Introduction

PRODCOM is the title of the EU production statistics for Mining and Quarrying and Manufacturing, i.e. Sections B and C of the Statistical Classification of Economic Activities in the European Community (NACE Rev. 2)¹. The title comes from the French "PRODuction COMMunautaire" (Community production).

The basis of the survey is Council Regulation (EEC) No 3924/91 on the establishment of a Community survey of industrial production (PRODCOM Regulation)². In accordance with Article 2(2) of the above-mentioned Regulation, production is to be recorded according to the product headings of the PRODCOM list. The legal basis was supplemented with Commission Regulation (EC) No 912/2004 on the implementation of the Council Regulation³.

The present version 2016 of this list was completed in December 2015. It is based, for the "goods" parts, on the European Union's external trade nomenclature, the 2016 Combined Nomenclature (CN), which is in force from 1 January 2016.

¹ Whereas earlier versions of the List were based on NACE Rev 1.1, the Lists for 2008 onwards are based on NACE Rev 2. Regulation (EC) No 1893/2006 of the European Parliament and of the Council of 20 December 2006 establishing the statistical classification of economic activities NACE Revision 2 and amending Council Regulation (EEC) No 3037/90 as well as certain EC Regulations on specific statistical domains

² Council Regulation (EEC) No 3924/91 of 19 December 1991 on the establishment of a Community survey of industrial production (OJ No L 374, 31.12.1991, p. 1).

³ Commission Regulation (EC) No 912/2004 of 29 April 2004 implementing Council Regulation (EEC) No 3924/91 on the establishment of a Community survey of industrial production (Official Journal of the European Communities No. L 163, 30.4.2004, p. 71).

13. Additional remarks

1. Purpose of PRODCOM

PRODCOM is a survey to collect statistics on the amount of production of each of the products in the PRODCOM List, that has taken place in the reporting country during the reference period. Although the aim should be to achieve 100 % coverage of each product, in other words to report the full amount of production of each product, this is unrealistic. In particular, in order to reduce the burden on small enterprises, the regulation states that only enterprises with more than 20 employees should be surveyed. However the regulation stipulates that national survey methods should ensure that 90 % coverage across the whole 4-digit NACE class is achieved.

2. Organisation of the list

The list is divided into "Classes" corresponding to the classes of NACE 2. Within the individual classes, the headings of the list are set out in ascending order of their PRODCOM codes, grouped according to the corresponding CPA headings.

3 Heading characteristics

3.1 PRODCOM codes

The column called "PRODCOM" contains the PRODCOM codes of the products to be recorded. Each heading is identified by an eight-digit code according to the following pattern:

XX.XX.YY.ZZ

The first four digits of the code (XX.XX) correspond to the classes of NACE 2. The first six digits (XX.XX.YY) are the CPA code (European Union Classification of Products by Activity)¹, while the last two digits (ZZ) show the classification of a heading within this CPA heading.

3.2 Heading types

There are four types of Prodcom heading designated **S**, **T**, **V** and **I**, indicating what should be reported. **S**, **T** and **V** refer to physical products and **I** refers to industrial services. The heading type is given in Column "P".

- S** = Production sold should be reported by value and volume for type **S** headings. In some cases no volume unit is defined for a heading. In these cases only the value should be reported
- T** = Total production should be reported by volume for type **T** headings. In addition the sold production by value and volume should be reported
- V** = Total production should be reported by volume for type **V** headings. Sold production is not required
- I** = Type **I** headings are industrial services. The reported value should be the fee paid. No volume data should be reported

Sections 4 – 8 deal with physical products of types **S**, **T** and **V**.

Since headings of type **I** concern industrial services rather than physical products, they constitute a special case. They are dealt with separately in section 9.

4. External trade nomenclature reference

In accordance with Article 2(2) of the PRODCOM Regulation, each heading of the PRODCOM list is, with a few exceptions, defined by one or more headings of the European Union external trade nomenclature, i.e. the eight-digit Combined Nomenclature (CN). Therefore the "General rules for the interpretation of the Combined Nomenclature" are, in principle, also applicable for the interpretation of the PRODCOM List. The corresponding CN headings are listed in the column "External trade nomenclature reference for 2008 HS/CN)". The "Description" does not always cover the entire content of the heading.

5. Survey characteristics

In accordance with Article 2 of the PRODCOM Regulation, the physical volume and the value of production are normally recorded for the products in the PRODCOM list.

5.1 Type of production

In accordance with Article 2 (3) and (4), different production concepts are used in the survey:

- production sold during the survey period.
- actual production (total production) during the survey period. This includes any production by the enterprise which is incorporated into the manufacture of other products. Such production is normally taken to mean only those products which:
 - * are processed into another product, or
 - * are fitted into another product, or
 - * are put in stock.

