PRESS RELEASE

MATERIAL COSTS INDEX IN THE CONSTRUCTION OF NEW RESIDENTIAL BUILDINGS: September 2017, y-o-y increase 0.9%

The Overall Material Costs Index in Construction (CSTM) of New Residential Buildings with base year 2010=100.0 in September 2017 recorded an increase of 0.9% in comparison with September 2016. The corresponding index in September 2016 had recorded a decrease of 1.7% compared with September 2015 (Table 1).

The Overall Index in September 2017, compared with the corresponding index in August 2017, recorded an increase of 0.6%. The index had recorded a decrease of 0.1% between September 2016 and August 2016 (Table 2).

The average Index for the twelve-month period from October 2016 to September 2017, compared with the corresponding index for the twelve-month period from October 2015 to September 2016, decreased by 0.1%. The comparison of the twelve-month average Material Costs Index in the corresponding previous twelve-month periods recorded a decrease of 2.1% (Table 3).

The time series of CSTM are available on the website of ELSTAT, at:

1. Annual rates of change: September 2017 compared with September 2016

The 0.9% increase of the Overall Material Cost Index in the Construction of New Residential Buildings in September 2017, compared with the corresponding index in September 2016 (Table 1), is on account of the changes in the individual cost indices mainly of the following material groups:

Code	Material groups	Rates of change %
146121501	Diesel fuel	14.2
146120702	Cooper pipes	13.7
146120903	Cupreous pipes	5.6
146120101	Cement	2.1
146120601	Steel reinforcing rods	1.8
146120904	Electric switches	1.7
146120105	Ready-mixed concrete	1.6
146121304	Expanded polystyrene, polyurethane	1.2
146120106	Reinforcements of mortars and ready mixed concrete	1.1
146120708	Central heating radiators	0.6
146120902	Plastic tubes	-1.4
146120407	Plasterboard	-1.4
146120503	Wooden windows	-1.2
146120704	Plastic, synthetic, fiber cement pipes	-1.2
146120606	Aluminum door and window frames	-0.9
146120303	Ground marble	-0.9
146120506	Internal doors	-0.8
146120608	Stainless railings	-0.7
146120501	Builders' timber	-0.7
146121502	Electric energy	-0.6
146121201	Floor and wall tiles generally	-0.5
146120508	Wooden cupboards	-0.5

2. Monthly rates of change: September 2017 compared with August 2017

The 0.6% increase of the Overall Material Cost Index in the Construction of New Residential Buildings in September 2017, compared with the corresponding index in August 2017 (Table 2), is on account of the changes in the individual cost indices mainly of the following material groups:

Code	Material groups	Rates of change %
146120601	Steel reinforcing rods	3.3
146120903	Cupreous pipes	2.4
146120702	Cooper pipes	1.8
146121501	Diesel fuel	1.8
146120105	Ready-mixed concrete	0.4
146120902	Plastic tubes	-0.5

Table 1: Annual rates of change of the Material Cost Index in the Construction of New Residential Buildings

Base year: 2010=100.0

Code	Material groups	Weighting coefficient	September			Rates of change (%)	
			2017	2016	2015	2017/2016	2016/2015

METHODOLOGICAL NOTES

Generally	The compilation of the Material Cost Index in the Construction of New Residential Buildings started in 1971. The index is released in its current form since February 2013 with base year 2010=100.0 and the time series were revised accordingly.
Purpose of the index – definitions	<p>The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and are consumed in the construction of new residential buildings.</p> <p>The Material Cost Index is a monthly index and is a sub-index of the overall cost index in the construction of new residential buildings.</p> <p>The index is compiled on the basis of the collected prices which are the prices of the materials are those which are actually paid by the construction enterprises for materials supplied at the site and do not include VAT and other taxes.</p>
Legal basis	The compilation of the Material Cost Index is governed by Council Regulation (EEC) No 1165/98 concerning short-term statistics and by Regulation No 1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council.
Reference period	Month.
Base year	2010=100.0.
Revision	The Material Cost Index is a fixed base index. After the last revision, the index is calculated with base year 2010=100.0. Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is revised every five (5) years, in years ending in 0 or 5.
Statistical classification	The national classification is followed, which includes 91 categories of materials, aggregated in 15 groups.
Geographical coverage	The geographical coverage of the index includes the country as a whole, but prices are collected only in the biggest cities of the country (Greater Athens, Thessaloniki, Patra, Herakleion, Larisa and Volos).
Coverage of economic activities	The Material Cost Index in the Construction of New Residential Buildings is an input index that refers to the purchase prices of materials paid by the constructors of new residential buildings.
Statistical survey	A total number of 1515 observations (prices) collected from 280 commercial or industrial enterprises supplying building materials are used for the compilation of the index. For electricity, prices are collected from the Public Power Corporation, while as regards water; data are provided by water supply corporations.
Publication of data	The index with the new base year 2010=100.0 is released since March 2013, with February 2013 as the first reference month. Times series data with base year 2010=100.0 are available from January 2000 onwards.
References	More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the website of ELSTAT: http://www.statistics.gr/en/statistics/-/publication/DKT60/
