The Hellenic Statistical Authority (ELSTAT) announces the final results of the Annual Agricultural Statistical Survey for the years 2009 and 2010.

## A. CULTIVATED AREAS

The total utilized agricultural area (arable land, crops under vegetables, permanent crops and fallow land) decreased by $0.2 \%$ in 2009 compared with 2008 and by $0.4 \%$ in 2010 compared with 2009.
More specifically, the total utilized agricultural area (arable land, crops under vegetables, permanent crops and fallow land) amounted to 36,938.1 thousand stremmas ${ }^{1}$ in 2008, $36,853.5$ in 2009 and 36.709,3 thousand stremmas in 2010 (Table 1).

The distribution of the cultivated area by main crop type and by year is as follows:

- In 2008, $54.3 \%$ of the cultivated area (20,056.6 thousand stremmas) was used for arable farming, $2.8 \%$ ( $1,028.5$ thousand stremmas) was used for vegetables, $30.8 \% ~(11,380.6$ thousand stremmas) for permanent crops and $12.1 \%$ (4,472.4 thousand stremmas) was fallow land (Table 1, Graph 1).
- In 2009, $53.8 \%$ of the cultivated area (19,854.9 thousand stremmas) was used for arable farming, $2.8 \%$ ( $1,048.9$ thousand stremmas) was used for vegetables, $30.9 \%$ (11,391.1 thousand stremmas) for permanent crops and 12.4\% (4,558.6 thousand stremmas) was fallow land (Table1, Graph 2).
- In 2010, $53.4 \%$ of the cultivated area (19.619.2 thousand stremmas) was used for arable farming, $2.8 \%$ ( $1,041.3$ thousand stremmas) was used for vegetables, $31.0 \%$ ( $11,373.7$ thousand stremmas) for permanent crops and $12.7 \%$ (4,675.1 thousand stremmas) of the cultivated area was fallow land (Table1, Graph 3).

The major changes, in terms of surface of the cultivated areas, which are recorded by type of crop, are the following:

- The cultivated areas under hard wheat recorded an increase of $7.1 \%$ in 2009 compared with 2008 , while a decrease of $4.2 \%$ was observed in 2010 , compared with 2009. More specifically, the cultivated areas under hard wheat amounted to 5,672.0 thousand stremmas in 2008, 6,077 thousand stremmas in 2009 and $5,821.8$ thousand stremmas in 2010 (Table 1).
- The cultivated areas under grain maize decreased by $14.0 \%$ in 2009 compared with 2008 and by $11.0 \%$ in 2010 compared with 2009. More specifically, the areas

[^0]under maize amounted to 2,690.8 thousand stremmas in 2008, 2,314.4 thousand stremmas in 2009 and 2,059.8 thousand stremmas in 2010 (Table 1).

- The cultivated areas under cotton recorded a decrease of $14.4 \%$ in 2009 compared with 2008, while an increase of $3.7 \%$ was recorded in 2010 compared with 2009. More specifically, the areas under cotton amounted to $3,120.7$ thousand stremmas in 2008, 2,669.9 thousand stremmas in 2009 and 2,769.2 thousand stremmas in 2010 (Table 1).
- The cultivated area under tomatoes (total) recorded an increase of $4.2 \%$ in 2009 compared with 2008 while a decrease of $2.4 \%$ was observed in 2010 compared with 2009. More specifically, the cultivated areas under tomatoes amounted to 312.7 thousand stremmas in 2008, 325.8 thousand stremmas in 2009 and 317.8 thousand stremmas in 2010 (Table 1).
- The cultivated areas under vines decreased by $2.0 \%$ in 2009 compared with 2008 and by $3.8 \%$ in 2010 compared with 2009. More specifically, the areas under vines amounted to $1,238.6$ thousand stremmas in 2008, 1,214.1 thousand stremmas in 2009 and 1,168.2 thousand stremmas in 2010 (Table 1).
- The cultivated areas under oranges decreased by $2.4 \%$ in 2009 compared with 2008 and by $0.6 \%$ in 2010 compared to 2009 . More specifically, the cultivated areas under peaches-nectarines amounted to 399.7 thousand stremmas in 2008, 390.0 in 2009 and 387.7 thousand stremmas in 2010 (Table 1).
- The cultivated areas under peaches-nectarines increased by $0.5 \%$ in 2009 compared with 2008 and by $0.1 \%$ in 2010 compared to 2009 . More specifically, the cultivated areas under peaches-nectarines amounted to 437.3 thousand stremmas in 2008, 439.3 in 2009 and 439.5 thousand stremmas in 2010 (Table 1).
- The cultivated area under olives for oil recorded a slight increase of $0.3 \%$ in 2009 compared with 2008 and a further increase of $0.8 \%$ in 2010 compared with 2009. More specifically, the cultivated areas under olives for oil amounted to 6,630.8 thousand stremmas in 2008, 6,653.7 in 2009 and 6,703.6 thousand stremmas in 2010(Table 1).

