¹ The Turnover Indices for Motor Trades are new indices with base year 2005=100,0 covering the period from 2005 onwards.

The compilation and publication of these new indices is based upon the requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics as well as the amendment Regulation 1158/2005 of the European Parliament and Council amending the Council Regulation (EC) No 1165/98.

The turnover index is an important business indicator. The objective of this index is to show the evolution of the market for goods and services. Turnover comprises the totals invoiced (without VAT) by the observation units during the reference period (quarter). This corresponds to the market sales of goods or services supplied to third parties.

² The Turnover Indices for Motor Trades are compiled for the **NACE-Rev.1.1 division 50**-sale maintenance and repair of motor vehicles, motorcycles and related and retail sale of automotive fuel. They are also compiled for groups **501**(sale of motor vehicles),**502**(maintenance and repair of motor vehicles) and **505**(retail sale of automotive fuel) The survey for the compilation of the above indices includes 318 sampled enterprises .

³ All figures in this release are based on data adjusted for working days. The data are provisional when first released. The data become final as soon as all gathered data become definite. More specifically the data released for the most recent quarter are provisional and are published together with revised data of the previous quarter. The publication of data concerning groups 501, 502,505 starts from the first quarter 2007 retrospectively from the base year (2005).
