---

<sup>1</sup>The Consumer Price Index (CPI), in Greece, is compiled since 1959 onwards, by the National Statistical Service of Greece (NSSG). The compiled CPI till the year 2000 referred to the urban areas of Greece, while the compiled CPI from 2001 refers to the whole Country. The CPI is revised in regular time according to the results of the latest, each time, Household Budget Survey (HBS). The last revision of the CPI was based on the results of the HBS conducted in the period 2004/05 and since April 2006, the revised CPI is published, with base year 2005=100,0.

<sup>2</sup> The aim of this index is to estimate the change of the general level of the prices of goods and services that compose the "basket" of the purchases of the average household.

<sup>3</sup> The revised CPI in conformity with the HICPs practice is rounded up to 2 decimal figures when published.

More information about CPI is included to a special methodological note.
