

Piraeus, 29 December 2009

# PRESS RELEASE

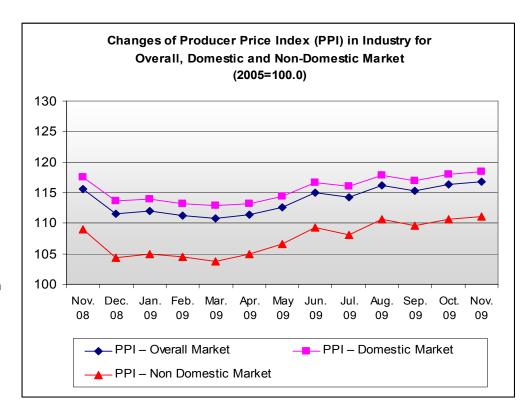

The Producer Price Index in Industry recorded a rise of 1,0% in November 2009 as compared to November 2008.

### PRODUCER PRICE INDEX IN INDUSTRY: November 2009

The Producer Price Index in Industry (PPI) in November 2009 as compared to November 2008 recorded a rise of 1.0%. A year earlier, the PPI decreased by 0.3%.

The PPI in November 2009 as compared to October 2009 recorded a rise of 0.4%. A year earlier the PPI decreased by 4.1%.

In the twelve-month period December 2008 – November 2009, the annual average rate of change of the PPI decreased by 6.5%. A year earlier the annual average rate of change of the PPI increased by 10.4%.

### 1. Monthly rates of change of November 2009 compared to October 2009.

Prices in total industry in November 2009, as compared to the previous month October 2009, increased by 0.4% due to the monthly changes of the sub-indices of the markets:

- a. The PPI for the Domestic Market grew by 0.4% (Table 2.I).
- b. The PPI for the Non-Domestic Market grew by 0.5% (Table 3.I).

### 2. Annual rates of change of November 2009 compared to November 2008.

Prices in total industry in November 2009, as compared to the same month of the previous year November 2008, increased by 1.0% due to the annual changes of the sub-indices of the markets:

- a. The PPI for the Domestic Market grew by 0.8% (Table 2.II).
- b. The PPI for the Non-Domestic Market grew by 2.0% (Table 3.II).

<sup>2.</sup> Percentage changes are calculated on the basis of the indices with five decimal figures and are rounded up to one decimal figure when published

#### **EXPLANATORY NOTES**

#### Generally

The Producer Price Index (PPI) in Industry with the current form is released from January 2005. The PPI replaced the previous compiled (from 1963) Wholesale Price Index.

# Purpose of the index – definitions

The purpose of the Producer Price Index in Industry (PPI) is to measure the monthly rates of change in the prices of goods that are produced in the domestic market and are sold in this market or are exported to the non-domestic market.

The Producer Price Index is a monthly index and is composed by the sub-indices of the domestic and non-domestic market. The index of the non-domestic market is also distinguished to the two market zones – the euro-zone and the non-euro-zone index.

The collected prices for products sold in the domestic market are basic prices, i.e. prices excluding VAT and other similar deductible taxes directly linked to turnover and also, excluding duties and other taxes on products. Moreover, subsidies on products are included in basic prices. The prices collected for products sold to the non-domestic market are quoted FOB (Free on board).

The price data collected for the purpose of compilation of PPI refer chiefly to transactions between the enterprises that produce and sell the selected products for reporting and the enterprises that buy those products, irrespective of whether those products are to be used as raw materials or as merchandise.

#### Legal basis

The compilation of PPI is governed by Council Regulation (EEC) No.1165/98 "concerning short-term statistics" and by the Regulation No.1158/05 (that amends the above Regulation) of the European Parliament and of the Council. Furthermore, the PPI is governed by the Regulation (EEC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EEC) No.656/2007 and by the Regulation (EEC) No.451/2008 of the Council.

#### Reference period

Month

#### Base year

2005=100.0.

#### Revision

The PPI is a fixed base index. Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is updated every five (5) years in years ending in 0 or 5.

# Statistical classifications

At the level of categories of economic activities the new Eurostat classification NACE Rev. 2 was used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev. 2 headings to categories of aggregate classification was used, in accordance with the Council Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 was used, according to the Council Regulation 451/2008.

# Geographical coverage

The Index covers the whole country, with data from 44 prefectures.

# Coverage of economic activities

The index covers all the sections of industry, the main industrial groups, all the levels of economic activities (divisions, groups, classes) and the level of products.

#### Statistical survey

The data are collected from approximately 1,500 enterprises and the total number of observations (prices) is approximately 3,280. To be more specific, 398 products sold in the domestic market and 172 products sold in the non-domestic market were selected. Of the 172 products sold in the non-domestic market, 145 are sold in the euro-zone countries and 155 in the non-euro-zone countries.

#### **Publication of data**

The PPI with the new base year (2005) is released from February 2009 with January 2009 as first reference month. The availability of data with base year 2005=100.0 starts from January 2000.

More information about the methodology for the compilation and calculation of the index and for the time series is available in the NSSG website (www.statistics.gr) .