Enterprises to survey

In order to conform to the Prodcom regulation, the reporting country must record at least 90 % of the value and volume of production carried out by enterprises on its territory. In order to achieve this, the survey should include all producers, regardless of the nature of the enterprise. Principal enterprises, contract processors and enterprises working under any other arrangement should be included. Conversely, production physically carried out in another country must not be included.

5.2 Valuation

The value of production sold should be calculated on the basis of the ex-works selling price obtained during the reporting period. It also includes packaging costs, even if they are charged separately.

However, the following are not included:

- any turnover tax and consumer tax charged
- separately charged freight costs
- any discounts granted to customers

If finished products are hired out or leased (e.g. computer equipment, telephone installations, washing machines), or if for any other reason the manufacturing enterprise is not selling the goods, the price obtainable on the market for the product in question should be recorded as an estimated value. If the enterprise is unable to estimate the value, the National Statistical Institute should use the unit value from other enterprises or from other countries to estimate the value.

5.3 Volumes

The particular physical units in the CN have normally been adopted for recording the volume of production. In exceptional cases a different unit is recorded (marked with @).

The units belonging to the individual PRODCOM headings are given in the column "Volume Physic. unit". A hyphen ("-") in this column means that for that particular heading only the value is recorded and not the volume.

6. Coverage

The PRODCOM statistics normally cover all enterprises/local units which physically manufacture products contained in the PRODCOM list.

Among the rules on representativeness contained in Article 3, paragraph 3 stipulates that all enterprises in Sections B and C of NACE 2 employing at least 20 people must be included. However, in accordance with paragraph 2, at least 90 % of production in each (four-digit) class of NACE 2 must be recorded.

7. Z aggregates

In some circumstances, the Prodcom headings are broken down to a greater level of detail than the Combined Nomenclature heading. This situation arises when a greater level of detail than the one provided in CN is required for analytical purposes. Some of these detailed codes are also the legacy of a time when some CN codes could be linked to several CPA headings. Therefore they continue to be collected to maintain long time series.

In order to maintain the link to CN for such headings, special aggregates are created. These are known as Z aggregates since they have a Z in the seventh position of the PRODCOM code. The detailed headings that make up the aggregate are identified by a 'z' in the PRODCOM column below the Prodcom code. Below is an example of this type of aggregation:

| | | |
|------------------|--|------------------------------------|
| 13.10.61.32 z | Yarn of uncombed cotton, n.p.r.s., for woven fabrics (excluding for carpets and floor coverings) | 5205 [.1 +.3]a + 5206 [.1 +.3]a |
| + | | |
| 13.10.61.33 z | Yarn of uncombed cotton, n.p.r.s., for knitted fabrics and hosiery | 5205 [.1 +.3]b + 5206 [.1 +.3]b |
| + | | |
| 13.10.61.35 z | Yarn of uncombed cotton, n.p.r.s., for other uses (including carpets and floor coverings) | 5205 [.1 +.3]c + 5206 [.1 +.3]c |
| = | | |
| 13.10.61.Z1 | Cotton yarn of uncombed fibres, n.p.r.s. | 5205 [.1 +.3] + 5206 [.1 +.3] |

A table showing all Z aggregates and the related detailed headings is given at the end of the list.

8. Intermediate products

Intermediate products are a special type of physical product, with the following characteristics:

- If a product is manufactured by an enterprise and used by the same enterprise as an input to the manufacture of another product, its production is not recorded.
- If the same product is manufactured by an enterprise and supplied to another enterprise, for use as an input to the manufacture of another product, its production is recorded as an intermediate product.
- If the same product is manufactured by an enterprise and is then sold for consumption, its production is recorded as a final product.

Intermediate products are not covered by the Combined Nomenclature, since such products are not sold; therefore, no CN references are provided for intermediate products (in column "External trade nomenclature reference").

The Specific Notes indicate the headings to be used in individual cases.

9. Industrial services

Industrial services cover treatment, repairs and maintenance, and assembly work. They are described in more detail below.

Since in the case of industrial services the service is the "product", headings of this type record the value of the service, i.e. the fee paid, rather than the value of any associated physical goods.

Treatment

A distinction is normally made between the treatment of the enterprise's own products (in-house treatment), the treatment of bought-in products (treatment on own account) and the treatment of outside products under contract (contract treatment). The treatment process does not involve any change in the form of the product. In contrast to contract processing, treatment of a given product in the PRODCOM list does not involve converting it into another product in the list. The following are examples of treatment processes: dyeing, staining, finishing, printing, gilding, etching, varnishing, etc.

