PRESS RELEASE

STRUCTURAL BUSINESS STATISTICS SURVEY, 2016

The Hellenic Statistical Authority (ELSTAT) announces data on the Structure of Enterprises in Greece for the year 2016.

Structural Business Statistics are compiled in the framework of the obligations of the Country, as they arise from the European Union law (Regulation (EC) 295/2008), with the aim of providing an estimation on: the structure and development of enterprises activities, the production factors use, the performance and competitiveness of enterprises, the regional, national, Community and international development of enterprises and markets, the policy implemented by enterprises and the special characteristics and special distribution of their activities. Moreover, Structural Business Statistics are used for the compilation of Gross Domestic Product (from the side of production, expenditure and income) and of regional data on GDP, Gross Value Added, Employment and Investment.

In general, Structural Business Statistics cover all economic activities sectors, except for agriculture and personal services, i.e. they cover services provided to enterprises, trade, manufacture and construction.

On the basis of the results of the 2016 Structural Business Statistics survey, the total turnover of the enterprises that are active in Greece in the sectors of manufacture, construction, trade and services (except for the personal services) amounted to 225.9 billion euro. The corresponding production value and the gross value added of the enterprises were 132.5 and 45.2 billion euro, respectively.

As regards labour input, the aforementioned enterprises counted 2.4 million persons employed, out of which 1.7 million were employees, while in full time equivalents, the number of employees amounted to 1.4 million persons.

On the basis of available survey data, the enterprises of these specific economic activities sectors spent 187.5 billion euro on purchases of goods and services during their operation in 2016, while 99.0 billion euro of the above amount pertaining to purchases of goods and services for resale at the same condition as they were received. The enterprises made investments amounting to 8.8 billion euro in 2016 (Table 1).

Table 1: Results on the Structure of Enterprises, year 2016

| RESULTS OF ENTERPRISES (thousand EUR) | | LABOUR INPUT (units) | | GOODS AND SERVICES INPUT (thousand EUR) | | CAPITAL INPUT (thousand EUR) | |
|--|-------------|---|-----------|--|-------------|-------------------------------------|-----------|
| Turnover | 225,896,104 | Number of persons employed | 2,366,199 | Total purchases of goods and services | 187,481,315 | Gross investments in tangible goods | 8,762,468 |
| Production value | 132,510,988 | Number of employees | 1,660,372 | Purchases of goods and services for resale | 99,000,490 | | |
| Gross value added | 45,239,972 | Number of employees in full time equivalent units | 1,440,586 | | | | |

In 2016, a total number of 793,946 enterprises were active in Greece in the sectors of manufacture, construction, trade and services (except for the personal services). The sectors with the biggest number of enterprises were wholesale and retail trade with 255,503 enterprises, accounting for 32.2%, professional, scientific and technical services with 152,320 enterprises, accounting for 19.2%, followed by accommodation and food service activities with 118,052 enterprises and percentage 14.9% (Table 2).

As regards the total turnover recorded by enterprises in 2016, the wholesale and retail trade sector accounted for the biggest share with 45.2% or 102.1 billion euro in absolute terms, followed by manufacturing and electricity, gas, steam and air conditioning supply accounting for 20.7% and 8.1% or, in absolute terms, 46.8 billion euro and 18.3 billion euro, respectively.

The sectors with the largest contribution to the value added in the Greek economy for the year 2016 were manufacturing with 10.4 billion euro (23.0%), wholesale and retail trade with 10.4 billion euro (23.0%) and transportation and storage with 5.6 billion euro (12.5%).

As regards the personnel costs, the sectors with the biggest relevant expenditure were wholesale and retail trade with 8.2 billion euro (28.2%), manufacturing with 5.8 billion euro (20.0%) and transportation and storage with 3.7 billion euro (12.7%).

Wholesale and retail trade holds also the first place in 2016 as regards the employment sizes with 708,428 persons employed (29.9%), out of which 470,267 were employees (28.3%). Accommodation and food service activities follow with 488,149 persons employed (20.6%), out of which 379,905 were employees (22.9%) and manufacturing with 311,369 persons employed (13.2%), out of which 254,053 were employees (15.3%).

Graph 2: Turnover and gross value added of enterprises, 2016

Graph 3: Number of persons employed and number of employees of enterprises, 2016

On the basis of available survey data on the size of enterprises in 2016, the sectors with the biggest number of small enterprises (with 0 to 9 persons employed) was wholesale and retail trade with 249,186 enterprises and a turnover amounting to 41.8 billion euro, followed by professional, scientific and technical activities with 151,080 enterprises and a turnover amounting to 4.3 billion euro and accommodation and food service activities with 107,920 enterprises and a turnover of 3.3 billion euro (Table 3).

