

PRESS RELEASE

PRODUCER PRICE INDEX IN INDUSTRY: June 2020, y-o-y decrease of 7.4%

The Overall Producer Price Index (PPI) in Industry (total of domestic and non domestic market) with base year 2015=100.0 in June 2020 recorded a decrease of 7.4% compared with June 2019. The corresponding index in June 2019 had recorded a decrease of 1.8% compared with June 2018 (Table 1.I).

The Overall Producer Price Index in June 2020 recorded an increase of 2.6% compared with May 2020. The corresponding index in June 2019 had recorded a decrease of 2.3% compared with May 2019 (Table 1.II).

The average Overall Index for the twelve-month period from July 2019 to June 2020 decreased by 3.8% in comparison with the corresponding index for the period from July 2018 to June 2019, while the increase recorded between the previous twelve-month periods amounted to 3.5% (Table 6).

The time series of PPI are available on the website of ELSTAT, at:

1. Annual rates of change: June 2020 compared with June 2019

The decrease of 7.4% in the Overall Producer Price Index in Industry in June 2020 compared with June 2019 is on account of the annual changes of the sub-indices of the markets as follows:

a. 4.4% decrease in the PPI of the Domestic Market (Table 2.I).

More specifically, the aforementioned decrease was the result of the yearly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

| Code | Division | Rates of change (%) |
|------|--|---------------------|
| 19 | Manufacture of coke and refined petroleum products | -32.9 |
| 27 | Manufacture of electrical equipment | -8.3 |
| 23 | Manufacture of other non-metallic mineral products | -0.9 |
| 10 | Manufacture of food products | 0.5 |
| 11 | Manufacture of beverages | 2.2 |
| 13 | Manufacture of textiles | 3.7 |
| 28 | Manufacture of machinery and equipment n.e.c. | 3.9 |
| 16 | Manufacture of wood and of products of wood and cork | 4.3 |
| 35 | Electricity, gas, steam and air conditioning supply | 4.9 |
| 05 | Mining of coal and lignite | 40.6 |

b. 16.5% decrease in the PPI of the Non-Domestic Market (Table 3.I).

More specifically, the aforementioned decrease was the result of the yearly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

| Code | Division | Rates of change (%) |
|------|--|---------------------|
| 35 | Electricity, gas, steam and air conditioning supply | -45.5 |
| 19 | Manufacture of coke and refined petroleum products | -41.1 |
| 07 | Minings of metal ores | -13.8 |
| 08 | Other mining and quarrying | -5.0 |
| 27 | Manufacture of electrical equipment | -4.5 |
| 26 | Manufacture of computer, electronic and optical products | -3.6 |
| 21 | Manufacture of basic pharmaceutical products and pharmaceutical preparations | -2.1 |
| 24 | Manufacture of basic metals | -1.0 |
| 10 | Manufacture of food products | -0.7 |
| 25 | Manufacture of fabricated metal products except machinery and equipment | 4.2 |

2. Monthly rates of change: June 2020 compared with May 2020

The increase of 2.6% in the Overall Producer Price Index in Industry in June 2020 compared with May 2020 is on account of the monthly changes of the sub-indices of the markets as follows:

a. 1.4% increase in the PPI of the Domestic Market (Table 2.II).

More specifically, the aforementioned increase was the result of the monthly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

| Code | Division | Rates of change (%) |
|------|--|---------------------|
| 19 | Manufacture of coke and refined petroleum products | 20.0 |
| 28 | Manufacture of machinery and equipment n.e.c. | 2.1 |
| 16 | Manufacture of wood and of products of wood and cork | 0.8 |
| 14 | Manufacture of wearing apparel | 0.4 |
| 11 | Manufacture of beverages | 0.2 |
| 10 | Manufacture of food products | -0.1 |
| 20 | Manufacture of chemicals and chemical products | -0.4 |
| 24 | Manufacture of basic metals | -0.6 |
| 35 | Electricity, gas, steam and air conditioning supply | -1.1 |
| 27 | Manufacture of electrical equipment | -6.4 |

b. 6.7% increase in the PPI of the Non-Domestic Market (Table 3.II).