For in-plant refining, no separate registration number is required since it is considered to be part of the production activity. Even if the in-plant refining is carried out in a separately located refining plant of the same enterprise, the production plant reports the refined product with its total (gross) value as sales production; the refining plant itself makes no report for the production statistics unless, apart from in-plant refining, it performs its own independent refining or contract refining, which it would then have to quote separately in the production statistics.

The value of own-account refining work, insofar as there are separate reporting numbers available, only needs to be reported by the plant doing the refining. The value to be indicated is the gross (invoice) value.

Contract refining work also only needs to be reported by the plant that carried out the refining. The value to be indicated by the refining plant is the sum paid by the client. The client for his part reports the total value and the quantity of refined product as sales production, unless the client did not produce the raw product himself but purchased it. In this case, the client reports neither the quantity nor the value of the refined product. Where contract refining is concerned, the client and contracting company must be separate companies; contract refining between different plants of the same enterprise is not possible.

Maintenance and repairs

Only the value of maintenance and repair work should be recorded, using the relevant reporting codes, whereby the value is to be recorded as the costs actually charged for the maintenance and repairs. Maintenance and repairs involving major reconstruction of the product being repaired or maintained should be entered as production. Maintenance and repair work on the enterprise's own plant and equipment should not be recorded.

Assembly work

Assembly work involves constructing a product by assembling a number of separate components into a product for which there is no separate number in the PRODCOM list.

A distinction is to be made between the following two types of assembly:

- a) if the assembled components are entirely or predominantly manufactured in another plant (belonging to the same or to another enterprise), only the value of the assembly work should be entered under the appropriate PRODCOM code. The value here is the costs charged for assembly (including the materials used in the assembly), excluding any turnover tax charged. It does not include the value of assembled components manufactured in the plant where the assembly work is carried out.
- b) conversely, if components are assembled in the plant in which they have been entirely or predominantly manufactured, the value of the assembly work (including the materials used in assembly) should normally be added pro rata to the production value of these components. However, if this poses problems (e.g. in the case of large-scale installations), such work may be recorded under the special PRODCOM codes for assembly work.

Some of these services, however, are classified as non-industrial services in NACE 2, e.g. maintenance and repair of motor vehicles and maintenance and repair of office, accounting and computing machinery. This also applies to software consultancy and supply and other computer and related activities.

10. Products 'packaged for retail sale'

These headings have "p.r.s." or "put up in forms or packings for retail sale or as preparations or articles" in the description. Only enterprises that have manufactured these products should declare their production, and not those that have merely packaged goods manufactured by another enterprise.

13. Additional remarks

The columns named "PRODCOM" and "Reference to notes" contain letters or other symbols which provide information about the statistical treatment of the headings; the meaning of these letters and symbols is explained below:

Column "PRODCOM"

- z = Component of a Z list aggregation
- * = Modified heading of the List compared to the previous year
- @ = Unit differs from CN unit

Column "Reference to Notes"

- A1, B1, B2, B3, C1, C2, C3 = Specific definitions for some iron and steel products (see specific notes for division 24)
- C = Considerations on metal coating (see specific notes for division 25)
- M = Considerations on military products
- O = Considerations on the links to CN for ships (see specific notes for division 30)
- P = Considerations on printing products (see specific notes for division 18)
- R = Provisions on newly constructed ships (see specific notes for division 30)
- S1, S2 = Considerations on sub-contracting

Specific notes

DIVISION 18: PRINTING AND REPRODUCTION OF RECORDED MEDIA

18.P Printing products

Headings: All headings for which "P" appears in column "Reference to notes"

The products surveyed here are the products resulting from printing only, which means that only the work of the printer is to be taken into account (provision of raw materials [paper, ink, etc], provision of manpower, printing services, etc). In CPA 2.1 publishing is classified out of manufacturing and therefore out of PRODCOM scope. No CN reference is made for printing products because the corresponding CN codes are associated to products from publishing (which also cover other costs like remuneration of intellectual property, advertisement, etc).

Note that the headings for printing products refer to physical products and not to industrial services, and therefore require the volume of production to be reported.

DIVISION 20: MANUFACTURE OF CHEMICALS AND CHEMICAL PRODUCTS

20.15 Fertilizers

For these fertilizers "kilo" means kilo product or kilo material measured by weight.