## B. PRODUCTION OF AGRICULTURAL PRODUCTS

The major changes, in terms of volume of production, by group and species of products are the following:

- The production of durum wheat increased by $7.7 \%$ in 2009 compared with 2008 , while it decreased by $9.2 \%$ in 2010 in comparison with 2009. More specifically, the production of durum wheat amounted to $1,538.5$ thousand tonnes in 2008, 1,656.8 thousand tonnes in 2009 and 1,504.5 thousand tonnes in 2010 (Table 2, Graph 4).
- The production of grain maize decreased by $14.4 \%$ in 2009 compared with 2008 and by $11.4 \%$ in 2010 in comparison with 2009. More specifically, the production of grain maize amounted to 2,820.2 thousand tonnes in 2008, 2,414.5 in 2009 and 2,138.5 thousand tonnes in 2010 (Table 2, Graph 4).
- The production of cotton decreased by $7.8 \%$ in 2009 compared with 2008 and by $14.2 \%$ in 2010 in comparison with 2009. More specifically, the production of cotton amounted to 897.6 thousand tonnes in 2008, 827.9 in 2009 and 710.5 thousand tonnes in 2010 (Table 2, Graph 4).
- The production of sugar beets recorded an increase of $70.2 \%$ in 2009 compared with 2008, while a decrease of $36.9 \%$ was observed in 2010 compared with 2009. More

[^2]specifically, the production of sugar beets amounted to 828.0 thousand tonnes in 2008, $1,409.3$ tonnes in 2009 and 889.4 thousand tonnes in 2010 (Table 2, Graph 4).

- The production of potatoes (total) recorded an increase of $3.1 \%$ in 2009 in comparison with 2008, while a decrease of $1.9 \%$ was observed in 2010 compared with 2009. More specifically, the production of potatoes amounted to 916.5 thousand tonnes in 2008, 944.5 in 2009 and 926.7 thousand tonnes in 2010. (Table 2, Graph 4).
- The production of tomatoes (total) recorded an increase of $9.8 \%$ in 2009 in comparison with 2008, while a decrease of $3.8 \%$ was observed in 2010 compared with 2009. More specifically, the production of tomatoes amounted to $1,397.4$ thousand tonnes in 2008, 1,533.9 in 2009 and 1,475.7 thousand tonnes in 2010. (Table 2, Graph 4).
- The production of must decreased by $1.2 \%$ in 2009 compared with 2008 and by $5.2 \%$ in 2010 in comparison with 2009. More specifically, the production of must amounted to 362.1 thousand tonnes in 2008, 357.7 in 2009 and 339.1 thousand tonnes in 2010 (Table 2, Graph 6).
- The production of oranges recorded an increase of $12.0 \%$ in 2009 compared with 2008, while a decrease of $6.7 \%$ was observed in 2010 in comparison with 2009. More specifically, the production of oranges amounted to 865.9 thousand tonnes in 2008, 969.9 in 2009 and 905.1 thousand tonnes in 2010 (Table 2, Graph 5).
- The production of peaches-nectarines recorded a decrease of $6.2 \%$ in 2009 compared with 2008, while an increase of $3.6 \%$ was observed in 2010 compared with 2009. More specifically, the production of peaches-nectarines amounted to 846.9 thousand tonnes in 2008, 794.1 in 2009 and 822.3 thousand tonnes in 2010 (Table 2, Graph 5).
- The production of olive oil recorded an increase of $8.5 \%$ in 2009 compared with 2008 , while an decrease of $7.6 \%$ was observed in 2010 compared with 2009. More specifically, the production of olive oil amounted to 299.7 thousand tonnes in 2008, 325.2 in 2009 and 300.5 thousand tonnes in 2010 (Table 2, Graph 6).

## C. ANIMAL CAPITAL: NUMBER OF ANIMALS AND PRODUCTION OF LIVESTOCK PRODUCTS

## 1. Number of animals

The most significant changes in the number of animals, by species, are the following:

