PRESS RELEASE

PRODUCER PRICE INDEX IN INDUSTRY: January 2012

The Producer Price Index in Industry (PPI) in January 2012 compared with January 2011 recorded a rise of 7.5%. The index in January 2011 had recorded an increase of 7.3% compared with January 2010 (Table 1.II).

The PPI in January 2012 compared with December 2011 recorded a rise of 2.7%. The index in January 2011 had recorded an increase of 0.9% compared with December 2010 (Table 1.I).

The twelve-month average index, from February 2011 to January 2012, compared with the same index of the period from February 2010 to January 2011, increased by 7.7%. The previous year the twelve-month average index had increased by 6.8% (Table 6).

Evolution of annual rates of change of Producer Price Index (PPI) in Industry for Overall, Domestic and Non-Domestic Market

1. Monthly rates of change of January 2012 compared with December 2011.

Prices in total industry in January 2012 increased by 2.7% compared with the previous month, December 2011, due to the monthly changes of the sub-indices of the markets:

- a. The PPI of the Domestic Market grew by 2.8% (Table 2.I).
- b. The PPI of the Non-Domestic Market grew by 2.2 (Table 3.I).

2. Annual rates of change of January 2012 compared with January 2011.

Prices in total industry in January 2012 increased by 7.5% compared with the same month of the previous year, January 2011, due to the annual changes of the sub-indices of the markets:

- a. The PPI of the Domestic Market grew by 7.7% (Table 2.II).
- b. The PPI of the Non-Domestic Market grew by 6.9% (Table 3.II).

METHODOLOGICAL NOTES

Generally	The Producer Price Index (PPI) in Industry, in its current form, is being released since January 2005. The PPI replaced the Wholesale Price Index which was compiled since 1963.
Purpose of the index – definitions	<p>The purpose of the Producer Price Index in Industry (PPI) is to measure the monthly rates of change in the prices of goods that are produced in the domestic market and are sold in this market or are exported to the non-domestic market.</p> <p>The Producer Price Index is a monthly index and it is composed by the sub-indices of the domestic and non-domestic market. The index of the non-domestic market is also sub-divided into the two market zones: the euro-zone and the non-euro-zone index.</p> <p>The collected prices for products sold in the domestic market are basic prices, i.e. prices excluding VAT and other similar deductible taxes directly linked to turnover and also, excluding duties and other taxes on products. Moreover, subsidies on products are included in the basic prices. The prices collected for products sold in the non-domestic market are quoted FOB (Free on board).</p> <p>The price data collected in the framework of the compilation of PPI refer mainly to transactions between the enterprises that produce and sell the selected products for reporting and the enterprises that buy those products, irrespective of whether those products are to be used as raw materials or as merchandise.</p>
Legal basis	The compilation of PPI is governed by Council Regulation (EEC) No.1165/98 “concerning short-term statistics” and by Regulation No.1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the PPI is governed by Regulation (EEC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EEC) No.656/2007 and by Regulation (EEC) No.451/2008 of the Council.
Reference period	Month
Base year	2005=100.0.
Revision	The PPI is a fixed base index. Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is updated every five (5) years in years ending in 0 or 5.
Statistical classifications	At the level of categories of economic activities the new Eurostat classification NACE Rev. 2 was used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with the Commission Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 was used, according to the Council Regulation 451/2008.
Geographical coverage	The Index covers the whole of the country, with data from 44 prefectures.
Coverage of economic activities	The index covers all the sections of industry, the main industrial groups, all the levels of economic activities (divisions, groups, classes) and the level of products.
Statistical survey	The data are collected from approximately 1.500 enterprises and the total number of observations (prices) is approximately 3.280. More specifically 398 products sold in the domestic market and 172 products sold in the non-domestic market were selected. Out of the 172 products sold in the non-domestic market, 145 products are sold in the euro-zone countries and 155 products are sold in the non-euro-zone countries.
Publication of data	The PPI with the new base year (2005) is being released since February 2009, with January 2009 as first reference month. Data with base year 2005=100.0 are available from January 2000 onwards.
References	More information on the methodology concerning the compilation and calculation of the index as well as the time series is available on the EL.STAT. : http://www.statistics.gr/portal/page/portal/ESYE/PAGE-themes?p_param=A0503