In other words 1 kilo of product / material will have a certain nutrient content and the rest will be made up of other components. For instance, 1 kilo of product / material of compound fertilizer, so-called NPK, of the type "15-15-15" will have a nitrogen (N) content of 150 grams, a phosphate (P_2O_5) content of 150 grams and a potash (K_2O) content of 150 grams. Hence, the nutrient content in a kilo of this fertilizer type adds up to 450 grams and the remaining 550 grams are non-nutrient components.

20.M Military products

Headings: All headings for which "M" appears in column "Reference to notes"

Some countries have very strict legal provisions prohibiting them from communicating data on military products; therefore, data collected via the PRODCOM survey will be limited to products, equipments and materials used for civil uses only. When the Combined Nomenclature makes a distinction between military products and other products, CN headings dealing with military products are omitted. When no such distinction is made, only the products for civil uses should be declared.

DIVISION 22: MANUFACTURE OF RUBBER AND PLASTIC PRODUCTS

22.S1 Supply of plastic components

Headings: All headings for which "S1" appears in column "Reference to notes"

These headings are for recording plastic components to be fitted into certain appliances and machines or to be processed. Only those products should be reported which are sold by the producer enterprise to other enterprises. Components which are processed in the producer enterprise or are fitted into its own products should not be reported.

DIVISION 24: MANUFACTURE OF BASIC METALS

24.S1 Supply of castings

Headings: All headings for which "S1" appears in column "Reference to notes"

These headings are for recording metal products and metal processing products to be fitted into certain appliances and machines or to be processed. However, only those products should be reported that are sold by the producer enterprise to other enterprises. Components that are processed in the producer enterprise or are fitted into the enterprise's own products should not be reported.

24.T Definition of some products of the T-code list

Definitions A

A 1: Pig iron

Detailed definitions of the various grades of pig iron are set out in Table 2 and its footnotes of European Standard EN 10001, Definition and Classification of Pig Iron.

The following notes summarize the main categories:

(a) pig iron

Iron-carbon alloy containing by weight more than 2 % of carbon and, either separately or together, not more than:

- 30 % of manganese,
- 10 % of chromium,
- 8 % of silicon,
- 3 % of phosphorus,
- 10 % in total of other specified alloy elements (nickel, copper, aluminium, titanium, vanadium, molybdenum, etc.).

Materials exceeding these limits are ferro-alloys.

(b) non-alloy pig iron

Pig iron with no specified alloy contents by weight more than:

- 6 % of manganese,
- 4 % of silicon,
- 0,3 % of chromium or nickel,
- 0,2 % of titanium,
- 0,1 % of other alloy elements.

Residual quantities up to 0,5 % of unspecified alloy elements found on analysis do not alter the classification of non-alloy pig iron.

(c) steelmaking iron

Non-alloy pig iron containing by weight not more than 1,0 % of silicon.

A distinction is made between:

- high phosphorus steelmaking iron containing 1,5 % up to and including 2,5 % of phosphorus,
- low phosphorus steelmaking iron containing not more than 0,25 % of phosphorus.

(d)foundry iron

Non-alloy pig iron containing by weight more than 1,0 % up to and including 4,0 % of silicon and not more than 1,5 % of manganese.

There are three main classes of foundry iron:

- high phosphorus foundry iron containing more than 0,5 % of phosphorus,
- low phosphorus foundry iron containing not more than 0,25 % of phosphorus,
- low phosphorus foundry iron for spheroidal graphite castings containing not more than 0,1 % of manganese and not more than 3,0 % of silicon.

(e)alloy pig iron

Pig iron with specified alloy contents exceeding any of the limits in (b) above.

(f)spiegel iron

Alloy pig iron containing by weight more than 6,0 % up to and including 30,0 % of manganese with no other specified alloy elements exceeding the limits in (b) above.

Definitions B

Steel qualities are defined, as in European Standard EN 10020, Definition and Classification of Grades of Steel, by requirements for chemical composition based on specified ladle analysis.

B 1: Non-alloy steel

Steel grades in which none of the following limit values is reached by any specified element as defined in clause 4.1 and Table 1 and its footnotes of EN 10020:

- 1,65 % of manganese,
- 0,50 % of silicon,
- 0,40 % of copper or lead,
- 0,30 % of chromium or nickel,
- 0,10 % of aluminium, bismuth, cobalt, tellurium, vanadium or tungsten,
- 0,08 % of molybdenum,
- 0,06 % of niobium,
- 0,0008 % of boron,
- 0,05 % of any other alloy element except carbon, nitrogen, phosphorus or sulphur.

It follows that alloy steel is any grade with a specified chemical composition reaching any of the above limit values.

B 2: Other alloy steel

Any steel grade defined as alloy (EN 10020: 4.2.2) not meeting the definitions of stainless steel given below.

