

PRESS RELEASE

INDEX OF PERSONS EMPLOYED IN RETAIL TRADE: 2nd quarter 2015

The Hellenic Statistical Authority announces the Index of Persons Employed in Retail Trade, with base year 2010=100.0, for the 2nd quarter 2015 as follows:

- The Index of Persons Employed in Retail Trade increased by 2.4% in the 2nd quarter 2015, compared to the 2nd quarter 2014. More specifically, in the food sector, the index increased by 3.4%, while in the non-food sector except automotive fuel, increased by 1.0%.
- The Index of Persons Employed in Retail Trade increased by 0.6% in the 2nd quarter 2015, compared to the 1st quarter 2015. More specifically, in the food sector, the index increased by 1.2%, while in the non-food sector except automotive fuel increased by 0.3%.

The above indices adjusted after eliminating the seasonal effects (e.g., the beginning of the school year, holidays, tourist period etc) present the following evolution:

- The seasonally adjusted indices of Persons Employed in Retail Trade of 2nd quarter 2015 appear the same annual growth rates with their respective non-seasonally adjusted indices.
- The seasonally adjusted Index of Persons Employed in Retail Trade decreased by 0.1% in the 2nd quarter 2015, compared to the 1st quarter 2015. More specifically, in the food sector, the index decreased by 0.1%, while in the non-food sector except automotive fuel, increased by 0.2%.

METHODOLOGICAL NOTES

Generally	The Index of Persons Employed in Retail Trade is a quarterly index that was first compiled in 2004 with 2000=100.0 as the base year and backdated data from the 1st quarter of 2000.
Purpose of the index – definitions	<p>The purpose of the Retail Trade Turnover Index is to measure the performance of the goods and services market.</p> <p>The compilation of the index includes the number of persons employed in the enterprise irrespective of their status (owners, partners and their family members) and the nature of their work (managers, sales persons and auxiliary staff) and irrespective of whether they work on a provisional or seasonal basis, full time or part time, with or without remuneration.</p>
Legal basis	The compilation of the Index of Persons Employed in Retail Trade is governed by Council Regulation (EEC) No.1165/98 "concerning short-term statistics" and by the Regulation No.1893/2006 of the European Parliament and of the Council for the implementation of the new statistical classification NACE Rev.2 and by Regulation No 329/2009.
Reference period	Quarter.
Base year	2010=100.0.
Revision	Pursuant to the provisions of Council Regulation No 1165/98 concerning short-term statistics, the index in question is updated every five (5) years in years ending in 0 or 5.
Statistical classification	The EU (Eurostat) NACE Rev.2 statistical classification of economic activities was used, in conformity with Regulation (EC) 1893/2006 of the European Parliament and the Council.
Geographical coverage	The Index covers the whole of the country, with data from 49 prefectures.
Coverage of economic activities	The index covers division 47 of NACE Rev 2 statistical classification of economic activities of the European Parliament and the Council.
Statistical survey	For the compilation of the revised Index of Persons Employed in Retail Trade (2010=100.0) a sub-sample was used, which was obtained from the existing sample of observation units from the Turnover Index in Retail Trade survey. More specifically, out of the 1607 enterprises included in the sample of the survey for the Turnover Index in Retail Trade (2010=100.0), 754 enterprises were selected covering all the strata of the above survey, which resulted by crossing of 11 categories of aggregated economic classes and size classes of enterprises.
Calculating the indices	The Index of Persons Employed in Retail Trade is calculated as a chain index.
Seasonal adjustment	Seasonal adjustment is the procedure followed to remove the impact of seasonality on the time series in order to improve the comparability over time. The method used is the TRAMO-SEAT method with the use of JDemetra+ 2.0.0. The whole series with seasonally adjusted indices is <i>recalculated</i> every time a <i>new</i> observation is added in time series
Compiled index series	The time series of this index are compiled from 1 st quarter 2000 as follows: 1) Overall Index, 2) Overall Index (excluding the persons employed in the automotive fuel sector), 3) Index of persons employed in the food sector and 4) Index of persons employed in the non-food sector except automotive fuel.
Publication of data	The time series of the Index of Persons Employed in Retail Trade (2010=100.0) have being published since 2000.
References	<p>More information on the methodology concerning the compilation and calculation of the index and for the time series is available on the ELSTAT website:</p> <p>http://www.statistics.gr/portal/page/portal/ESYE/PAGE-themes?p_param=A0508</p>
