

**HELLENIC REPUBLIC
MINISTRY OF FINANCE**

**GENERAL SECRETARIAT OF THE
NATIONAL STATISTICAL SERVICE
OF GREECE**

Piraeus, 23 February 2010

PRESS RELEASE

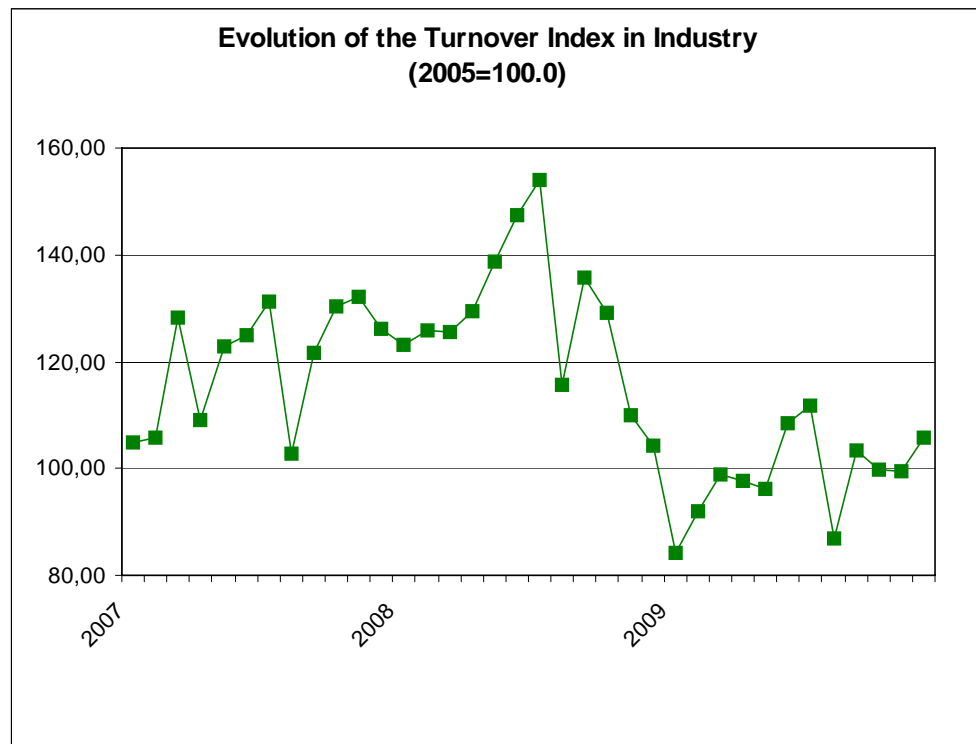

The Turnover Index in Industry recorded a rise of 1.7% in December 2009 as compared to December 2008.

TURNOVER INDEX IN INDUSTRY: December 2009

The Turnover Index in Industry (both domestic and non-domestic market) in December 2009 as compared to December 2008 recorded a rise of 1.7%. A year earlier, the annual rate of change of the Turnover Index in Industry was -17.5%.

The average Turnover Index in Industry for the 12-month period January 2009 – December 2009, as compared to the 12-month period January 2008 – December 2008, fell by 23.0%. A year earlier, the corresponding average rate of change of the Turnover Index in Industry was 6.9%.

**Evolution of the Turnover Index in Industry
(2005=100.0)**

The increase of the Turnover Index in Industry by 1.7% in December 2009, as compared to December 2008, was due to the annual changes as following:

- by Industrial Sections

- Mining and quarrying turnover fell by 1.9%.
- Manufacturing turnover rose by 1.7%.

In addition, the increase of the Turnover Index in Industry by 1.7% in December 2009, as compared to December 2008, was due to the annual changes of the indices of the markets as following:

- The Turnover Index in Industry for the domestic market fell by 0.8%.
- The Turnover Index in Industry for the non-domestic market rose by 10.2%.

The increase of the Turnover Index in Industry for the non-domestic market by 10.2% in December 2009, as compared to December 2008, was due to the annual changes as following:

- The Turnover Index in Industry for the Eurozone countries rose by 20.8%.
- The Turnover Index in Industry for the non-Eurozone countries rose by 8.1%.

*Provisional data

Note: 1. The indices are calculated with infinite decimal figures and are rounded up to one decimal figure when published.
2. Percentage changes are calculated on the basis of indices with infinite decimal figures and are rounded up to one decimal figure when published.

METHODOLOGICAL NOTES

Generally	The Turnover Index is an important business indicator and shows the monthly evolution of the market of goods and services in industry. This Index was first compiled by the National Statistical Service of Greece in 2006, with base year 2000=100.0.
Purpose of the index	The purpose of this index is to measure the monthly activity of the industrial sector in terms of value. Turnover comprises the totals invoiced (without VAT) by the observation units during the reference period and corresponds to the market sales of goods or services supplied to third parties. The purposes and the characteristics of the Turnover Index apply, as well, to the indices for the distinction between domestic and non-domestic turnover.
Legal basis	The compilation and publication of the Turnover Index is based on the framework of requirements of the Council Regulation (EC) No 1165/98 concerning short-term statistics (STS-R), as well as the amendment Regulation (EC) No 1158/05 of the European Parliament and Council, amending the Council Regulation (EC) No 1165/98. Furthermore, this index is governed by the Regulation (EEC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EEC) No.656/2007 and by the Regulation (EEC) No.451/2008 of the Council.
Reference period	Month
Base year	2005=100.0.
Revision	The last revision of the Turnover Index in Industry with base year 2005=100.0 is done in the framework of the Short – Term Statistics (STS) Council Regulation (EC) No 1165/98 concerning short-term statistics. According to this regulation the index in question is updated every five years, in years ending in 0 or 5.
Statistical classifications	At the level of categories of economic activities the new Eurostat classification NACE Rev. 2 was used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with the Commission Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 was used, according to the Council Regulation 451/2008.
Geographical coverage	The Index covers the whole country.
Coverage of economic activities	The Turnover Index in Industry covers the whole country and is compiled for all activities listed in Sections C (mining and quarrying) and D (manufacturing) of the NACE Rev.2 classification.
Computation of the Index	The Turnover Index in Industry is a fixed base index. This index is calculated initially at the four-digit level of economic activity and subsequently, with the implementation of appropriate weighting coefficients, the index is calculated at higher levels (three-level, two-level and one-level of economic activity) or at the level of Main Industrial Groupings (MIGs).
Publication of data	The Turnover Index with base year 2005=100.0 is released from April 2009 with January 2009 as first reference month. The availability of data with base year 2005=100.0 starts from January 2000.
References	More information about the methodology for the compilation and calculation of the index and for the time series is available in the NSSG website (www.statistics.gr).
