Summary metadata: The data above refer to the authorized building activity (public and private).

Specifically, the above results refer to data on building permits totally issued by the competent authorities. Such data are collected through a special monthly survey, the Building Permits Survey. The data are collected from administrative sources (Town Planning Offices). External engineers, simultaneously with the issue of a building permit, fill in the relevant questionnaire, properly designed for the survey.

A building permit is an authorization to start work on a building project. Thus, a building permit is the final stage of planning and building authorizations, prior to the start of work.

The legal basis of the survey is the Law 2396/96 (concerning the access of the General Secretariat of the National Statistical Service of Greece to administrative sources and archives and the regulation of issues regarding census surveys and statistical works) and the following STS Regulations:

- Council Regulation (EC) No 1165/98 (concerning short-term statistics)
- Regulation (EC) of the European Parliament and of the Council No 1158/05 (amending Council Regulation (EC) No 1165/98).