B 3: Stainless steel

Alloy steel grades containing by weight 10,50 % or more of chromium but not more than 1,20 % of carbon, with or without other alloying elements. (EN 10 020: 5.2.2.2.1)

Definitions C

C 1: Hot rolled wide strip

Production from continuous mills, semi-continuous mills and reversing mills (Steckel, etc.) producing hot rolled flat products of width 600 mm or more, which immediately after the final rolling pass are wound into coils.

The edges of the strip are slightly convex, as rolled, and production is measured immediately on completion of the rolling cycle, i.e. before trimming or rectification.

C 2: Hot rolled narrow strip

Flat products hot rolled in widths up to 600 mm, which, immediately after the final rolling pass are wound into coils.

Production is measured immediately on completion of the rolling cycle, i.e. before trimming or rectification.

C 3: Plate and sheet rolled in lengths in wide strip mills

These are hot rolled flat products generally less than 50 mm thick, the edges being allowed to deform freely, supplied flat in square or rectangular shapes with a width of 600 mm or more, and have been manufactured in the roughing stands of wide strip mills but not coiled.

Included is plate recovered by cutting damaged hot rolled flat products where the defective areas are scrapped for immediate remelting.

DIVISION 25: MANUFACTURE OF FABRICATED METAL PRODUCTS, EXCEPT MACHINERY AND EQUIPMENT

25.C Treatment and coating of metals

Headings: All headings for which "C" appears in column "Reference to notes"

These headings are for recording surface treatment and hardening; this only applies, however, to the treatment of bought-in products (treatment on own account) and the treatment of outside products under contract (contract treatment). For further details, see point 9.1 of the general notes to the PRODCOM list.

25.M Military products

Headings: All headings for which "M" appears in column "Reference to notes"

Some countries have very strict legal provisions prohibiting them from communicating data on military products; therefore, data collected via the PRODCOM survey will be limited to products, equipments and materials used for civil uses only. When the Combined Nomenclature makes a distinction between military products and other products, CN headings dealing with military products are omitted. When no such distinction is made, only the products for civil uses should be declared.

25.S Supply of parts and accessories

25.S1 Headings: All headings for which "S1" appears in column "Reference to notes"

These headings are for recording metal products and metal processing products to be fitted into certain appliances and machines or to be processed. However, only those products should be reported which are sold by the producer enterprise to another (supplier) enterprise. Components processed by the producer enterprise or fitted into its own products should not be reported.

25.S2 Headings: All headings for which "S2" appears in column "Reference to notes"

27.S2 Supply of parts and accessories

Headings: All headings for which "S2" appears in column "Reference to notes"

The production of suppliers is not to be reported under the above-mentioned headings but should be listed instead under the corresponding headings of NACE 2 classes:

| | |
|-------|--|
| 22.29 | Manufacture of other plastic products |
| 24.51 | Casting of iron |
| 24.52 | Casting of steel |
| 24.53 | Casting of light metals |
| 24.54 | Casting of other non-ferrous metals |
| 25.50 | Forging, pressing, stamping and roll-forming of metal; powder metallurgy |
| 25.62 | Machining |

DIVISION 28: MANUFACTURE OF MACHINERY AND EQUIPMENT N.E.C.

28.M Military products

Headings: All headings for which "M" appears in column "Reference to notes"

Some countries have very strict legal provisions prohibiting them from communicating data on military products; therefore, data collected via the PRODCOM survey will be limited to products, equipments and materials used for civil uses only. When the Combined Nomenclature makes a distinction between military products and other products, CN headings dealing with military products are omitted. When no such distinction is made, only the products for civil uses should be declared.

28.S2 Supply of parts and accessories

Headings: All headings for which "S2" appears in column "Reference to notes"

The production of suppliers is not to be reported under the above-mentioned headings but should be listed instead under the corresponding headings of NACE 2 classes:

| | |
|-------|--|
| 22.29 | Manufacture of other plastic products |
| 24.51 | Casting of iron |
| 24.52 | Casting of steel |
| 24.53 | Casting of light metals |
| 24.54 | Casting of other non-ferrous metals |
| 25.50 | Forging, pressing, stamping and roll-forming of metal; powder metallurgy |
| 25.62 | Machining |

DIVISION 29: MANUFACTURE OF MOTOR VEHICLES, TRAILERS AND SEMI-TRAILERS

29.M Military products

Headings: All headings for which "M" appears in column "Reference to notes"

Some countries have very strict legal provisions prohibiting them from communicating data on military products; therefore, data collected via the PRODCOM survey will be limited to products, equipments and materials used for civil uses only. When the Combined Nomenclature makes a distinction between military products and other products, CN headings dealing with military products are omitted. When no such distinction is made, only the products for civil uses should be declared.