More specifically, the aforementioned increase was the result of the monthly changes mainly of the sub-indices in the following NACE Rev.2 divisions:

| Code | Division | Rates of change (%) |
|------|--|---------------------|
| 35 | Electricity, gas, steam and air conditioning supply | 156.0 |
| 19 | Manufacture of coke and refined petroleum products | 28.2 |
| 27 | Manufacture of electrical equipment | 2.0 |
| 24 | Manufacture of basic metals | 0.3 |
| 10 | Manufacture of food products | -0.2 |
| 14 | Manufacture of wearing apparel | -1.0 |
| 12 | Manufacture of tobacco products | -1.8 |
| 26 | Manufacture of computer, electronic and optical products | -2.2 |
| 08 | Other mining and quarrying | -4.4 |
| 07 | Minings of metal ores | -4.6 |

METHODOLOGICAL NOTES

| | |
|---|---|
| Generally | The Producer Price Index (PPI) in Industry, in its current form, has been compiled since January 2005, when it replaced the Wholesale Price Index which was compiled since 1963. The Producer Price Index (PPI) in Industry was revised with base year 2015=100.0 and the time series were adjusted accordingly. |
| Purpose of the index | The purpose of the Producer Price Index in Industry is to measure the monthly rates of change in the prices of goods that are produced in the domestic market, are sold in the domestic market, or are exported to the non-domestic market. |
| Definitions | <p>The Producer Price Index in Industry is a monthly index and it is composed by the sub-indices of the Domestic and Non-Domestic Market. The Index of the Non-Domestic Market is calculated as the composition of the Euro-zone Index and the Non-Euro-zone Index.</p> <p>The collected values for products sold in the domestic market are basic prices, i.e. prices excluding VAT and other similar deductible taxes directly linked to turnover and also, excluding duties and other taxes on products. Moreover, subsidies on products are included in the basic prices. The values collected for products sold in the non-domestic market are quoted FOB (Free on board) prices.</p> <p>The price data collected in the framework of the compilation of PPI refer mainly to transactions between the enterprises that produce and sell the surveyed products and the enterprises that buy those products, irrespectively of whether those products are to be used as raw materials or as merchandise.</p> |
| Legal framework | The compilation of PPI is governed by Council Regulation (EC) 1165/1998 concerning short-term statistics and Regulation 1158/2005 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the PPI is governed by Regulation (EC) 1893/2006 of the European Parliament and of the Council, the Commission Regulation (EC) 656/2007 and Regulation (EC) 451/2008 of the Council. |
| Reference period | Month. |
| Base year | 2015=100.0. |
| Revision | The PPI is a fixed-base index. Pursuant to the provisions of Council Regulation 1165/1998 concerning short-term statistics, the index is revised every five (5) years, with base years ending in 0 or 5. |
| Statistical classifications | At the level of branches of economic activities the statistical classification of economic activities NACE Rev.2 of EU is used (Regulation 1893/2006), while at the level of main industrial groupings, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with Commission Regulation 656/2007. At product level, the statistical classification CPA 2008 of EU is used, according to the Council Regulation 451/2008. |
| Geographical coverage | The index covers the whole of the country, with data from 48 Regional Units of the country. |
| Coverage of economic activities | The index covers all the sections of the Industry (mining and quarrying, manufacturing, electricity, natural gas and water supply), the main industrial groupings (MIGs) and all the levels of economic activities (divisions, groups, classes) and the relevant products. |
| Statistical survey | The data are collected from approximately 821 enterprises and the total number of observations (prices) amounts approximately to 2,713. More specifically, 403 products sold in the domestic market and 171 products sold in the non-domestic market were selected. Out of the 171 products sold in the non-domestic market, 141 products are sold in the euro-zone countries and 156 products are sold in the non-euro-zone countries. |
| Data collection, processing and imputation in the context of the COVID-19 pandemic | The compilation of the indicators was mainly based on data collected by the enterprises (via email, phone). When a break occurs in the flow of price data or when data are not available, the method used during the break is the so-called "carry forward" method, i.e. the repetition of the last observed price. Other options for dealing with the shortage of prices are administrative and other sources (data from the internet, from the press), as well as the application of an estimation method for the calculation of missing data using the monthly average change of other pricing sources at the product level. If an entire product index is missing, it is recommended to use the change/index of the next level up in aggregation as the basis for performing the imputation. For June 2020, there was no significant change in the price data collection compared to previous reference months. |
| Publication of data | The PPI with base year 2015=100.0 is released since March 2020, with February 2020 as the first reference month. Data with base year 2015=100.0 are available from January 2000 onwards. |
