## **PRESS RELEASE**

# EVOLUTION OF TURNOVER OF ENTERPRISES UNDER SUSPENSION OF OPERATION DUE TO THE PANDEMIC OF THE CORONA VIRUS DISEASE 2019 (COVID-19)

The Hellenic Statistical Authority (ELSTAT) announces data on the evolution of turnover of the enterprises that were under suspension of operation, on the basis of state order, due to the pandemic of the corona virus disease 2019 (COVID-19) (corresponding link, available only in Greek, *KAD of closed enterprises*).

The current publication is a sequel of the relevant Press Release published by ELSTAT (PR link) on 16 April 2020, incorporating the most recent data on turnover from Administrative Sources for March 2020. Similar publications will be issued by ELSTAT on a monthly basis onwards, during the whole period in which the recording of the impacts of COVID-19 on the performance of Greek enterprises that were under suspension of operation in the framework of the confinement measures will present interest and will be plausible.

The purpose served by these publications is to contemporarily monitor and present the evolution of the basic economic result (turnover from Administrative Sources) of the enterprises under suspension of operation, in particular, from the beginning of the current year (January-February 2020), during the whole period of the implementation of the confinement measures (March-April 2020) and during the period of the gradual lifting of these measures (May 2020 and subsequent months), as well as in comparison with the corresponding months of 2019.

The published data can highlight, on the one hand, which enterprises suffered more, in terms of turnover decrease, during the implementation period of the confinement measures and on the other hand, which enterprises recovered faster or slower upon the gradual lifting of these measures.

Moreover, on the basis of the published data, it can be concluded from the supply side, which enterprises responded – adjusted faster to the lifting of the confinement measures and to the operation under the new conditions posed due to the pandemic. In parallel, from the demand side, useful, indirect conclusions can be drawn as regards the enterprises that were chosen in priority and more massively by the consumers (natural persons and enterprises) from the beginning of the lifting of the confinement measures, in order to satisfy their basic and other needs.

#### More specifically,

From the 205,984 enterprises that were under suspension of operation, the enterprises in the activity classes of Education and of Activities of membership organisations had their turnover increased per 0.6% and 3.1% respectively in the first quarter of 2020 compared to the first quarter of 2019. The enterprises in the activity class Creative arts and entertainment activities recorded the smallest decrease in turnover, 3.5%, between the first quarter of 2020 and the first quarter of 2019, while the enterprises of the Accommodation activity class recorded the largest decrease, 19.1%, (Tables 1 and 2a).

For the enterprises under suspension of operation, obliged to double-entry accounting bookkeeping, for which data are available on a monthly basis, the enterprises in the activity class Creative arts and entertainment activities recorded the smallest decrease in turnover, 11.6%, between March 2020 and March 2019, while the enterprises in the activity class Office administrative, office support and other business support activities recorded the largest decrease in turnover, 67.3%, between March 2020 and March 2019 (Table 2b).

#### **METHODOLOGICAL NOTES**

#### Generally

The present Press Release provides statistical data on enterprises classified in the economic activity classes that were or are under suspension of operation on the basis of state order, due to the pandemic of the corona virus disease 2019 (COVID-19), (relevant link from the Ministry of Finance webpage, available only in Greek, *KAD of closed enterprises*).

These statistical data have been compiled on the basis of the linking and processing of primary data from the following sources:

- The most recent published Statistical Business Register of ELSTAT, of the reference year 2017.
- Administrative registers of enterprises, of the reference year 2019.
- Administrative transactions files (tax, etc) of the reference years 2019 and 2020.

In particular, the following primary data have been used per source:

- Active enterprises and the economic activity class from the Statistical Business Register of the reference year 2017.
- The population of legal units (VAT number) classified in KAD (Codes of Activity) with temporary suspension of operation.
- Income data from administrative transaction files of the years 2019 and 2020.

It has to be noted, that after the process of matching the KAD codes to the classes of the Statistical Classification of Economic Activities (NACE Rev. 2), for which a total (referring to all the underlying activities) or a partial suspension of operation is applied for the enterprises that are classified to them on the basis of state order, follows the linking with the data of the Statistical Business Register of the year 2017, which is the main reference framework for the current Press Release. This linking leads to different results as regards the share of enterprises under suspension of operation per economic activity class NACE Rev.2, (mainly, because there are enterprises that were operating during the whole or part of the year 2017 and they were closed from 2018 onwards).

## Statistical classifications

For the economic activities, the European statistical classification of economic activities NACE Rev. 2 is used. It is noted, that an automatic transition from KAD to codes of NACE Rev. 2 classification was applied on the basis of valid correspondence rules.

#### Reference Year

Not applicable

#### Statistical unit

The statistical unit is the legal unit (distinct VAT numbers).

## Comparability

The announced statistical data are comparable with the data of the most recent Statistical Business Register of ELSTAT, of the reference year 2017 (relevant link from the webpage of ELSTAT, where tables and information on the methodology applied are provided <u>Statistical Business Register</u>).
