HELLENIC STATISTICAL AUTHORITY

Piraeus, 13 December 2010

PRESS RELEASE

The Import Price Index in Industry recorded a rise of 4.0% in October 2010 compared with October 2009.

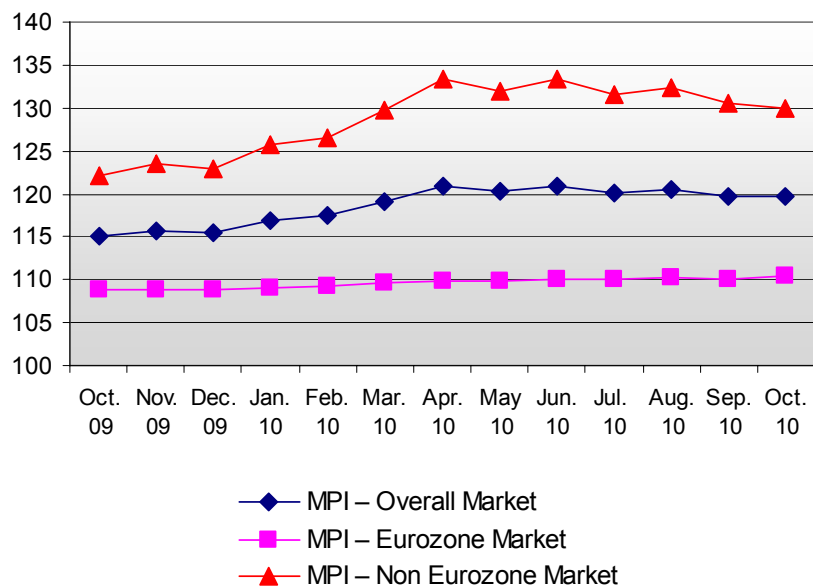

IMPORT PRICE INDEX IN INDUSTRY: October 2010

The Import Price Index in Industry (MPI) in October 2010 compared with October 2009 recorded a rise of 4.0%. The index in October 2009 had recorded a rise of 0.9% compared with October 2008 (Table 1.II).

The MPI in October 2010 compared with September 2010 remained unchanged. The index in October 2009 had recorded a rise of 0.9% compared with September 2009 (Table 1.I).

The twelve-month average index, from November 2009 to October 2010, compared with the same index of the period from November 2008 to October 2009, increased by 6.6%. The previous year the twelve-month average index had decreased by 2.8% (Table 4).

1. Monthly rates of change of October 2010 compared with September 2010.

Import prices in October 2010 remained unchanged compared with the previous month, September 2010, due to the monthly changes of the sub-indices of the market zones:

- a. The MPI of the Eurozone Market increased by 0.4% (Table 2.I).
- b. The MPI of the Non-Eurozone Market decreased by 0.4% (Table 3.I).

2. Annual rates of change of October 2010 compared with October 2009.

Import prices in October 2010 increased by 4.0% compared with the same month of the previous year, October 2009, due to the annual changes of the sub-indices of the market zones:

- a. The MPI of the Eurozone Market increased by 1.6% (Table 2.II).
- b. The MPI of the Non-Eurozone Market increased by 6.5% (Table 3.II).

Table 1: Import Price Index (MPI) in Industry – Overall Market

Base year: 2005=100.0

I) Monthly changes

Codes	Main Industrial Groups - MIGs	Weighting Coefficients	October 2010	September 2010	Change (%)	October 2009	September 2009	Change (%)
0020	Overall Market	100000	119.6	119.7	0.0	115.0	114.0	0.9
0040	Intermediate Goods	27814	117.9	117.2	0.6	114.2	113.9	0.3

METHODOLOGICAL NOTES

Generally	The Import Price Index (MPI) in Industry, in its current form, is being released since January 2005. The MPI replaced the Wholesale Price Index of Finished Products of foreign origin which was compiled since 1963.
Purpose of the index – definitions	<p>The purpose of the Import Price Index in Industry (MPI) is to measure the monthly rates of change in the prices of goods that are imported in the economic territory.</p> <p>The Import Price Index is a monthly index and it is composed by the sub-indices of the imports prices of the two market zones: the euro-zone and the non-euro-zone countries.</p> <p>The collected prices for the imported goods are CIF prices (i.e. cost, insurance, freight), excluding duties and taxes.</p> <p>The selected price data for the MPI compilation are collected from units-enterprises that import the goods. The prices refer mainly to the transactions between the resident enterprises that import products and the enterprises in the rest of the world that export products to Greece.</p>
Legal basis	The compilation of MPI is governed by Council Regulation (EEC) No.1165/98 “concerning short-term statistics” and by the Regulation No.1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the MPI is governed by the Regulation (EEC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EEC) No.656/2007 and by the Regulation (EEC) No.451/2008 of the Council.
Reference period	Month
Base year	2005=100.0.
Revision	The MPI is a fixed base index. Pursuant to the provisions of Council Regulation No.1165/98 concerning short-term statistics, the index in question is updated every five (5) years in years ending in 0 or 5.
Statistical classifications	At the level of categories of economic activities the new Eurostat classification NACE Rev.2 is used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with the Council Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 is used, according to the Council Regulation 451/2008.
Geographical coverage	The Index covers the whole of the country, with data from Attica and other 32 prefectures of the country.
Coverage of economic activities	The index covers the sections of mining-quarrying manufacturing, energy and natural gas, the main industrial groups, and all the levels of economic activities (divisions, groups, classes) and the level of products.
Statistical survey	The data are collected from approximately 1011 enterprises and the total number of observations (prices) is approximately 2524. More specifically, out of the 458 imported products that are selected, 390 products are imported from euro zone countries and 285 products are imported from non euro zone countries.
Publication of data	The MPI with the new base year (2005) has been released since March 2009, with January 2009 as first reference month. Data with base year 2005=100.0 are available from January 2000 onwards.
References	More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the EL.STAT, website (www.statistics.gr).
