ARRIVALS AND NIGHTS SPENT AT COLLECTIVE ACCOMMODATION ESTABLISHMENTS (hotels, similar establishments and camping) YEAR 2006 (Final data)

The National Statistical Service of Greece publishes data of arrivals and nights spent at collective accommodation establishments in Greece, which are collected through a census survey, according the Directive 95/57 of the E.U. The data are received from all hotels, similar establishments and camping in Greece.

The data in the attached tables show that, during 2006, in Greece the nights spent at hotels, similar establishments and camping increased by 4,6% (as compared to 2005), mainly due to non-residents (5,7% increase), as opposed to residents (1,5% increase). Correspondingly, the arrivals at hotels, similar establishments and camping are increased by 4,3%, mainly due to non-residents (5,4% increase), as opposed to residents (2,8% increase).

In general, during 2006, the share of the residents in the arrivals at hotels, similar establishments and camping is 44,6%, while for non-residents is 55,4%. For the nights spent at these establishments, the share of residents is 25,5% (with an average stay of 2,4 nights), while for non-residents is 74,5% (with an average stay of 5,6 nights).

The total percentage use of bed-places at hotels and similar establishments (excluding camping) in 2006 is 59,8%, while in 2005 was 58,6%.

In particular, looking at the geographical regions, we see that in 2006 the highest increase in the use of bed-places -as compared to 2005- is observed in the Islands of Southern Egeo (Cyclades and Dodecanese), Attiki and Central Makedonia.

During 2006, the highest percentage of use of bed-places is observed in Kriti (78%), Islands of Southern Egeo (77%) and Ionian Islands (76%).

As for the total nights spent (at hotels, similar establishments and camping), the highest increase -as compared to 2005- is observed in Central Makedonia (14%), Attiki (10%), Western Greece (9%) and Kriti (8%). For the arrivals, the highest increase is observed in Western Greece (10%), Attiki (9%), Ipiros, Central Makedonia and Islands of Northern Egeo (8%) and Kriti (7%).

In Thessalia and Peloponissos, on the other hand, there is a decrease both in arrivals and nights spent (at hotels, similar establishments and camping).

During 2006, the 60,6% of the total arrivals is accumulated in four (4) regions and in particular in Attiki (22,3%), Kriti (13,3%), Islands of Southern Egeo (13,0%) and in Central Makedonia (12,0%). As for the nights spent, the 58,3% of the total is accumulated in three (3) regions, that is, Kriti (23,3%), Islands of Southern Egeo (22,8%) and Ionian Islands (12,2%).

Analysing data by the country of residence of the customers at hotels, similar establishments and camping, the majority of the arrivals and nights spent is from the European Union (70,1% for the arrivals and 80,3% for the nights spent) and mainly from Germany and the United Kingdom.

As compared to 2005 and taking into account the share of the arrivals and nights spent in the total, during 2006, the highest increase is observed for customers from America (mainly USA), Austria, Belgium, Italy, Netherlands, Sweden, Denmark and Russia.

On the other hand, there is a decrease in arrivals and nights spent for customers from Germany, United Kingdom and Italy, that is from countries that contribute greatly to Greek tourism.

The significant increase observed for customers from Estonia, Latvia, Lithuania, Luxembourg and Malta, is mainly due to the inclusion of this information in our questionnaires from 2005 and onwards and to the progressive adaptation, of the persons filling in the questionnaires, in recording data from the above mentioned countries.

Analytical data are included in the attached tables and diagrams.
