## PRESS RELEASE

### MATERIAL COSTS INDEX IN CONSTRUCTION OF NEW RESIDENTIAL BUILDINGS: May 2013 (2010=100.0)

The Material Costs Index in Construction of New Residential Buildings in May 2013 compared with May 2012 recorded a decrease of 1.6%. The index in May 2012 had recorded an increase of 1.0% compared with May 2011 (Table 1).

The Material Costs Index in May 2013 compared with April 2013 recorded a decrease of 0.2%. The index had remained unchanged between May 2012 and April 2012 (Table 2).

The twelve-month average index, from June 2012 to May 2013, compared with the same index of the period from June 2011 to May 2012, decreased by 0.1%. The previous year the twelve-month average index had increased by 1.4% (Table 3).

4. Percentage changes are calculated on the basis of indices with five decimal figures and are rounded up to one decimal figure when published.

## METHODOLOGICAL NOTES

<b>Generally</b>	The compilation of the Material Costs Index in Construction of New Residential Buildings started in 1971. The index, in its current form with base year 2010, is compiled since February 2013, when it replaced the previous index with base year 2005.
<b>Purpose of the index – definitions</b>	<p>The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and are consumed in the construction of new residential buildings.</p> <p>The Material Costs Index is a monthly index and consists a sub-index of the overall cost index in construction of new residential buildings.</p> <p>For the compilation of the index the selected prices of the materials are those which are actually paid by the construction enterprises for materials supplied at the site and do not include VAT and other taxes.</p>
<b>Legal basis</b>	The compilation of the Material Costs Index is governed by Council Regulation (EEC) No.1165/98 concerning short-term statistics and by Regulation No.1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council.
<b>Reference period</b>	Month
<b>Base year</b>	2010=100,0
<b>Revision</b>	The Material Costs Index is a fixed base index. After the last revision, the index is calculated with base year 2010=100.0. Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is updated every five (5) years, on years ending in 0 or 5.
<b>Statistical classification</b>	The national classification is followed, which includes 91 categories of materials, aggregated in 15 groups.
<b>Geographical coverage</b>	The geographical coverage of the index includes the country as a whole, but prices are collected only in the biggest cities of the country (Greater Athens, Thessaloniki, Patras, Herakleion Larisa and Volos,).
<b>Coverage of economic activities</b>	The Material Costs Index in Construction of New Residential Buildings is an input index that refers to the purchase prices of materials paid by the constructors of new residential buildings.
<b>Statistical survey</b>	A total number of 1515 observations (prices) collected from 280 commercial or industrial enterprises supplying building materials, are used for the compilation of the index. For electricity, prices are collected from the Public Power Corporation, while for water, data are provided by water supplies companies.
<b>Publication of data</b>	The index with the new base year 2010=100.0 is being released since March 2013, with February 2013 as the first reference month. Times series data with base year 2010=100.0 are available from January 2000 onwards.
<b>References</b>	More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the EL.STAT. website: ( <a href="http://www.statistics.gr">www.statistics.gr</a> ).