- The total number of cattle recorded an increase of $0.1 \%$ in 2009 compared with 2008, while there was no significant change in 2010 compared with 2009. More specifically, the number of cattle amounted to 628,065 in 2008, 628,977 in 2009 and 629,004 in 2010 (Table 3).
- The total number of pigs decreased by $2.3 \%$ in 2009 compared with 2008 and by $2.6 \%$ in 2010 compared with 2009. More specifically, the number of pigs amounted to 881,691 in 2008, 861,696 in 2009 and 839,630 in 2010 (Table 3).
- The total number of sheep recorded an increase of $0.5 \%$ in 2009 compared with 2008, while a decrease of $0.3 \%$ was observed in 2010 compared with 2009. More specifically, the number of sheep amounted to $8,888,895$ in 2008, 8,931,392 in 2009 and 8,903,667 in 2010 (Table 3).
- The total number of goats decreased by $1.8 \%$ in 2009 compared with 2008 and by $1.1 \%$ in 2010 compared with 2009 . More specifically, the number of goats amounted to $5,274,759$ in 2008, 5,180,391 in 2009 and 5,122,705 in 2010 (Table 3).
- The total number of hens recorded a decrease of $3.9 \%$ in 2009 compared with 2008, while an increase of $4.2 \%$ was observed in 2010 compared with 2009. More specifically, the number of hens amounted to $28,959,661$ in 2008, $27,841,075$ in 2009 and 29,018,971 in 2010 (Table 3).
- The total number of beehives increased by $0.8 \%$ in 2009 compared with 2008 and by $2.6 \%$ in 2010 compared with 2009 . More specifically, the number of beehives amounted to $1,374,919$ in 2008, 1,386,286 in 2009 and 1,422,543 in 2010 (Table 3).

## 2. Production of meat

The most significant changes in the production of meat, by animal species, are the following:

- the total production of meat of bovine animals recorded an increase of 2.2\% in 2009 compared with 2008, while a decrease of $2.7 \%$ was observed in 2010 compared with 2009. More specifically, the production of meat of bovine animal amounted to 72.4 thousand tonnes in 2008, 74.0 in 2009 and 72.0 thousand tonnes in 2010 (Table 4).
- the total production of pig meat decreased by $4.8 \%$ in 2009 compared with 2008 and by $3.5 \%$ in 2010 compared with 2009. More specifically the production of pig meat amounted to 103.7 thousand tonnes in 2008, 98.7 in 2009 and 95.2 thousand tonnes in 2010 (Table 4).
- the total production of sheep meat increased by $0.6 \%$ in 2009 compared with 2008 and by $0.7 \%$ in 2010 compared with 2009. More specifically the production of sheep meat amounted to 93.5 thousand tonnes in 2008, 94.1 in 2009 and 94.8 thousand tonnes in 2010 (Table 4).
- the total production of goat meat decreased by $1.6 \%$ in 2009 compared with 2008 and by $0.3 \%$ in 2010 compared with 2009. More specifically, the production of meat of goats amounted to 54.6 thousand tonnes in 2008, 53.7 in 2009 and 53.6 thousand tonnes in 2010 (Table 4).
- the total production of poultry meat (except ostriches) recorded a decrease of $0.5 \%$ in 2009 compared with 2008, while an increase of $3.0 \%$ was observed in 2010 compared with 2009. More specifically, the production of poultry meat amounted to 110.9 thousand tonnes in 2008, 110.3 in 2009 and 113.7 thousand tonnes in 2010 (Table 4).
- the total production of ostrich meat recorded an increase of $0.4 \%$ in 2009 compared with 2008, while a decrease of $24.0 \%$ was observed in 2010 compared with 2009. More specifically, the production of meat of ostriches amounted to 0.4 thousand tonnes in 2008, 0.4 in 2009 and 0.3 thousand tonnes in 2010 (Table 4).
- the total production of rabbit meat decreased by $3.8 \%$ in 2009 compared with 2008 and by $3.2 \%$ in 2010 compared with 2009. More specifically, the production of rabbit meat amounted to 7.4 thousand tonnes in 2008, 7.1 in 2009 and 6.9 thousand tonnes in 2010 (Table 4).

## 3. Production of livestock products

The most significant changes in the production of livestock products, in terms of volume of production, are the following:

- The total production of milk recorded a slight decrease of $0.1 \%$ in 2009 compared with 2008 and of $0.3 \%$ in 2010 in comparison with 2009. More specifically, the total production of milk amounted to 2,053.3 thousand tonnes in 2008, 2,051.1 in 2009 and 2,044.0 thousand tonnes in 2010 (Table 5).
- the total production of soft cheese decreased slightly by $0.7 \%$ in 2009 compared with 2008 and by $2.0 \%$ in 2010 compared with 2009. More specifically, the production of soft cheese amounted to 123.2 thousand tonnes in 2008, 122.4 in 2009 and 119.9 thousand tonnes in 2010 (Table 5).
- The total production of eggs recorded an increase of $2.3 \%$ in 2009 compared with 2008 while a decrease of $0.3 \%$ was observed in 2010 compared with 2009. More specifically, the production of eggs amounted to $1,881.4$ million in 2008, 1,925.5 in 2009 and $1,919.1$ million (Table 5).

