17.1.1 Assymetry for mirror flows statistics – coefficient	
Not applicable.	
17.2 Comparability over time	
The data of the time series are fully comparable over time. The relevant time series with data by school year date back from 2000.	

18. Coherence	Top
18.1 Coherence cross-domain	
Any differences that may be identified with relevant surveys conducted by the Ministry of Education and Religious Affairs may be on account of the different reference period of the surveys.	
18.1.1 Coherence – sub annual and annual statistics	
There is no problem of coherence among monthly, quarterly and annual data because the surveys are conducted on a yearly basis.	
18.1.2 Coherence – National Accounts	
No coherence with National Accounts, because there are neither similar statistics nor common variables among these surveys.	
18.2 Coherence - internal	
No inconsistencies are observed.	

19. Cost and burden	Top
No other burden than the operational expense of the Section / Division of ELSTAT.	

20. Data revision	Top
20.1 Revision policy	
The revision policy implemented by ELSTAT is available at the following link: http://www.statistics.gr/portal/page/portal/ESYE/BUCKET/General/ELSTAT_Revisions_Policy_22_5_2013_GR.pdf	
20.2 Revision practice	
The results of the surveys on Repatriated and Foreign Pupils of Secondary Education have not been revised in the sense of paragraph 20.1. The latest adjustment of the questionnaire ΣΕ-6Γ used for Vocational and Ecclesiastical Education carried out in the school year 2007/2008 is pursuant to the Law 3475/2006.	

21. Statistical processing	Top
21.1 Source data	
The surveys are census surveys. The data are collected by means of the questionnaires ΣΕ-3Γ, ΣΕ-4Γ and ΣΕ-6Γ which includes aggregate numerical data on Repatriated and Foreign Pupils of Secondary Education of each Secondary Education school unit (public and private), referring to the number of repatriated and foreign pupils attending Secondary Education schools (public and private) by gender, year of birth, class, country of birth and country of origin, citizenship, etc. at the beginning of the school year. The register of	

ELSTAT includes fields for: the code number of each school unit, its name, the geographical code, capacity, type (private, public), postal address, postal code, telephone number and e-mail address. The school units are registered by supervising Division of Secondary Education. The register is updated on a yearly basis, on the basis of changes (mergers, abolishment or creation of new school units) carried out by the Ministry of Education and Religious Affairs.

21.2 Frequency of data collection

Data are collected once a year, at the beginning of every school year.

21.3 Data collection

The Section of Education Statistics sends the questionnaires ΣΕ-3Γ, ΣΕ-4Γ and ΣΕ-6Γ, through the Divisions of Secondary Education, to the school units under their supervision and to the school units (EPAS) under the supervision of the Ministry of Rural Development and Food, the Ministry of Labour, Social Security and Welfare, the Ministry of Health and the Ministry of Tourism and then the filled in questionnaires are collected from these school units.

The questionnaires are posted on the website of ELSTAT:

http://www.statistics.gr/portal/page/portal/ESYE/BUCKET/A1402/Other/A1402_SED22_QS_AN_00_2010_0_0_2010_03C_F_GR.pdf

21.4 Data validation

The data are validated by means of a series of checks. The control of the questionnaires encompasses completeness, accuracy and logical checks at the level of the Division of Secondary Education, electronic and quality checks. The main variables are compared with variables from other statistical sources. Primary data are cross-checked with the corresponding data of the previous year.

21.5 Data compilation

The data after having been collected undergo logical checks, are codified, are entered the electronic data base, are tabulated and finally they are published. No imputation, weighting or calibration, etc is applied for the compilation of data.

21.5.1 Imputation – rate

Not applicable.

21.6 Adjustment

Not necessary.

21.6.1 Seasonal adjustment

No seasonal adjustment methods or tools are implemented for eliminating any impacts on account of seasonality.
