### INDEX OF WAGES OF THE WHOLE ECONOMY:

1<sup>st</sup> quarter 2006 – 2<sup>nd</sup> quarter 2014

The Hellenic Statistical Authority (ELSTAT) presents provisional data for the 2<sup>nd</sup> quarter of 2014 for the Index of Wages for the Greek economy (primary Sector and activities of Households are not covered), with and without seasonal adjustment. The present Press Release provides also revised data for the 1st quarter of 2014 as well as data for the period 2006-2013.

The data presented for the 2<sup>nd</sup> quarter of 2014 are provisional estimates, based on the collection of a part of questionnaires of the survey conducted by the Hellenic Statistical Authority, and therefore, the data may be revised.

The unadjusted Index of wages of the 2<sup>nd</sup> quarter 2014, compared with the corresponding index of the 2<sup>nd</sup> quarter of 2013, recorded a decrease of 1.4%, while a decrease of 7.4% had been recorded when comparing the corresponding Index of 2013 with that of 2012.

It should be noted that the Index of wages presented in table 1 below is neither seasonally nor working days adjusted. This fact, in combination with the fact that the 14th salary is paid in the fourth quarter of every year and several overtime payments are paid in specific sectors of the economy during that period, should be taken into account when considering the high figures of the index systematically recorded for that specific period of time.

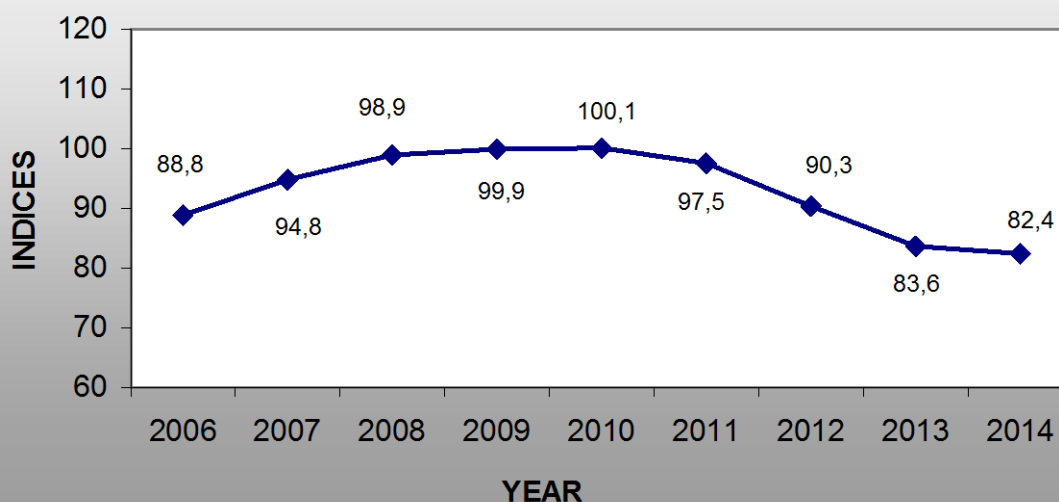

The seasonally adjusted Index of wages of the 2<sup>nd</sup> quarter 2014, recorded a decrease of 1.0% compared with the corresponding index of the 2<sup>nd</sup> quarter of 2013, while a decrease of 9.1% had been recorded when comparing the corresponding Index of 2013 with that of 2012.

It should be noted that the Index of wages presented in table 2 below is only seasonally adjusted, and not working days adjusted

Table 3 below shows the year-on-year percent change of the index for Greece and for other member states of the EU. Data are working days adjusted.

## METHODOLOGICAL NOTES

<b>General</b>	The Index of Wages in the Sectors B-S is a quarterly index with base year 2008=100,00.	
<b>Purpose of the index –</b>	The purpose of the index is to measure the wages in the branches B-S.	
<b>Definitions</b>	The Index is a Laspeyres-type chain index with base year the year 2008. It is compiled on a quarterly basis and includes the total of the gross earnings received by employees during the reference period. The Index is calculated on the basis of the gross earnings in comparison with the hours worked. Gross earnings include salaries and wages (regular payments and overtime payments), bonuses and extra extraordinary bonuses (Christmas and Easter bonuses, holiday pay and any other kind of bonuses not regularly paid), as well as payments for non working days (e.g. holidays, national holidays, maternity leave, child benefits, severance payments, etc).	
<b>Legal Framework</b>	The Index of Wages in the Sectors B-S is compiled by virtue of Regulation 450/2003 (EC) of the European Parliament and of the Council. It is also available and released by international organizations (EUROSTAT, IMF).	
<b>Reference period</b>	Quarter	
<b>Base year</b>	2008=100,00	
<b>Statistical Classification</b>	The new Eurostat classification of economic activities, NACE Rev.2, is used and the sectors, which are covered by the index, correspond to branches B-S.
