PRESS RELEASE

QUARTERLY NATIONAL ACCOUNTS: 4th Quarter 2012 (Provisional)

The Hellenic Statistical Authority (ELSTAT) announces the Gross Domestic Product for the 4th quarter of 2012.

Available non-seasonally-adjusted data indicate that, in the 4th quarter of 2012, the Gross Domestic Product (GDP), in volume terms¹, decreased by 5.7% in comparison with the 4th quarter of 2011, compared with a decrease of 6.0% that was calculated for the flash estimate of the 4th quarter and was announced on February 14, 2013. The difference is on account of using new data, not available at the time of the flash estimate. These data are either monthly data (for example December data for imports and exports) or quarterly data (for example turnover indices for the service industries and labour force survey data).

Total final consumption expenditure recorded a decrease of 9.0% in comparison with the 4th quarter of 2011 (Table 4).

Gross fixed capital formation (GFCF) decreased by 10.3% in comparison with the 4th quarter of 2011 (Table 4).

External trade deficit decreased by 17.5%, contributing positively to the GDP percent change.

Exports decreased by 4.8% in comparison with the 4th quarter of 2011 (Table 4). Exports of goods increased by 2.7% while exports of services declined by 13.9%.

Imports decreased by 8.1% in comparison with the 4th quarter of 2011 (Table 4). Imports of goods decreased by 8.5% and imports of services declined by 6.3%.

It should be noted that the current quarterly time series would be revised as a result of the respective annual national accounts revision, scheduled for September 2013.

* Percent change against the same quarter of the preceding year.

²As already reported before, due to the break in the time series of quarterly General Government data, and the resulting availability of data for only a very short period (2009Q1-2012Q4) on which to apply the seasonal adjustment calculation, combined with major changes reflected in the economic indicators used in the estimations of quarterly GDP, the implementation of seasonal adjustment does not provide satisfactory results. For this reason, the figures published are solely the non-seasonally-adjusted ones.