29.S2 Supply of parts and accessories

Headings: All headings for which "S2" appears in column "Reference to notes"

The production of suppliers is not to be reported under the above-mentioned headings but should be listed instead under the corresponding headings of NACE 2 classes:

| | |
|-------|--|
| 22.29 | Manufacture of other plastic products |
| 24.51 | Casting of iron |
| 24.52 | Casting of steel |
| 24.53 | Casting of light metals |
| 24.54 | Casting of other non-ferrous metals |
| 25.50 | Forging, pressing, stamping and roll-forming of metal; powder metallurgy |
| 25.62 | Machining |

DIVISION 30: MANUFACTURE OF OTHER TRANSPORT EQUIPMENT

30.M Military products

Headings: All headings for which "M" appears in column "Reference to notes"

Some countries have very strict legal provisions prohibiting them from communicating data on military products; therefore, data collected via the PRODCOM survey will be limited to products, equipments and materials used for civil uses only. When the Combined Nomenclature makes a distinction between military products and other products, headings dealing with military products are omitted. When no such distinction is made, which is the case for the above-mentioned codes, only the products for civil uses should be declared.

30.O Building of ships and floating structures

Headings: All headings for which "O" appears in column "Reference to notes"

For ships and vessels no reference to Combined Nomenclature is made for two main reasons:

- 1) according to CESA (Community of European Shipyards Associations), comparison with CN data is much less important than comparison with data on changes of ownership
- 2) the classification principle applied is different in CN and PRODCOM; CN makes a distinction between sea-going vessels and non sea-going vessels, whereas PRODCOM does not make such a distinction.

Since comparison with external trade data is considered unimportant, it was thought preferable not to link with CN, as this would have made it necessary to create "Z" codes, producing data which would be of little value.

30.R Repairs and refitting

Headings: All headings for which "R" appears in column "Reference to notes"

These headings are exclusively for recording the construction of new ships. Repairs and refitting should be recorded under headings 30.11.91.00, 30.11.92.00 and 33.15.10.10

30.S2 Supply of parts and accessories

Headings: All headings for which "S2" appears in column "Reference to notes"

The production of suppliers is not to be reported under the above-mentioned headings but should be listed instead under the corresponding headings of NACE 2 classes:

| | |
|-------|--|
| 22.29 | Manufacture of other plastic products |
| 24.51 | Casting of iron |
| 24.52 | Casting of steel |
| 24.53 | Casting of light metals |
| 24.54 | Casting of other non-ferrous metals |
| 25.50 | Forging, pressing, stamping and roll-forming of metal; powder metallurgy |
| 25.62 | Machining |

DIVISION 31: MANUFACTURE OF FURNITURE; MANUFACTURING N.E.C.

31.S2 Supply of parts and accessories

Headings: All headings for which "S2" appears in column "Reference to notes"

The production of suppliers is not to be reported under the above-mentioned headings but should be listed instead under the corresponding headings of NACE 2 classes:

| | |
|-------|--|
| 22.29 | Manufacture of other plastic products |
| 24.51 | Casting of iron |
| 24.52 | Casting of steel |
| 24.53 | Casting of light metals |
| 24.54 | Casting of other non-ferrous metals |
| 25.50 | Forging, pressing, stamping and roll-forming of metal; powder metallurgy |
| 25.62 | Machining |

DIVISION 32: OTHER MANUFACTURING

32.S2 Supply of parts and accessories

Headings: All headings for which "S2" appears in column "Reference to notes"

The production of suppliers is not to be reported under the above-mentioned headings but should be listed instead under the corresponding headings of NACE 2 classes:

| | |
|-------|--|
| 22.29 | Manufacture of other plastic products |
| 24.51 | Casting of iron |
| 24.52 | Casting of steel |

DIVISION 33: REPAIR AND INSTALLATION OF MACHINERY AND EQUIPMENT

33.M Military products

Headings: All headings for which "M" appears in column "Reference to notes"

COUNCIL REGULATION (EEC) N° 3924/91

of 19 December 1991

on the establishment of a Community survey of industrial production

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 213 thereof,

Having regard to the draft Regulation submitted by the Commission,

Whereas in order to carry out the tasks devolving on it from the Treaties, especially with the prospect of the internal market as provided for pursuant to Article 8a of the Treaty establishing the European Economic Community, the Commission must have full, up-to-date and reliable information on industrial production in the Community;

Whereas companies need such information in order to know their markets; whereas the international dimension of these markets will favour an alignment between production statistics and external trade statistics;

