

PRESS RELEASE

MATERIAL COSTS INDEX IN THE CONSTRUCTION OF NEW RESIDENTIAL BUILDINGS: June 2022, y-o-y change 11.6%

The Overall Material Costs Index in the Construction (CSTM) of New Residential Buildings with base year 2015=100.0 in June 2022 recorded an increase of 11.6% in comparison with June 2021. The corresponding index in June 2021 had recorded an increase of 3.7% compared with June 2020 (Table 1).

The Overall Index in June 2022, compared with the corresponding index in May 2022, recorded an increase of 0.6%. The index had recorded an increase of 0.5% between June 2021 and May 2021 (Table 2).

The average Index for the twelve-month period from July 2021 to June 2022, compared with the corresponding index for the twelve-month period from July 2020 to June 2021, recorded an increase of 7.9%. The comparison of the twelve-month average Material Costs Index in the corresponding previous twelve-month periods had recorded an increase of 0.7% (Table 3).

The time series of CSTM is available on the website of the Hellenic Statistical Authority (ELSTAT), at:
<http://www.statistics.gr/en/statistics/-/publication/DKT60/->

Evolution of annual rates of change (%) of the Material Costs Index in the Construction of New Residential Buildings (2015=100.0)

Annual rates of change: June 2022 compared with June 2021

The Overall Material Costs Index in the Construction of New Residential Buildings in June 2022, compared with the corresponding index in June 2021 recorded an increase of 11.6% (Table 1). The main changes in the individual costs indices of the material categories are as follows:

Material categories	Rates of change %
Electric energy	70.4
Diesel fuel	46.5
Bricks	23.5
Cupreous Pipes	17.5
Steel reinforcing rods	16.9
Parquet flooring	14.2
Plastic tubes	13.0
Builders' timber	11.6
Wall cupboards	10.7
Ready-mixed concrete	10.5
Safety glass	10.4
Cupboards	9.4
Plastic pipes	9.3
Cement	9.2
Aluminium door and window frames	8.9
Internal doors	8.9
Windows	8.8
Marble slabs	8.1
Copper pipes	7.5
Emulsion paints	7.0
Floor and wall tiles generally	6.4

Monthly rates of change: June 2022 compared with May 2022

The Overall Material Costs Index in the Construction of New Residential Buildings in June 2022 recorded an increase of 0.6% in comparison with the corresponding index in May 2022 (Table 2). The main changes in the individual costs indices of the material categories are as follows:

Material categories	Rates of change %
Diesel fuel	8.4
Cement	1.6
Marble slabs	1.6
Parquet flooring	1.6
Bricks	1.5
Ready-mixed concrete	1.3
Steel reinforcing rods	0.2
Electric energy	-5.4

Table 1: Annual rates of change of the Material Costs Index in the Construction of New Residential Buildings

S/N	Material groups	Weighting coefficient	Base year: 2015=100.0				Rates of change (%)	
			2022	June 2021	2020		2022/2021	2021/2020
	Overall Index	100.00	114.5	102.6	99.0		11.6	3.7
1	Cement, mortars and ready mixed concrete	16.25	108.8	99.2	98.7		9.8	0.4
2	Natural stone	1.76	108.0	100.0	99.5		8.0	0.5
3	Marble products, granites	4.02	110.7	101.7	100.2		8.9	1.5
4	Artificial stone	5.18	124.1	103.6	100.4		19.8	3.2
5	Timber and builders' carpentry	14.33	108.6	98.4	97.3		10.4	1.1

METHODOLOGICAL NOTES

Generally	The compilation of the Material Costs Index in the Construction of New Residential Buildings started in 1971. The index with base year 2015 is compiled since April 2019, when it replaced the previous index with base year 2010.
Purpose of the index – definitions	<p>The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and consumed in the construction of new residential buildings.</p> <p>The Material Costs Index is a monthly index and consists a sub-index of the Overall Costs Index in Construction of New Residential Buildings.</p> <p>For the compilation of the index the prices of the materials supplied, which are actually paid by the construction enterprises at the site, are collected and do not include VAT and other deductible taxes.</p>
Legal framework	The compilation of the Material Costs Index is governed by Council Regulation (EC) No 1165/1998 concerning short-term statistics and by Regulation No 1158/2005 of the European Parliament and of the Council (amending the above mentioned Regulation). Furthermore, this index is governed by Regulation (EU) No 2019/2152 of the European Parliament and of the Council on European business statistics, as well as Commission Implementing Regulation (EU) No 2020/1197 laying down technical specifications and arrangements pursuant to Regulation (EU) No 2019/2152.
Reference period	Month.
Base year	2015=100.0.
Revision	The Material Costs Index is a fixed base index. After the last revision, the index is calculated with base year 2015=100.0. Pursuant to the provisions of Council Regulation No 1165/1998 concerning short-term statistics, the index is revised every five (5) years, in years ending in 0 or 5.
Statistical classification	A national classification is followed, which includes 91 categories of materials, aggregated in 15 groups.
Geographical coverage	The geographical coverage of the index includes the country as a whole however prices are collected only in the biggest urban centers of the country (Greater Athens, Thessaloniki, Patra, Herakleio, Larisa and Volos).
Coverage of economic activities	The Material Costs Index in Construction of New Residential Buildings is a construction costs index (input index) and covers the transactions for the acquisition of building materials of the new residential buildings construction sector from the units / enterprises that provide these materials.
Statistical survey	A total number of 1,512 observations (prices) collected from 280 commercial or industrial enterprises supplying building materials are used for the compilation of the index. For electricity, prices are collected from the Public Power Corporation, while for water, data are provided by water supply companies.
Publication of data	The index with the new base year 2015=100.0 is released since April 2019, with March 2019 as the first reference month. Times series data with base year 2015=100.0 are available from January 2000 onwards.
References	More information about the methodology concerning the compilation and calculation of the index and for the time series is available on the website of the Hellenic Statistical Authority (ELSTAT) (http://www.statistics.gr/en/statistics/-/publication/DKT60/-).
