## PRESS RELEASE

### QUARTERLY NATIONAL ACCOUNTS: 3<sup>rd</sup> Quarter 2012 (Provisional)

The Hellenic Statistical Authority (ELSTAT) announces the Gross Domestic Product for the 3<sup>rd</sup> quarter of 2012.

Available non-seasonally-adjusted data indicate that, in the 3<sup>rd</sup> quarter of 2012, the Gross Domestic Product (GDP) at constant prices of year 2005 decreased by 6.9% in comparison with the 3<sup>rd</sup> quarter of 2011, compared with a decrease of 7.2% that was calculated for the flash estimate of the 3<sup>rd</sup> quarter and was announced on November 14, 2012<sup>1</sup>. The difference is on account of using new data, not available at the time of the flash estimate. These data are either monthly data (September month data for imports and exports) or quarterly data (turnover indices for the service industries for the 3<sup>rd</sup> quarter).

Total final consumption expenditure recorded a decrease of 8.8% in comparison with the 3<sup>rd</sup> quarter of 2011 (Table 4).

Gross fixed capital formation (GFCF) decreased by 19.5% in comparison with the 3<sup>rd</sup> quarter of 2011 (Table 4).

The external trade balance record a surplus of 1.8 billion euros contributing positively to the GDP percent change.

Exports decreased by 4.5% in comparison with the 3<sup>rd</sup> quarter of 2011 (Table 4). Exports of goods decreased by 0.5% and exports of services declined by 7.1%.

Imports decreased by 20.9% in comparison with the 3<sup>rd</sup> quarter of 2011 (Table 4). Imports of goods decreased by 22.4% and imports of services declined by 14.9%.

The quarterly GDP estimates for the period Q1 2005 - Q2 2012 have been revised due to the recent revision of annual national accounts for the years 2006 - 2011 (September 2012).

<sup>1</sup> The flash estimate of GDP is the one reported in Eurostat's Q3 2012 GDP press release of the EU27 and the euro area, announced on 6/12/12.

	44755	-6.9	51483	-7.6

\* Percent change against the same quarter of the preceding year.

---

<sup>2</sup>As already reported before, due to the break in the time series of quarterly General Government data, and the resulting availability of data for only a very short period (2009Q1-2012Q3) on which to apply the seasonal adjustment calculation, combined with major changes reflected in the economic indicators used in the estimations of quarterly GDP, the implementation of seasonal adjustment does not provide satisfactory results. For this reason, the figures published are solely the non-seasonally-adjusted ones.