As regards the enterprise size class with 10 to 19 persons employed, accommodation and food service activities accounts for the biggest number of such enterprises with 6,590 units and a turnover amounting to 1.5 billion euro, followed by wholesale and retail trade with 4,026 enterprises and a turnover of 10.0 billion euro and manufacturing with 2,293 enterprises and a turnover of 2.8 billion euro.

The sectors recording the biggest number of enterprises with 20 to 49 persons employed are accommodation and food service activities counting 2,814 units and a turnover of 1.8 billion euro, wholesale and retail trade with 1,637 enterprises and a turnover of 12.5 billion euro and manufacturing with 1,218 enterprises and a turnover of 4.3 billion euro.

As regards the enterprise size class with 50 to 249 persons employed, accommodation and food service activities accounts for the biggest number with 681 enterprises and a turnover of 2.5 billion euro, followed by manufacturing with 660 enterprises and a turnover of 11.2 billion euro and wholesale and retail trade with 569 enterprises and a turnover of 18.4 billion euro.

As regards big enterprises (with 250 or more persons employed) manufacturing records the biggest number with 113 enterprises and a turnover of 22.6 billion euro, followed by wholesale and retail trade with 85 enterprises and a turnover of 19.3 billion euro and transportation – storage with 56 enterprises and a turnover of 4.1 billion euro.

* Confidential data

Compared to 2015, in 2016 real estate activities was the sector that presented the biggest increase in turnover and value added, with a change of 6.9% and 16.2% respectively, whereas mining and quarrying was the sector that showed the greatest decrease in the indicators above, with a change of 28.1% and 22.3% respectively. In 2015 compared with 2014, for the sector of electricity, gas, steam and air conditioning supply, both turnover and production value showed the biggest increase of 55.7% and 42.0% respectively, whereas, for the mining and quarrying sector there was the greatest decrease in turnover, 13.1%, and for the manufacture sector the greatest decrease in production value, 7.8%, over the same period (Table 4).

Between 2015 and 2016, gross value added for the electricity, gas, steam and air conditioning supply sector presented the greatest increase, with a change of 28.3%, while the repair of computers and personal and household goods sector recorded the largest decrease of 30.6%. Compared to 2014, in 2015, construction gross value added showed the highest increase, 13.4%, while the greatest decrease, 24.2%, was within real estate activities sector.

Administrative and support service activities showed an increase of 7.4% in total purchases for goods and services, which was the greater of all the economic sectors, between 2015 and 2016, while mining and quarrying showed the highest decrease, 16.5%, over the same period. Electricity, gas, steam and air conditioning supply showed the highest increase in total purchases for goods and services, 100.1% in 2015 compared to 12 months previously, while administrative and support service activities recorded the major decline, 16.4%.

**Graph 4: Basic economic figures of enterprises, by economic activity section
2014 to 2016**

Real estate activities sector recorded a 23.9% increase in the number of persons employed, the greatest within the economic sectors in 2016 compared with the year before, while mining and quarrying showed the largest decrease, 14.3%, over the same period. In 2015 compared with 2014, administrative and support service activities showed the biggest increase, with a change of 1.5%, in the number of persons employed, whereas construction showed the biggest decrease of 19.8% (Table 5).

In 2016, the number of employees within repair of computers and personal and household goods sector had the highest increase of 71.5% compared to the previous year, while mining and quarrying sector recorded the biggest decrease of 14.3%. Accordingly, between 2014 and 2015, accommodation and food service activities showed the biggest increase in the number of employees, which is 7.1%, while mining and quarrying presented the greatest decrease, of 13.9%.

Compared to 2015, the personnel costs within repair of computers and personal and household goods sector recorded the biggest increase of 26.6% in 2016, while mining and quarrying showed the greatest decrease of 14.7% over the same period. Between 2014 and 2015, the level of personnel costs for the real estate activities increased by 10.6% (the biggest of the economic sectors), while within water supply; sewerage, waste management and remediation activities sector showed the biggest decrease, with a change of 12.8%.

As for wages and salaries, repair of computers and personal and household goods had the largest contribution on the increase between 2015 and 2016, which is 26.2%, while mining and quarrying sector had the biggest decrease, with a change of 14.7%. Compared to 2014, wages and salaries increased most within real estate activities sector, with a change of 11.2% in 2015, while the biggest decrease, 7.2%, was recorded within water supply; sewerage, waste management and remediation activities sector over the same period.

