PRESS RELEASE

Agricultural Price Indices (API)^{1,2}

October 2008

The Agricultural Price Indices (API) provide information on trends in selling prices of agricultural products (Output Price Index) and in purchase prices of the means of agricultural production (Input Price Index).

Output Price Index (excluding subsidies)

The Output Price Index in October 2008, as compared to October 2007, decreased by 0,2%. A year earlier, the index increased by 17,2%.

The Output Price Index in October 2008, as compared to September 2008, decreased by 0,3%. A year earlier, the index decreased by 2,7%.

¹The revised Agricultural Price Indices (API-Output and Input Price Indices in Agriculture and Livestock) use the concept of "market price" which is defined as the prices received or paid by the producer excluding the deductible VAT and subsidies (the latter since 1995 and onwards).

² The revised API is calculated on the basis of the Laspeyres formula with base year 2000=100,0. The output weighting coefficients have been calculated on the basis of the average sales value of products produced for the years 1999 and 2000, while the input weighting coefficients take into account the total expenditure payment of the year 2000.

Annual rates³

Output prices in October 2008, as compared to October 2007, decreased by 0,2%, due to the annual changes of the main groups of prices, as following:

- ❑ Crop production goods prices, decreased by 1,6%
- ❑ Animal production goods prices, increased by 4,4%

Monthly rates⁴

Output prices in October 2008, as compared to September 2008, decreased by 0,3%, due to the monthly changes of the main groups of prices, as following:

- ❑ Crop production goods prices, decreased by 0,4%
- ❑ Animal production goods prices, decreased by 0,1%

Input Price Index

The Input Price Index in October 2008, as compared to October 2007, recorded a rise of 6,1%. A year earlier, the index also increased by 11,7%.

The Input Price Index in October 2008, as compared to September 2008, decreased by 1,7%. A year earlier, the index increased by 2,6%.

Annual rates⁵

Input prices in October 2008, as compared to October 2007, rose by 6,1%, due to the annual changes of the main groups of prices, as following:

- ❑ Intermediate consumption goods prices, grew by 6,3%
- ❑ Capital formation goods prices, grew by 5,3%

^[3,5] The annual rates measure the changes of output and input producer prices in agricultural and livestock production, between the current month and the same month of the previous year.

^[4,6] The monthly rates measure the changes of output and input producer prices in agricultural and livestock production, between the two latest months.

Monthly rates⁶

Input prices in October 2008, as compared to September 2008, decreased by 1,7%, due to the monthly changes of the main groups of prices, as following:

- ❑ Intermediate consumption goods prices, decreased by 2,1%
- ❑ Capital formation goods prices, remained unchanged

More information on the rates of change of the API are presented in the annexed tables (1,2) and graphs (1,2).
