OF GREECE**

Piraeus, 22 February 2010

PRESS RELEASE

The Material Costs Index in Construction of New Residential Buildings recorded a rise of 1.5% in January 2010 as compared to January 2009.

MATERIAL COSTS INDEX IN CONSTRUCTION OF NEW RESIDENTIAL BUILDINGS: January 2010

The Material Costs Index in Construction of New Residential Buildings in January 2010 as compared to January 2009 recorded a rise of 1.5%. A year earlier, the index increased by 2.9% (Table 1).

The Material Costs Index in January 2010 as compared to December 2009 recorded a rise of 0.3%. A year earlier, the index decreased by 0.3% (Table 2).

In the twelve-month period February 2009 – January 2010, the annual average rate of change of the index decreased by 0.8%. A year earlier the annual average rate of change of the index increased by 6.2% (Table 3).

METHODOLOGICAL NOTES

Generally	The compilation of the Material Costs Index in Construction of New Residential Buildings started in 1975. The index, with its current form, is compiled since January 2005. when replaced the previous index with the base year 2000.
Purpose of the index – definitions	<p>The purpose of the index is to measure the monthly rates of change in the prices of building materials paid by the constructors and are consumed in the construction of new residential buildings.</p> <p>The Material Costs Index is a monthly index and consists a sub index of the overall cost index in construction of new residential buildings.</p> <p>For the index compilation the selected prices of the materials are those which are actually paid by the construction enterprises for materials supplied at the site and do not include VAT or other taxes.</p>
Legal basis	The compilation of the Material Costs Index is governed by Council Regulation (EEC) No,1165/98 concerning short-term statistics” and by the Regulation No,1158/05 (that amends the above Regulation) of the European Parliament and of the Council.
Reference period	Month
Base year	2005=100.0.
Revision	The Material Costs Index is a fixed base index. Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is updated every five (5) years in years ending in 0 or 5.
Statistical classification	The national classification which includes 89 categories of materials aggregated in 15 groups is followed.
Geographical coverage	The Index covers the whole country. The prices are collected only in the biggest cities of the country (Greater Athens, Thessaloniki, Patras, Volos, Larisa and Herakleion).
Coverage of economic activities	The Material Costs Index in Construction of New Residential Buildings is an input index that refers to the prices paid for building materials by the constructors of new residential buildings.
Statistical survey	A total number of 1477 observations (prices) collected from 270 commercial or industrial enterprises supplying building materials, is used for the index compilation.
Publication of data	The index with the new base year (2005) is released from February 2009 with January 2009 as first reference month. The availability of time series data with base year 2005=100.0 starts from January 2000.
References	More information about the methodology for the compilation and calculation of the index and for the time series is available in the NSSG website (www.statistics.gr).