Table 5: Employment and personnel costs of enterprises, by economic activity section 2014 to 2016

| Branches of economic activity (Nace rev.2) | Number of persons employed | | | | | Number of employees | | | | | Personnel costs | | | | | Wages and salaries | | | | |

EXPLANATORY NOTES

| | |
|--|---|
| Structural Business Statistics Survey | The purpose of the Structural Business Statistics surveys is the collection, compilation and publication of statistics on the structure, the activities the competitiveness and the performance of enterprises. The aim of the compilation of these statistics is the analysis of the structure and the development of the activities of the enterprises, the production factors as well as other characteristics that enable the measurement of their activity, their competitiveness and their performance, as well as the analysis of the policy implemented by the enterprises, the analysis of the small and medium sized enterprises and the analysis of the special characteristics of enterprises that are related to the special distribution of activities. |
| Reference period | Calendar year. |
| Legal framework | Regulation (EC) 295/2008 of the European Parliament and the Council and Implementing Regulations (EC) 250/2009 and 251/2009, 439/2014, 446/2014, 1042/2015 and 2112/2015 of the European Commission. |
| Classification System | Sections of economic activities according to the European classification Nace Revision 2. |
| Coverage | Sections B, C, D, E, F, G, H, I, J, L, M, N and division S95 of the statistical classification of economic activities Nace revision 2. |
| Main variables | <p>The main variables that area compiled are the following:</p> <ul style="list-style-type: none">• variables related to the economic results (e.g. turnover and value added)• variables related to the inputs and more specifically the labour input e.g. employment and hours worked), the input on goods and services (e.g. total purchases) and the capital input (e.g. investment in tangible goods) |
| Definitions | <p><u>Turnover</u>: Turnover comprises the total invoiced by the enterprise during the reference period and corresponds to the sales of goods and services to third parties.</p> <p><u>Production values</u>: The production value measures the quantity that is actually produced by the enterprise, based on its sales, including the changes in stocks and the resale of goods and services.</p> <p><u>Value added at production factor costs</u>: It is the gross income from operating activities after adjusting for operating subsidies and indirect taxes.</p> <p><u>Total purchases of goods and services</u>: They include the value of all goods and services purchased during the accounting period for resale or consumption in the production process, except of the capital goods, the consumption of which is recorded as consumption of fixed capital.</p> <p><u>Purchases of goods and services purchased for resale in the same condition as received</u>: Purchases for resale are purchases of goods for resale to third parties, without further processing.</p> <p><u>Gross investments in tangible goods</u>: Investment during the reference period in all tangible goods. New and existing tangible capital goods are included, whether</p> |

bought from third parties, acquired under a financial lease contract, produced for own use with having a useful life of more than one year..

Number of persons employed: The total number of persons who work in the enterprise, including the working proprietors, partners and unpaid family members, as well as persons who work outside the enterprise who belong to it and are paid by it.

Number of employees: The number of persons who work for an employer and who have a contract of employment and receive compensation in the form of wages, salaries, fees, gratuities, piecework pay or remuneration in kind.

Number of employees in full time equivalent units: The number of employees converted in full time equivalents. It is calculated from the total of the hours worked divided by the average annual hours worked in full time employment posts within the Greek territory.

Comparability Due to the change of the methodology used for the compilation of Structural Business Statistics for the year 2015 and the revision of data provided for the year 2014 according to the new methodology, the data that are published on the website of ELSTAT for the year 2016, are comparable only with those of the years 2014 and 2015, while they are not comparable with the respective data for the previous years that are published on ELSTAT website.

Methodology For the compilation of the Structural Business Statistics for the year 2016, administrative tax and other data were used with main source the tax declaration form “E3”, which provides the most information on the economic results of enterprises. This method was applied for the first time for the compilation of the Structural Business Statistics for the year 2015, while a relevant revision took place for the data of the year 2014.

The tax data cover only part of the statistical variables that is required, according to the relevant Regulation, to be estimated for Structural Business Statistics. For the estimation of the remaining variables, a survey was conducted on the large enterprises of each sector, which affect the economy of these sectors, in order to estimate the respective figures for the total enterprises population, based on the collected data.

Code of Practice The European Statistics Code of Practice is based on 15 Principles covering the institutional environment, the statistical production processes and the output of statistics. A set of indicators of good practice for each of the Principles provides a reference for reviewing the implementation of the Code. The quality criteria for European Statistics are defined in European Statistical Law.

Statistical authorities, comprising the Commission (Eurostat), National Statistical Institutes and other national authorities responsible for the development, production and dissemination of European Statistics, together with governments, ministries and the European Council, commit themselves to adhere to the Code. The Principles of the Code of Practice together with the general quality management principles represent a common quality framework in the European Statistical System. More information regarding the European Statistics Code of Practice can be found at the link «[Code of Practice](#)».

References More information regarding the Structural Business Statistics can be found on ELSTAT website www.statistics.gr, at the link «[Structural Business Statistics](#)».
