65-74 years old	2.3	2.1	0.5	0.0	0.5	2.9
Total	9.7	9.3	8.9	8.9	10.2	14.8

EXPLANATORY NOTES

- Labour Force Survey** Labour Force Survey produces estimates since 1981 (second quarter of the year). From 1998 onwards it is a continuous quarterly survey. The main statistical objectives of the Labour Force Survey is to divide the population of working age (15 years and over) into three mutually exclusive and exhaustive groups - persons in employment, unemployed persons and inactive persons. In addition, the Labour Force Survey collects information on demographic characteristics, on main job characteristics, on the existence and characteristics of a second job, on educational attainment, on participation in education, on previous working experience and on search of job.
- Legislation** The current survey is completely harmonized with European legislation. The principal legal act is the Council Regulation (EC) No. 577/98 that stipulates the provisions on design, survey characteristics and decision-making processes. The survey framework was modified in successive Commission regulations. (Regulation (EC) No 1372/2007, Regulation (EC) No 2257/2003, Regulation (EC) No 1991/2002).
- Reference Period** The sample of Labour Force Survey is equally allocated to the 4 (or 5) weeks of the month. Every selected household is assigned to a specific week, the reference week, running from Monday to Sunday.
- For employment the reference period is the reference week.
 - For employment seeking the reference period is the reference week and the previous 3 weeks.
- Coverage** For the monthly estimates, a sub-sample of the quarterly Labour Force survey's sample was used.
- Definitions**
- Employed** are persons aged 15 years or older, who during the reference week worked, even for just one hour, for pay or profit or they were working in the family business, or they were not at work but had a job or business from which they were temporarily absent.
- Unemployed** are persons aged 15-74 who were without work during the reference week (they were not classified as employed), were currently available for work and were either actively seeking work in the past four weeks or had already found a job to start within the next three months.
- Inactive** are those persons who are neither classified as employed nor as unemployed.
- Economically active population (labour force)** are persons either employed or unemployed.
- Unemployment Rate** is the ratio of unemployed divided by total labour force.
- Methodology** Labour Force Survey's estimates are produced by a suitable unbiased estimator which takes in to account a) the probability of selection of every sampled household, b) the response rate in every primary sampling unit, c) the estimated population for January 2010, allocated by NUTS II areas, gender and age group).
- References** Analytical description of the Labour Force Survey's methodology and definitions can be found at www.statistics.gr.