Whereas, if production statistics are to be useful and in order to make such an alignment practicable, they must be drawn up at a level of detail which is close to the first six digits of the combined nomenclature, which also corresponds to the coding used in the Harmonized System;

Whereas the combined nomenclature is a product nomenclature with which companies are already familiar; whereas it is in their interests to refer thereto rather than create a nomenclature specific to production;

Whereas standardized statistics cannot be drawn up with the reliability, speed, flexibility and level of detail required to manage the internal market unless the Member States use survey classification systems derived from the same product list;

Whereas, in order to meet national requirements, Member States may legitimately retain or enter in their national nomenclatures supplementary items not contained in the Community product list,

HAS ADOPTED THIS REGULATION:

Article 1

General

Member States shall carry out a Community statistical survey of industrial production.

Article 2

Survey field and characteristics

1. The field covered by the survey referred to in Article 1 shall be that of the activities listed in sections C, D and E of the classification of economic activities in the European Community hereafter referred to as 'NACE (Rev. 1)' set out in Regulation (EEC) N° 3037/90 (1).

2. The production recorded in this field shall be defined by the list of products, hereinafter referred to as the 'Prodcom list', the headings of which shall in principle consist of articles or groups of articles from the combined nomenclature linked with other Community product nomenclatures.

3. The survey shall cover the following information for each heading:

(a) the physical volume of production sold during the survey period;

(b) the value of production sold during the survey period.

4. In certain cases the information in question shall be replaced by one of the following:

(a) the physical volume of actual production during the survey period, including any which is incorporated into the manufacture of other products from the same undertaking;

(b) the value and/or physical volume of actual production during the survey period with a view to marketing.

5. In each Member State, the production surveyed shall be only that production actually carried out on its territory; it shall not include production outside its territory on behalf of some of its undertakings.

6. The Prodcom list, the information actually collected for each heading and the other implementation procedures of this Regulation shall be established in accordance with the procedure laid down in Article 10. The Prodcom list shall be updated in the same way.

Article 3

Representativeness

1. The production of all undertakings in the Community must be recorded with sufficient accuracy for each NACE Rev. 1 class.

2. Member States shall adopt survey methods designed to facilitate the collection of data from undertakings representing at least 90 % of national production per NACE Rev. 1 class. A different threshold may nonetheless be adopted, in exceptional cases, in accordance with the procedure laid down in Article 10.

3. For the evaluation of production, account shall be taken of all undertakings employing at least 20 people. This threshold shall be reviewed in the light of the requirement of representativeness referred to in paragraph 2.

4. Where the production of Member State's undertakings in a NACE Rev. 1 class represents less than 1 % of the Community total, the data on the headings in that class need not be collected.

5. Detailed rules for applying this Article shall be adopted, as necessary, in accordance with the procedure laid down in Article 10.

Article 4

Survey periods

The survey shall cover an annual period of one calendar year.

However, for certain headings in the Prodcom list, monthly or quarterly surveys may be decided upon in accordance with the procedure laid down in Article 10.

Article 5

Collection of data

1. The required information shall be collected by the Member States using survey questionnaires the content of which shall comply with the arrangements defined in accordance with the procedure laid down in Article 10.

2. The undertakings called upon by Member States to supply information shall be obliged to give true

and complete information within the prescribed periods.

3. The survey may be waived where Member States already have information from other sources which is at least equivalent as regards precision and quality.

4. Where the Statistical Office so requests, Member States shall send it any information, in particular concerning methodology, necessary for the implementation of this Regulation.

Article 6

Processing of results

Member States shall process the completed questionnaires referred to in Article 5 (1) or information from other sources referred to in Article 5 (3) in accordance with the detailed rules adopted in accordance with the procedure laid down in Article 10.

Article 7

Transmission of results

1. Member States shall send the findings relating to a one-year period to the Statistical Office of the European Communities within six months after the end of the reference year. These findings shall include data which are confidential under national law; their confidential nature shall be explicitly stated.

2. Findings concerning headings with a survey period shorter than a year shall be sent under the arrangements adopted in accordance with the procedure laid down in Article 10.

3. Findings transmitted to the Statistical Office of the European Communities shall be treated as confidential as required by Regulation (Euratom, EEC) N°1588/90 (1).

4. The first survey shall cover 1993. Together with the data for 1993 the Member States shall send retrospective information relating to 1992 using national statistics which correspond as closely as possible to the Prodcom list.

Article 8

Transitional period

Articles 1 to 7 shall be the subject of progressive implementing measures for the surveys covering 1993 and 1994.

