1. Monthly rates of change of August 2013 compared with July 2013.

Import Prices in August 2013 decreased by 0.1% compared with the previous month, July 2013, due to the monthly changes of the sub-indices of the markets zones:

- a. The MPI of the Eurozone Market increased by 0.1% (Table 2.I).
- b. The MPI of the Non-Eurozone Market decreased by 0.3% (Table 3.I).

2. Annual rates of change of August 2013 compared with August 2012.

Import prices in August 2013 decreased by 4.4% compared with the same month of the previous year, August 2012, due to the annual changes of the sub-indices of the markets zones:

- a. The MPI of the Eurozone Market decreased by 0.6% (Table 2.II).
- b. The MPI of the Non-Eurozone Market decreased by 8.0% (Table 3.II).

METHODOLOGICAL NOTES

Generally The Import Price Index (MPI) in Industry in its current form, compiled since January 2005, when it replaced the Final Products Wholesale Price Index with Foreign Final products from abroad. The Import Price Index (MPI) in Industry recently reviewed with base year 2010=100.0, where the new indices replace the previous time series.

Purpose of the index – definitions The purpose of the Import Price Index in Industry (MPI) is to measure the monthly rates of imported price changes of products in mining sectors-mining, processing and energy in the economic territory.

The Import Price Index is a monthly index and it is composed by the sub-indices of the imports prices of the two market zones: the euro-zone and the non-euro-zone countries depending on the distinction of countries of origin of imports

The collected prices of imported products are CIF (Cost Insurance Freight) prices at the Greek border, free of all taxes and duties payable by the import enterprises. This means that they include the product transport (freight) and insurance costs incurred by the enterprise for their importation.

The selected price data for the MPI compilation are collected from units-enterprises that import the goods. The prices refer mainly to the transactions between the resident enterprises that import products and the enterprises established abroad which act as exporters of products in Greece.

Legal basis The compilation of MPI is governed by Council Regulation (EEC) No.1165/98 “concerning short-term statistics” and by the Regulation No.1158/05 (amending the above mentioned Regulation) of the European Parliament and of the Council. Furthermore, the MPI is governed by the Regulation (EEC) No.1893/2006 of the European Parliament and of the Council, by the Commission Regulation (EEC) No.656/2007 and by the Regulation (EEC) No.451/2008 of the Council.

Reference period Month

Base year 2010=100.0.

Revision The MPI is a fixed base index. The revision of the index with the new base year 2010 = 100.0 covering in the context of the application of Council Regulation (EC) No 1165/98, according to which the short-term statistics indicators are reviewed every five (5) years, with base year ending in 0 or 5.

Statistical classifications At the level of categories of economic activities the new Eurostat classification NACE Rev.2 is used (Regulation 1893/2006), while at the level of main industrial groups, the allocation of two-digit and three-digit NACE Rev.2 headings to categories of aggregate classification is used, in accordance with the Council Regulation 656/2007. At product level, the new Eurostat classification CPA 2008 is used, according to the Council Regulation 451/2008.

Geographical coverage The Index covers the whole of the country, with data from Attica and other 32 prefectures of the country.

Coverage of economic activities The index covers the sections of mining-quarrying manufacturing, energy and natural gas, the main industrial groups, and all the levels of economic activities (divisions, groups, classes) and the level of imported products.

Statistical survey The data are collected from approximately 1350 enterprises and the total number of observations (prices) is approximately 2408. More specifically, selected to be monitoring 329 product codes, derived from euro-zone countries (with 13 refer as new products), and 275 product codes, that originate from Non-euro-zone countries (with 34 refer as new products).

Publication of data The MPI with the new base year 2010=100.0 has been released since September 2013, with July 2013 as first reference month. Data with base year 2010=100.0 are available from 2000 onwards.
