## METHODOLOGICAL NOTES

<b>Generally</b>	The Index of Persons Employed in Retail Trade is a quarterly index that was first compiled in 2004 with 2000=100.0 as the base year and backdated data from the 1st quarter of 2000.
<b>Purpose of the index – definitions</b>	<p>The purpose of the Retail Trade Turnover Index is to measure the performance of the goods and services market.</p> <p>The compilation of the index includes the number of persons employed in the enterprise irrespective of their status (owners, partners and their family members) and the nature of their work (managers, sales persons and auxiliary staff) and irrespective of whether they work on a provisional or seasonal basis, full time or part time, with or without remuneration.</p>
<b>Legal basis</b>	The compilation of the Index of Persons Employed in Retail Trade is governed by Council Regulation (EEC) No.1165/98 “concerning short-term statistics” and by the Regulation No.1893/2006 of the European Parliament and of the Council for the implementation of the new statistical classification NACE Rev.2.
<b>Reference period</b>	Quarter.
<b>Base year</b>	2010=100.0.
<b>Revision</b>	Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is updated every five (5) years in years ending in 0 or 5.
<b>Statistical classification</b>	The new EU (Eurostat) NACE Rev.2 statistical classification of economic activities was used, in conformity with Regulation (EC) 1893/2006 of the Council and the European Parliament.
<b>Geographical coverage</b>	The Index covers the whole of the country, with data from 49 prefectures.
<b>Coverage of economic activities</b>	The index covers division 47 of NACE Rev 2 statistical classification of economic activities.
<b>Statistical survey</b>	For the compilation of the revised Index of Persons Employed in Retail Trade (2010=100.0) a sub-sample was used, which was obtained from the existing sample of observation units from the Turnover Index in Retail Trade survey. More specifically, out of the 1626 enterprises included in the survey sample for the Turnover Index in Retail Trade (2010=100.0), 754 enterprises were selected covering all the strata of the above survey, which resulted from the cross-linking of the economic activity division to the turnover value of enterprises.
<b>Calculating the indices</b>	The Index of Persons Employed in Retail Trade is calculated as a chain index by means of the methodology used for calculating the Retail Trade Turnover Index.
<b>Compiled index series</b>	The time series of this index are compiled from 1 <sup>st</sup> quarter 2000 as follows ,1)Overall Index,2) Overall Index (excluding the persons employed in the automotive fuel sector),3) Index of persons employed in the food sector,4) Index of persons employed in the non-food sector except automotive fuel.
<b>Publication of data</b>	The time series of the revised Index of Persons Employed in Retail Trade (2010=100.0), including persons employed in enterprises selling automotive liquid fuel and lubricants or not including such persons (in line with the index published until the 4th quarter of 2008) have being published since 2000.
<b>References</b>	More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the ELSTAT website ( <a href="http://www.statistics.gr">www.statistics.gr</a> ) .