Article 9

The Committee

The procedures for implementing this Regulation, including the measures for adjustment to technical progress concerning collection of data and the processing of the results shall be laid down by the Commission after consulting the Statistical Programme Committee set up by Decision 89/382/EEC, Euratom (1), in accordance with the procedure laid down in Article 10.

Article 10

Procedure

1. The representative of the Commission shall submit to the Committee a draft of the measures to be taken. The Committee shall deliver its opinion on the draft, within a time limit which the chairman may lay down according to the urgency of the matter. The opinion shall be delivered by the majority laid down in Article 148 (2) of the Treaty in the case of decisions which the Council is required to adopt on a proposal from the Commission. The votes of the representatives of the Member States within the Committee shall be weighted in the

manner set out in that Article. The chairman shall not vote.

2. (a) The Commission shall adopt measures which shall apply immediately.

(b)

However, if these measures are not in accordance with the opinion of the Committee, they shall be communicated by the Commission to the Council forthwith. In that event the Commission shall defer application of the measures which it has decided for a period of three months from the date of such communication.

The Council, acting by a qualified majority, may take a different decision within the time limit referred to in the first subparagraph.

Article 11

Entry into force

This Regulation shall enter into force on the day of its publication in the Official Journal of the European Communities.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Commission Regulation (EC) No 912/2004

of 29 April 2004

implementing Council Regulation (EEC) No 3924/91 on the establishment of a Community survey of industrial production

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EEC) No 3924/91 of 19 December 1991 on the establishment of a Community survey of industrial production(1), and in particular Article 9 thereof,

Whereas:

(1) Regulation (EEC) No 3924/91 provides for measures for adjustment to technical progress concerning collection of data and processing of results to be laid down by the Commission after consulting the Statistical Programme Committee.

(2) Technical progress and subsequent legislation, in particular acts relating to the European Business Statistical System, call for adjustments to be made to the survey coverage and characteristics.

(3) These adjustments should improve coverage of the statistics provided by the Member States without increasing the burden on economic operators.

(4) The statistical data compiled within the Community system must be of satisfactory quality and comparable from one Member State to another.

(5) The measures provided for in this Regulation are in accordance with the opinion of the Statistical Programme Committee set up by Council Decision 89/382/EEC. Euratom(2),

HAS ADOPTED THIS REGULATION:

Article 1

The field covered by the survey referred to in Article 1 of Council Regulation (EEC) No 3924/91 is to be identified by reference to the survey population and the observation unit.

The survey population of the reference period shall be enterprises whose principal activity or one of its secondary activities is listed in section C, D or E of the classification of economic activities in the European Community (NACE Rev.1.1), set out in Regulation (EC) No 29/2002 of 19 December 2001(3), amending Council Regulation (EEC) No 3037/90(4).

The observation unit shall be the enterprise as defined in Council Regulation (EEC) No 696/93(5) on the statistical units for the observation and analysis of the production system in the Community. Member States may collect data using another statistical unit as observation unit as long as they transmit Enterprise data to Eurostat.

Article 2

The obligation of the units of the survey population to supply true and complete information if called upon by the Member States referred to in Article 5(2) of the Council Regulation (EEC) No 3924/91 is to be limited to the survey population's observation units that produce products listed in the PRODCOM list.

Article 3

The obligation of Member States to adopt survey methods designed to facilitate the collection of data from units representing at least 90 % of national production per NACE class referred to in Article 3(2) of the Council Regulation (EEC) No 3924/91 is to be implemented as Member States' adoption of survey methods designed to enable the collection of data, representing at least 90 % of national production for each NACE Rev.1.1 class of sections C, D and E.

Article 4

Member States' exemption from data collection referred to in Article 3(4) of the Council Regulation (EEC) No 3924/91 is to be clarified by reference to national production of a product.

Member States need not collect data on a product, if total national production of that product is less than 1 % of the total Community production of the product in the previous year. Data on products not collected because of this exemption shall be reported as zero. Member States are to provide the necessary documentation.

This Regulation shall be binding in its entirety and directly applicable in all Member States.
Done at Brussels, 29 April 2004.

Article 5

The waiver of Member States' obligation to carry out the PRODCOM survey referred to in Article 5 (3) of the Council Regulation (EEC) No 3924/91 is to be extended to cases where Member States are able to acquire the necessary data, using a combination of different sources and methods.

Article 6

In addition to the obligation to provide information at the request of Eurostat as set out in Article 5(4) of Council Regulation (EEC) No 3921/91 Member States are also to provide Eurostat with the necessary information about their survey methods, samples and coverage for the purpose of documentation of compliance with the principles of the PRODCOM methodology as laid down in the manual of PRODCOM methodology.

Article 7

This Regulation shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.
