OF GREECE

Pireas, July 21st, 2009

## PRESS RELEASE

ARRIVALS AND NIGHTS SPENT AT COLLECTIVE ACCOMMODATION ESTABLISHMENTS  
(hotels, similar establishments and camping)  
YEAR 2008  
(Final data)

The National Statistical Service of Greece publishes data of arrivals and nights spent at collective accommodation establishments in Greece, which are collected through a census survey, according the Directive 95/57 of the E.U. The data are received from all hotels, similar establishments and camping in Greece.

In general, as shown in Tables 1 and 2, during 2008 there is a 0.31% increase in nights spent in hotels, similar establishments and camping, which is due to the nights that residents spent in these establishments (1.8% increase), as opposed to the 0.22% decrease for the non-residents. The arrivals at hotels, similar establishments and camping show a 0.15% decrease, which is due to the non-residents (0.75% decrease), as opposed to the increase by 0.61% for the residents.

During 2008, the share of the residents in the arrivals at hotels, similar establishments and camping is 44.5%, while for non-residents is 55.5%. For the nights spent at these establishments, the share of residents is 26.9% (with an average stay of 2.5 nights, per person), while for non-residents is 73.1% (with an average stay of 5.4 nights, per person).

The total percentage use of bed-places at hotels and similar establishments (excluding camping) is 56.7%, while during 2007 it was 57.0%.

In particular, looking at the **geographical regions** (Tables 3-6), we see that in 2008 about 70% of the total arrivals and 81% of the total nights spent is accumulated in five (5) regions and in particular in Kriti, Islands of Southern Egea, Central Makedonia, Ionian Islands and Attiki.

We can see that in 2008, the higher percentages of the use of bed-places are observed in the Ionian Islands (70.0%), in Kriti (69.9%) and in the Islands of Southern Egea (68.4%). Taking into account the share of the nights spent of the regions in the total, the greater increase in the % use of bed-places is seen in Central Makedonia and in the Ionian Islands. However, for the Ionian Islands this is mainly due to the decrease in the number of bed-places in use, during 2008 as compared to 2007. A decrease in the number of bed-places in use, during 2008, is also seen in Attiki, but in this region the % use of bed-places is, nevertheless, decreased.

These observations, about the percentage use of bed-places, are in accordance to the data of the total number of nights spent in the regions. An increase, both in the customers flow in hotels, similar establishments and camping and in their share in the total is observed in Central Makedonia, in Eastern Makedonia & Thraki and in Kriti. On the other hand, a decrease is shown in most of the other regions and mainly in Attiki, Peloponissos, Central Greece and the Ionian Islands. Analyzing data by the **country of residence** of the non-resident customers at hotels, similar establishments and camping (Tables 7-8), the majority of the arrivals and nights spent is from the European Union (72% for the arrivals and 80% for the nights spent).

Compared to 2007 and taking into account their share in the total of the arrivals and the night spent in hotels, similar establishments and camping, we can see that in 2008 there is a decrease from Germany, the United Kingdom, Italy, the Netherlands, Austria and the U.S.A.

An increase, both in the customers flow and in their share in the total is observed from France, Russia, Poland, Romania, Bulgaria and Czech Republic.

Finally, analyzing data by **month**, for hotels, similar establishments and camping (Tables 9-10), we see that 81% of arrivals (69% of residents and 91% of non-residents) and 91% of nights spent (75% of residents and 96% of non-residents) is accumulated in the period between April and October. During the rest of the year, arrivals and nights spent are mainly due to the residents of Greece.

More specifically, the data of nights spent show an increase during the first months of the year (January - March). The decrease in April is due to the non-residents, mainly because of the Catholic Easter which in 2008 it was in March, while in 2007 it was in April. Data from May to September in 2008 are at about the same level of the data of 2007, while a decrease starts showing from October 2008 and on.

Analytical data are included in the attached tables and diagrams.
