

Ms Christine PIERRAKOU

Head of the Coordination and Programming Section, ELSTAT, Greece

Christine Pierrakou is a graduate of University of Piraeus in Statistics and Insurance Science, and holder of Master degree in Applied Mathematics, National Technical University of Athens (NTUA).

She has been working as Statistician at Hellenic Statistical Authority (ELSTAT) for more than 10 years. Her current position is Head of the Coordination and Programming Section. This Section is responsible for the programming and monitoring of the progress of the statistical surveys/works of ELSTAT, in order for ELSTAT to meet its European and national obligations, both in terms of timeliness and high quality. Furthermore, it deals with matters pertaining to the compliance of the ELSS agencies with the CoP principles and the assessment of their statistics for certification.

She is a member of the Task Force of Big Data and Project Manager of ELSTAT in the ESSnet Big Data project concerning the Work Packages AIS data and Web Scraping Job Vacancies respectively.

She is, also, a member of the Working Group on Quality in Statistics and of the Steering Committee Qual, which have a consultative role about quality components of the European Statistical System (ESS).

She has been teaching an introduction course in statistic at the National Center of Public Administration & Local Government for three years. She co-authored the book, Statistical Analysis in Medical Data (with J. Apostolakis and A. Kastania), Papazisis Publ., Athens 2003. Additionally, she has published research articles in professional journals.
