Piraeus, 14 February 2017

PRESS RELEASE

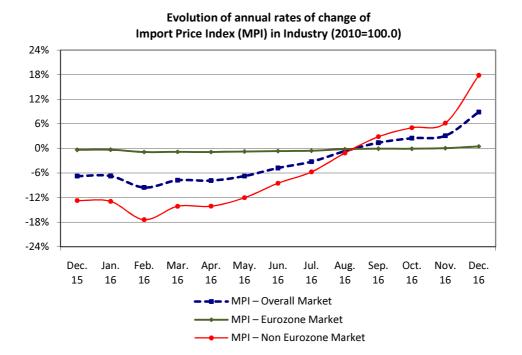

IMPORT PRICE INDEX IN INDUSTRY: December 2016, y-o-y increase by 8.9%

The Import Price Index in Industry (MPI) with base year 2010=100.0 in December 2016 compared with December 2015 recorded an increase of 8.9%. The index in December 2015 had recorded a decrease of 6.8% compared with December 2014 (Table 1.II).

The MPI in December 2016 compared with November 2016 recorded an increase of 2.7%. The index in December 2015 had recorded a decrease of 2.7% compared with November 2015 (Table 1.I).

The twelve-month average index, from January 2016 to December 2016, compared with the same index of the period from January 2015 to December 2015, decreased by 2.8%. The previous year the twelve-month average index had decreased by 10.5% (Table 4).

The time series of MPI are available on the website of ELSTAT: http://www.statistics.gr/en/statistics/-/publication/DKT18/-

1. Monthly rates of change of December 2016 compared with November 2016.

Import Prices in December 2016 increased by 2.7% compared with the previous month, November 2016, due to the monthly changes of the sub-indices of the markets zones:

- a. The MPI of the Eurozone Market increased by 0.2% (Table 2.I).
- b. The MPI of the Non-Eurozone Market increased by 5.1% (Table 3.I).

2. Annual rates of change of December 2016 compared with December 2015.

Import prices in December 2016 increased by 8.9% compared with the same month of the previous year, December 2015, due to the annual changes of the sub-indices of the markets zones:

- a. The MPI of the Eurozone Market increased by 0.5% (Table 2.II).
- b. The MPI of the Non-Eurozone Market increased by 17.8% (Table 3.II).

METHODOLOGICAL NOTES

Generally

The Import Price Index (MPI) in Industry in its current form, compiled since January 2005, when it replaced the Final Products Wholesale Price Index with Foreign Final products from abroad. The Import Price Index (MPI) in Industry was revised with base year 2010=100.0 and the time series were revised accordingly.

Purpose of the index – definitions

The purpose of the Import Price Index in Industry (MPI) is to measure the monthly rates of imported price changes of products in mining sectors-mining, processing and energy in the economic territory.

The Import Price Index is a monthly index and it is composed by the sub-indices of the imports prices of the two market zones: the euro-zone and the non-euro-zone countries depending on the distinction of countries of origin of imports

The collected prices of imported products are CIF (Cost Insurance Freight) prices at the Greek border, free of all taxes and duties payable by the import enterprises. This means that they include the product transport (freight) and insurance costs incurred by the enterprise for their importation.

The selected price data for the MPI compilation are collected from units-enterprises that import the goods. The prices refer mainly to the transactions between the resident enterprises that import products and the enterprises established abroad which act as exporters of products in Greece.

Legal basis

The compilation of MPI is governed by Council Regulation (EC) No.1165/98 "concerning short-term statistics" and by the Regulation No.1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the MPI is governed by the Regulation (EC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EC) No.656/2007 and by the Regulation (EC) No.451/2008 of the Council.

Reference period

Month

Base year

2010=100.0.

Revision

The MPI is a fixed base index. The revision of the index with the new base year 2010 = 100.0 covering in the context of the application of Council Regulation (EC) No 1165/98, according to which the short-term statistics indicators are reviewed every five (5) years, with base year ending in 0 or 5.

Statistical classifications

At the level of categories of economic activities the new Eurostat classification NACE Rev.2 is used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with the Council Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 is used, according to the Council Regulation 451/2008.

Geographical coverage

The Index covers the whole of the country, with data from Attica and other 32 prefectures of the country.

Coverage of economic activities

The index covers the sections of mining-querying manufacturing, energy and natural gas, the main industrial groups, and all the levels of economic activities (divisions, groups, classes) and the level of imported products.

Statistical survey

The data are collected from approximately 1,350 enterprises and the total number of observations (prices) is approximately 2,408. More specifically, selected to be monitoring 329 product codes, derived from euro-zone countries (with 13 refer as new products), and 275 product codes, that originate from Non-euro-zone countries (with 34 refer as new products).

Publication of data

The MPI with the new base year 2010=100.0 has been released since September 2013, with July 2013 as first reference month. Data with base year 2010=100.0 are available from 2000 onwards.