Table 5. Production of milk (by animal species) and livestock products. Greece total, 2008-2010
in thousand tonnes

| Milk (by animal species) | 2008 | 2009 | 2010 | Change (\%) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

| Eggs (million pieces) | 1,881.4 | 1,925.5 | 1,919.1 | 2.3 | -0.3 |

## D. AGRICULTURAL MACHINERY

The most significant changes in the number of agricultural machinery are as follows:

- Agricultural tractors decreased slightly by $0.8 \%$ in 2009 compared with 2008 and by $0.1 \%$ in 2010 compared with 2009. More specifically, the number of the agricultural tractors, which were used, amounted to 393,968 in 2008, 390,922 in 2009 and 390,407 in 2010 (Table 6).

[^3]- Spraying machines increased slightly by $0.7 \%$ in 2009 compared with 2008 and by $0.4 \%$ in 2010 compared with 2009 . More specifically, the number of the spraying machines, which were used, amounted to 226,714 in 2008, 228,378 in 2009 and 229,311 in 2010 (Table 6).
- Electric irrigation pumps recorded a decrease of $1.1 \%$ in 2009 compared with 2008 and a slight increase of $0.1 \%$ in 2010 in comparison with 2009. More specifically, the number of the electric irrigation pumps, which were used, amounted to 152,664 in 2008, 150,969 in 2009 and 151,118 in 2010.
- Sprinkling units decreased by $1.8 \%$ in 2009 in comparison with 2008 and by $2.6 \%$ in 2010 compared with 2009. More specifically, the number of the sprinkling units, which were used, amounted to 154,669 in 2008, 151,857 in 2009 and 147,910 in 2010.
- Drop irrigation systems increased by 5.2\% in 2009 in comparison with 2008 and by $0.8 \%$ in 2010 compared with 2009. More specifically, the number of drop irrigation systems, which were used, amounted to 136,087 in 2008, 143,162 in 2009 and 144,258 in 2010.
- Petrol pruning saws increased by $1.7 \%$ in 2009 in comparison with 2008 and by $1.5 \%$ in 2010 compared with 2009. More specifically, the number of the petrol pruning saws, which were used, amounted to 238,191 in 2008, 242,359 in 2009 and 245,920 in 2010.

Table 6. Agricultural machinery, 2008-2010

| Type of machinery | 2008 | 2009 | 2010 | Change (\%) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 2008/2009 | 2009/2010 |

## EXPLANATORY Notes

## Annual Agricultural

The Hellenic Statistical Authority in cooperation with the central and regional offices of the Ministry of Rural Development and Food, the local authorities, the local government bodies and the Rural Guard (municipal, communal secretary - statistical reporters- rural guards), as well as with the experienced inhabitants of the rural settlements has been conducting since 1961 the Annual Statistical Survey on Agriculture and Livestock.

Purpose of the survey The purpose of the survey is to collect statistical data on the cultivated areas under several crops and on the production of agricultural and livestock products, as well a the agricultural machinery used. The data are necessary for drawing the agricultural policy of the country but also for covering other national and international needs and obligations.

Legal Framework The legal frame for the conduct of the annual statistical agricultural survey is the Royal Decree No 111/15-2-1962 and the Joint Ministerial Decisions No 8710/Г2-1246/5-8-2010 and 2198/Г2-248/24-2-2012 signed by the Minister of National Economy and the Deputy Minister of Interior, Public Administrations and Decentralization, as well as the relevant joint ministerial decision issued every year pertaining to the Approval, open tender and assignment of the conduct of the Annual Agricultural Statistical Survey and approval of the competent bodies for the survey conduct and their remuneration.

Reference Period The survey refers to the years 2009 and 2010.
Methodology and The statistical unit of this survey is the land area within the Coverage administrative boundaries of each communal/municipal department of the country according to "Kapodistrias Plan". The survey covers, on a census basis, all the above-mentioned administrative departments except the area of Agion Oros, for which no data are collected.

Publication of data The survey results are available on a yearly basis since 1961.
References More information on the results of the survey is available on the ELSTAT website www.statistics.gr, under the link "Statistical themes" > Agriculture> Cultivated areas.

[^0]:    ${ }^{1} 1$ stremma $=1,000 \mathrm{~m}^{2}$

[^1]:    ${ }^{2}$ Areas under nurseries are not included due to their small contribution to the total of the cultivated area

[^2]:    ${ }^{3}$ Also included greenhouses with vegetables and flowers. Vegetables include tomatoes, cucumbers, etc.

[^3]:    ${ }^{4}$ The exact quantity of ostrich meat is as follows: 353,773 thousand kilograms in 2008, 354,219 in 2009 and 269,376 thousand kilograms in 2010.
