Time series of the index is available on the ELSTAT website :

http://www.statistics.gr/portal/page/portal/ESYE/PAGE-themes?p_param=A0508&r_param=DKT39&y_param=TS&mytabs=0

1. Annual comparison of the turnover index

The 0.5% change in the turnover index in October 2014 compared to October 2013 is due to the following changes in the main categories of retail business.

Specialized store categories	Annual rate %
Supermarkets	3.5
Pharmaceutical products, cosmetics	1.7
Books, stationery, other goods	0.3
Automotive fuel	-0.9
Furniture, electrical equipment, household equipment	-2.9

2. Annual comparison of the volume index

The 3.7% change in the volume index in October 2014 compared to October 2013 is due to the following changes in the main categories of retail business.

Specialized store categories	Annual rate %
Supermarkets	5.7
Furniture, electrical equipment, household equipment	4.7
Pharmaceutical products, cosmetics	2.4
Automotive fuel	2.1
Books, stationery, other goods	-6.6

METHODOLOGICAL NOTES

Generally	The Retail Trade Turnover Index with the current form is being released since January 2005. The Retail Trade Turnover Index is a continuation of the Retail Sales Value Index which had been compiled during the period 1963 to 2004.
Purpose of the index – definitions	The purpose of the Retail Trade Turnover Index is to illustrate the performance of the goods and services market. Turnover comprises the total amounts invoiced by the enterprise during the reference period which correspond to the resale of goods without any further transformation. The data collected each month refers to the sales effected (both retail and wholesale) excluding VAT but including other duties and taxes on the goods.
Legal basis	The compilation of the Retail Trade Turnover Index is governed by Council Regulation (EEC) No.1165/98 "concerning short-term statistics" and by the Regulation No.1893/2006 of the European Parliament and of the Council for the implementation of the new statistical classification NACE Rev.2
Reference period	Month
Base year	2010=100.0.
Revision	Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics. The index in question is updated every five (5) years in years ending in 0 or 5. The purpose of updating the Retail Trade Turnover Index is to adapt the index to the changes in the structure of retail trade.
Statistical classification	The EU (Eurostat) NACE Rev.2 statistical classification of economic activities is used in conformity with Regulation (EC) 1893/2006 of the Council and the European Parliament.
Geographical coverage	The Index covers the whole of the country with data from 50 Prefectures.
Coverage of economic activities	The index covers division 47 of NACE Rev 2 statistical classification of economic activities.
Statistical survey	In the framework of the survey carried out for the compilation of the Retail Trade Turnover Index (2010=100.0) it was decided to include 41.801 retail trade enterprises listed in the Business Register having an annual turnover (in 2010) equal to or higher than 200.000 euro. Out of these enterprises a random sample of 1.607 enterprises was selected.
Volume Index	Since 2005 onwards the Retail Trade Volume Index is also being compiled to measure changes in the volume of retail trade.
Calculating the indices	<p>The turnover index is calculated by the chaining method. First the moving based index is calculated by comparing the estimated turnover value for the current month with the corresponding value of the previous month. Afterwards the fixed-based index for the current month is calculated by multiplying the moving-based index by the fix-based index of the previous month.</p> <p>The indices are reduced to a typical month of equal duration. To this end the turnover estimates are multiplied by a suitable correction factor that is calculated by deviding the mean monthly number of working days in the given year by the number of the regular working days in the month under consideration.</p> <p>The Retail Trade Volume Index is calculated by deflating the Retail Trade Turnover Index using the Consumer Price Index (CPI) as deflator.</p>
Compiled index series	Since the revision of the Retail Trade Turnover and Volume Indices due to the implementation of the new classification NACE Rev 2. parallel time series for the indices including and not including fuels are provided.
Publication of data	The time series of Retail Trade Turnover and Volume Indices (2010=100.0) which include fuel have being published since 2000 by categories of aggregated economic activity classes*.
References	More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the ELSTAT website (www.statistics.gr)

*Categories of aggregated economic activity classes in the Turnover Index:

Super-markets

Non-specialised stores with food, beverages or tobacco predominating

Department stores

Other retail sale in non-specialised stores

Food-beverages-tobacco

Food, beverages and tobacco, fruit and vegetables, meat products, fish, crustaceans and molluscs, bread, cakes, flour confectionery and sugar confectionery, beverages, tobacco products, other retail sale of food in specialised stores

Automotive fuel

Automotive fuel in specialised stores

Pharmaceutical products, Cosmetics

Dispensing chemist, medical and orthopaedic goods, cosmetic and toilet articles in specialised stores

Clothing and footwear

Textiles, clothing, footwear and leather goods in specialised stores

Furniture, electrical equipment, household equipment

Furniture, lighting equipment, audio and video equipment, hardware, paints and glass, electrical household appliances, and other household articles, music and video recordings in specialised stores

Books, stationery, other goods

Books, newspapers and stationery, computers, peripheral units and software, telecommunications equipment, carpets, rugs, wall and floor coverings, sporting equipment, games and toys, flowers, plants, seeds, fertilisers, pet animals and pet food, watches and jewellery, other retail sale of new goods in specialised stores

Retail sale not in stores

Retail sale via mail order houses, via Internet, via stalls and markets of other goods and other retail sale not in stores, stalls or markets
