

HELLENIC REPUBLIC

MINISTRY OF ECONOMY AND FINANCE

GENERAL SECRETARIAT OF
THE NATIONAL STATISTICAL SERVICE
OF GREECE

Pireas, July 24th, 2008

PRESS RELEASE

ARRIVALS AND NIGHTS SPENT AT COLLECTIVE ACCOMMODATION ESTABLISHMENTS (hotels, similar establishments and camping)

YEAR 2007
(Final data)

The National Statistical Service of Greece publishes data of arrivals and nights spent at collective accommodation establishments in Greece, which are collected through a census survey, according the Directive 95/57 of the E.U. The data are received from all hotels, similar establishments and camping in Greece.

The main characteristic of the 2007 data is the remarkably increased response of hotels and similar establishments in the survey, which corresponds to 18,5% more operational bed places, as compared to 2006. Thus, in order to extract correct conclusions, a case-by-case combinative analysis of the data is required.

For that reason, at the tables included in this press release, all the rates of change are not calculated by the given data. They are calculated by using comparative samples for the years 2006 and 2007, so as to eliminate the effect of the increased response rate during the year 2007.

In general, during 2007, the share of the residents in the arrivals at hotels, similar establishments and camping is 44,2%, while for non-residents is 55,8%. For the nights spent at these establishments, the share of residents is 26,5% (with an average stay of 2,5 nights), while for non-residents is 73,5% (with an average stay of 5,4 nights). (Tables 1 & 2)

four (4) regions and in particular in Attiki (22,1%), Kriti (13,9%), Islands of Southern Egeo (13,3%) and in Central Makedonia (12,6%). As for the nights spent, the 80% of the total is accumulated in five (5) regions, that is, Kriti (23,4%), Islands of Southern Egeo (22,5%), Attiki (11,8%), Ionian Islands (11,5%) and Central Makedonia (10,9%). (Tables 5 & 6)

The percentage share of the geographical regions in the arrivals and nights spent at hotels, similar establishments and camping, during 2007, is not much different as compared to year 2006. However, Western Greece has an increased share in the nights spent, while the share in nights spent at the Ionian Islands is decreased. This fact is also reflected at the percentage use of the bed places of these regions.

More specifically, during 2007 as compared to 2006, the highest increase in the percentage use of bed-places is observed in Western Greece and Attiki, while there is a decrease in the percentage use of bed-places in Kriti, Islands of Southern Egeo and Ionian Islands. (Table 3)

analyzing data by country, the country of residence of the non-resident customers of hotels, similar establishments and camping, the majority of the arrivals and nights spent is from the European Union (72% for the arrivals and 81% for the nights spent). The increased share of customers from the European Union is also due to the accession of Bulgaria and Romania as member states, during 2007. The main customers of Greek tourism are from Germany and the United Kingdom, however their share in arrivals and nights spent is decreased. On the contrary, there is an increase in the share of customers from Russia, both in arrivals and nights spent at hotels, similar establishments and camping. (Tables 8 & 9)

Finally, analyzing data by **month** (for hotels, similar establishments and camping), we see that 81% of arrivals (68% of residents and 91% of non-residents) and 90% of nights spent (74% of residents and 96% of non-residents) is accumulated at the period between April and October. During the rest of the year, arrivals and nights spent are mainly due to the residents of Greece. (Tables 9 & 10)

Analytical data are included in the attached tables and diagrams.
