

PRESS RELEASE

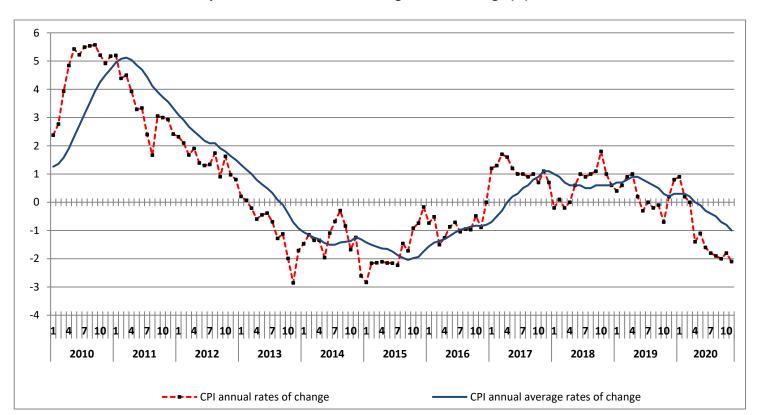

CONSUMER PRICE INDEX: November 2020, annual inflation -2.1%

The evolution of the Consumer Price Index (CPI) of November 2020 (reference year 2009=100.0) is depicted as follows:

The CPI in November 2020 compared with November 2019, decreased by 2.1%. In November 2019, the annual rate of change of the CPI was 0.2% (Table 2).

The CPI in November 2020 compared with October 2020, decreased by 0.9%. In November 2019, the monthly rate of change of the CPI was -0.6% (Table 1).

The average CPI for the twelve - month period from December 2019 to November 2020, compared with the corresponding index for the period December 2018 to November 2019 decreased by 1.0%. The annual rate of change of the average CPI between the twelve - month period December 2018 to November 2019 in comparison to the period December 2017 to November 2018 was 0.2% (Table 3).

Analysis of changes of the CPI: November 2020

I. Monthly rates of change: November 2020 compared with October 2020 (Tables 1, 4)

The 0.9% decrease of the Overall CPI in November 2020, compared with the corresponding index in October 2020 is, mainly, due to the changes in the groups of goods and services as follows:

1. A decrease of:

- 12.4% in the group Clothing and footwear, due to the 10-day period of winter sales.
- 1.3% in the group <u>Household equipment</u>, due to the 10-day period of winter sales.
- 0.3% in the group <u>Hotel-Cafés-Restaurants</u>, due to the decrease, mainly, in the prices of *hotels-motels-inns*.
- 0.8% in the group <u>Miscellaneous goods and services</u>, due to the decrease, mainly, in the prices of *other appliances and articles for personal care*.

2. An inrease of:

- 0.3% in the group <u>Food and non-alcoholic beverages</u> due to the increase, mainly, in the prices of: *poultry, olive oil, fresh vegetables.*This increase was partly offset by the decrease, mainly, in the prices of *fresh fruits*.
- 0.2% in the group <u>Housing</u>, due to the increase, mainly, in the prices of *natural gas*.
- 0.1% in the group <u>Transport</u>, due to the increase, mainly, in the prices of *tickets for passenger transport by air*. This increase was partly offset by the decrease, mainly, in the prices of *petrol*.

II. Annual rates of change: November 2020 compared with November 2019 (Tables 2, 5)

The 2.1% decrease of the Overall CPI in November 2020, compared with the corresponding index in November 2019 is, mainly, due to the changes in the groups of goods and services as follows:

1. A decrease of:

- 0.3% in the group Alcoholic beverages and tobacco, due to the decrease, mainly, in the prices of wines.
- 3.6% in the group <u>Clothing and footwear</u>, due to the decrease in the prices of clothing and footwear.
- 4.4% in the group Housing, due to the decrease, mainly, in the prices of: natural gas, heating oil, electricity, solid fuels.
- 2.7% in the group <u>Household equipment</u>, due to the decrease, mainly, in the prices of *household textiles, household appliances and repair, glassware-tableware and household utensils, non durable household articles.*
- 1.1% in the group <u>Health</u>, due to the decrease, mainly, in the prices of *pharmaceutical products*. This decrease was partly offset by the increase, mainly, in the prices of *medical, dental and paramedical services*.
- 6.9% in the group <u>Transport</u>, due to the decrease, mainly, in the prices of: *fuels and lubricants, tickets for passenger transport by air, tickets for passenger transport by railway, tickets of passenger transport by road, tickets of combined passenger transport. This decrease was partly offset by the increase, mainly, in the prices of <i>new motorcars*.
- 2.4% in the group <u>Communication</u>, due to the decrease, mainly, in the prices of *telephone services*.
- 1.0% in the group <u>Recreation and culture</u>, due to the decrease, mainly, in the prices of: *audiovisual and information processing equipment, small recreational items-flowers-pets*.
- 0.5% in the group <u>Hotel-Cafés-Restaurants</u>, due to the decrease, mainly, in the prices of *hotels-motels-inns*. This decrease was partly offset by the increase, mainly, in the prices of *restaurants-confectioneries-cafés-buffets*.
- 2.7% in the group Miscellaneous goods and services, due to the decrease, mainly, in the prices of other appliances and articles for personal care.

