

PRESS RELEASE

PRICE INDICES OF WORK CATEGORIES AND CONSTRUCTION COST OF NEW RESIDENTIAL BUILDINGS 3rd quarter 2020

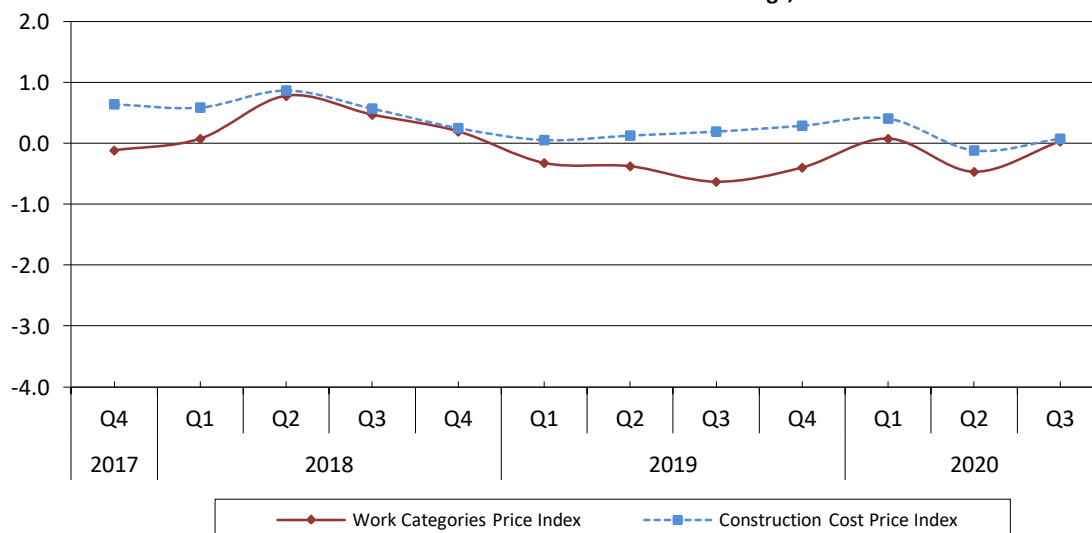

The Price Index of Work Categories in Construction of New Residential Buildings in the 3rd quarter 2020 compared with the 3rd quarter 2019 remained unchanged. The previous year the corresponding index had recorded a decrease of 0.6% (Table 1). The Price Index of Work Categories in the 3rd quarter 2020 compared with the 2nd quarter 2020 recorded an increase of 0.2%. The previous year the corresponding index had recorded a decrease of 0.3% (Table 2). The twelve-month average index, from October 2019 to September 2020, compared with the corresponding index from October 2018 to September 2019, recorded a decrease of 0.2%. The previous year the corresponding twelve-month average index had recorded a decrease of 0.3% (Table 7).

The Price Index of Construction Cost of New Residential Buildings in the 3rd quarter 2020 compared with the 3rd quarter 2019 recorded an increase of 0.1%. The previous year the corresponding index had recorded an increase of 0.2%. More specifically, the annual increase of 0.1% is due to the 0.9% increase in the Labour Cost Index as well as to the 0.4% decrease in the Material Cost Index (Tables 3, 5).

The Price Index of Construction Cost in the 3rd quarter 2020 compared with the 2nd quarter 2020 recorded an increase of 0.1%. The previous year the corresponding index had recorded a decrease of 0.1%. More specifically, the quarterly increase of 0.1% is on account of the 0.6% increase in the Labour Cost Index and the 0.1% decrease in the Material Cost Index (Tables 4, 6).

The twelve-month average index, from October 2019 to September 2020, compared with the corresponding index from October 2018 to September 2019, increased by 0.2%. The previous year the corresponding twelve-month average index had also increased by 0.2% (Table 8).

Evolution of annual rates of change (%) of Price Indices of Work Categories and Construction Cost in the Construction of New Residential Buildings, 2015=100.0

METHODOLOGICAL NOTES

Generally	The compilation of the Price Indices of Work Categories and Cost in Construction of New Residential Buildings started in 1981. The indices with base year 2015=100.0 are compiled since April 2019, when replaced the previous indices with the base year 2010.
Purpose of the indices – definitions	<p>The Price Indices of the Construction of New Residential Buildings are distinguished into:</p> <p>i) Work Categories Price Index of the Construction of New Residential Buildings (output index), which reflects the changes in the prices paid to the constructors–contractors for the different individual construction stages of new residential buildings, when ordering the construction of the works.</p> <p>ii) Cost Price Index of the Construction of New Residential Buildings (input index), which reflects the development of the costs the constructors are incurred for the construction of a standardized building (block of flats) and is calculated on the basis of the material prices and the labour remuneration paid by them. This index is compiled from two individual price indices: a) the monthly Material Cost Index for the Construction of New Residential Buildings, which reflects the changes in building material prices, and b) the quarterly Price Index of Labour Cost for the Construction of New Residential Buildings. This index records the changes in the remuneration of individual works performed during the construction of a new residential building.</p>
Legal framework	The compilation of both indices is governed by Council Regulation (EC) No 1165/98 “concerning short-term statistics” and by the Regulation No 1158/05 (that amends the above Regulation) of the European Parliament and of the Council.
Reference period	Quarter.
Base year	2015=100.0.
Revision	The Price Indices of Work Categories and Cost in Construction of New Residential are fixed base indices. Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the indices are updated every five (5) years in years ending in 0 or 5.
Statistical classification	<p>The Price Index of Work Categories follows the national classification, which includes 30 works categories aggregated in 17 groups.</p> <p>The Price Index of Construction Cost follows the national classification, which includes 24 works categories aggregated in 11 groups.</p>
Geographical coverage	The geographical coverage of the index includes the country as a whole, however prices are collected only in the biggest cities of the country (Greater Athens, Thessaloniki, Patra, Herakleion, Larisa and Volos).
Coverage of economic activities	<p>The Price Index of Work Categories covers the expenditure for materials, labour remuneration, fixed capital consumption and the profit actually paid and occurred respectively to the subcontractors-constructors, by the contractors of new residential buildings.</p> <p>The Price Index of Labour Cost covers the labour remuneration of the individual works performed, during the construction of a new residential building.</p>
Statistical survey	Technical construction companies and contractors are used as prices collection units for the indices. For the Price Index of Work Categories, a total number of 511 observations (prices) are collected and for the Price Index of Labour Cost, 420 observations (prices) are collected.
Data collection, processing and imputation in the context of the COVID-19 pandemic	The compilation of the indicators was mainly based on data collected by the enterprises (via email, phone). When a break occurs in the flow of price data or when data are not available, the method used during the break is the so-called “carry forward” method, i.e. the repetition of the last observed price. For 3 rd quarter 2020 there was no significant change in the price data collection compared to previous reference quarters.
Publication of data	The indices with the new base year 2015=100.0 are being released since April 2019, with the 1 st quarter 2019 as the first reference quarter. Time series data with base year 2015=100.0, are available from 1 st quarter 2000 onwards.
