## **PRESS RELEASE**

### *LABOUR FORCE SURVEY*

*February 2008*

The General Secretariat of National Statistical Service of Greece announces the Labour Force Survey's results for February 2008.

For monthly estimations, a sub sample of the quarterly Labour Force survey's sample was used. In total, 23,411 persons, belonging to 9,727 different households, were interviewed.

Monthly employment's characteristics (number of employed, unemployed etc.) were estimated by an unbiased estimator, which was calculated based on: a) the probability of selection of a household, b) the non response rate in each primary sampling unit and c) and the estimated population distribution by sex and group ages in every NUT II level area, for February.
