¹ The Import Price Index (MPI) in Industry is released from March 2009 with base year 2005=100.0 and January 2009 as first reference month. The purpose of the MPI is to measure the monthly rates of change in the prices of goods that are imported in the economic territory from the euro-zone countries and the non-euro-zone countries. The MPI index is split up to partial indices of Eurozone and non-Eurozone, according to the country of consignment of the imported goods, forming two groups of Eurozone and non-Eurozone markets.

² The base year 2005=100.0, is done in the framework of the Short –Term Statistics (STS) Council Regulation (EC) No 1165/98 concerning short-term statistics. According to this Regulation the index in question is updated every five years, in years ending in 0 or 5. At this revision has been applied (Council Regulation 1893/2006) the new Eurostat classification NACE Rev. 2 (at the level of categories of economic activity). In addition, at product level has been applied the new Eurostat classification CPA 2008 (Council Regulation 451/2008).

The National Statistical Service of Greece availability of data of MPI with base year 2005=100.0 starts from January 2000 whiles the distinguished series of Eurozone and non-Eurozone, complying with the above Regulation, starts from January 2004 onwards.