2. An increase of:

• 1.9% in the group Food and non-alcoholic beverages due to the increase, mainly, in the prices of: bread and cereals, pork, fresh fish, fresh whole milk, cheese, other edible oils, fresh fruits, fresh vegetables, preserved or processed vegetables. This increase was partly offset by the decrease, mainly, in the prices of: poultry, olive oil, potatoes, soft drinks.

METHODOLOGICAL NOTES

Generally

The Consumer Price Index (CPI) is compiled by the Hellenic Statistical Authority (ELSTAT) since 1959. Until the year 2000, the CPI referred to the urban areas of the Country, while from 2001 onwards it refers to the whole Country covering urban, semi-urban and rural areas.

Purpose of the index

The purpose of the CPI is to measure the general level of prices of goods and services purchased by the average Greek household.

Legal basis Law 3832/2010.

Reference period Month.

Base December of the previous year.

Reference year 2009=100.0.

Chain linking Index

The CPI index follows the chain linking method, introducing new weights annually and having as a base the December of the previous year. The weights are estimated on the basis of the most recent available data of the Household Budget Survey (HBS), extrapolated to the prices of December. The CPI, adjusted on an annual basis to the most recent consumption expenditure pattern of the private households of the Country, ensures the representativeness of goods and services, which compose the "basket" of purchases of the average household.

Geographical and population coverage of the CPI

The CPI refers to the whole Country and covers the resident households of the territory excluding collective households (hospitals, homes for the elderly, boarding houses, prisons, etc.) and non-resident households (tourists) in the Country.

Classification of items

The classification of the CPI items (goods and services) is based on the international classification COICOP (Classification of Individual Consumption by Purpose) as this has been adapted to the needs of the HICPs of the EU Member States with the COICOP5/HICP classification.

Weights of items

The weights of CPI items are updated every year, on the basis of the most recent available data of HBS. The weights are calculated as the share (‰) of the expenditures for each group, subgroup and item (good or service) to the total household expenditure of the average household.

Price collection Cities

The CPI prices are collected in 27 cities with representative markets for the coverage of the 13 Regions of the Country. The selection criteria of the price collection cities are the size and the particularities of their markets, the possibility of continuous price collection, the comparability of the index and the cost of price collection.

Population weights

The calculation of the population weights by regions is based on the population data of the 2011 General Population Census and the expenditure data of the latest available HBS by regions.

Selection of items

The composition of the "household basket" i.e. the selection of goods and services which are included in the calculation of CPI is updated annually, using the results of the latest available HBS, other market research, etc. The chain linking methodology allows the change of items of the household basket on an annual basis, in order to ensure the representativeness of the items involved in the calculation of groups and subgroups of CPI.

Price collection-Outlets

The prices collection outlets are retail stores, enterprises providing services, street markets etc. which are considered representative of the branches of shops, where the households make their purchases in the 27 selected cities. The methodology allows the renewal of price collection sources, annually, in order to maintain their representativeness in the calculation of CPI. Prices are collected by employees of ELSTAT as well as by external price collectors, hired on a temporary basis. They pay a visit to the selected outlets within a specific time period of a month (monthly prices) or on a specific day of the week (weekly prices). The collected prices correspond to the prices actually faced by the consumer.

Specification-Substitution of items All the collected items are defined by the specification, that is the particular characteristics which determine the quality, the trade show and the identity, in general, of good products (such as brand, weight, package etc), in order to avoid any price variations attributable to differences in the specification. Once a specified item (good or service) is no longer available in the market or has ceased to be important, as regards consumption, it is substituted by a newly specified item, which has taken its place in the market.

Calculation of the Consumer Price Index

The Consumer Price Index is a Laspeyres-type index and it is calculated based on December of the previous year.

Implementation of formula in five-digit level of COICOP5

Specifically, if the five-digit item h includes q price collected items, then its index in month t of year T, $R_h^{t,T}$, is given by the following formula:

$$R_{h}^{t,T} = R_{h}^{12,T-1} \left[\frac{\sum_{i=1}^{q} w_{i}^{T} R_{i}^{t,T} / R_{i}^{12,T-1}}{\sum_{i=1}^{q} w_{i}^{T}} \right],$$

where:

 $R_{\rm h}^{12,T-1}$ = the index of the five-digit item h, in December of year T-1.

 $\mathbf{W}_{i}^{\mathrm{T}}$ = the weight of the price collected item I, in year T.

 $\mathbf{R}^{t,T}$ = the index of the price collected item I, in month t of year T.

 $R_{\rm i}^{12,T-1}$ = the index of the price collected item I, in December of year T-1.

A similar methodology is followed for the calculation of indices in the upper levels (two-digit, three-digit and four-digit) of COICOP5 and the calculation of the overall CPI as well.

Publication of data

The published CPI time series (reference year 2009=100.0), covers the period from January 1959 onwards. The CPI data are released each month as scheduled, in accordance with the Press Releases Calendar of ELSTAT, with the Press Release and the tables.

References

Further information concerning the methodology and the compilation of the CPI is available in the Methodological Publication CPI (2009=100.0) and the Single Integrated Metadata Structure (SIMS).
